giuseppe financial planning: The Return of Politics David Hine, Salvatore Vassallo, 2000 By the spring of 1998, it had become clear that Italy, after considerable effort, had succeeded in bringing its public finances into line with the Maastricht parameters for joining the European Monetary Union. This was generally viewed as an important success of the Olive Tree coalition government led by Romano Prodi, and a sign that Italian political life had become normal. Nevertheless, the Bicameral Commission, which should have fostered a radical constitutional reform with the aim to stabilize and strengthen the bipolar structure of the party system and the majoritarian functioning of democracy in Italy, was dismantled in June. Moreover, in October 1998 the Prodi government suddenly collapsed because of the internal opposition of the Neo-Communist wing of its parliamentary majority, a further demonstration that the Italian transition towards a more effective democratic rule is far from complete. David Hine is Fellow and Senior Censor at Christ Church College, Oxford. Salvatore Vassallo is senior civil servant in the Emilia-Romagna regional government's Institutional Affairs Bureau and Professor of Public Policy Analysis at the University of Trento.

giuseppe financial planning: **Doug Wheeler** Doug Wheeler, 2020-01-07 Over five decades, Doug Wheeler has pioneered the art of light and space. His work powerfully explores the way we perceive “empty” space—the way light can affect our perception and make emptiness feel full and dense. From his early experiences flying across the desert with his father, a doctor in Globe, Arizona, Wheeler developed a passion for the intensity and stillness of vast expanses, seeing in them a whole new set of possibilities for visual art. Although Wheeler began his career as a painter, his wall-mounted artworks soon began incorporating light as a medium and quickly gave way to an unprecedented art-historical breakthrough: his construction of an absolute light environment, crafted in his studio in 1967. Since that unparalleled moment, Wheeler’s work has been exhibited widely all over the world; in the past decade, with numerous major gallery and museum installations, his reputation as the definitive light and space artist has been solidified. This volume, featuring new scholarship by renowned art historian Germano Celant, traces the entire course of Wheeler’s career to date, from his first mature paintings to his immersive installations. Writing on Wheeler’s intense and direct engagement with the absoluteness in the optical fields he creates, Celant provides a detailed account for Wheeler’s development as one of the most original and influential artists of his generation. Wheeler’s work not only changes how we encounter reality after we see it, but also how we envision what is possible more broadly in visual art.

giuseppe financial planning: *Papal Genealogy* George L. Williams, 2024-10-14 The papacy has often resembled a secular European monarchy more than a divinely inspired institution. Roman pontiffs bestowed great wealth on their families and forged strategic alliances with other powerful families to increase their power. Pope Alexander VI (Rodrigo Borgia), for example, forced his daughter Lucrezia into a series of marriages for political reasons. When her marital alliance was no longer advantageous, as was the case in her second marriage, her husband was brutally murdered. Many papal families also intermarried in hopes of forming a hereditary papacy; at least two members of the Fieschi, Piccolomini, Della Rovere, and Medici families served as pope. Papal families since the early history of the church are fully covered in this comprehensive work. Genealogical charts graphically show the descendants of the popes, presenting in many cases the interrelationships between the papal families and their relationships with many of the leading families of Europe. Detailed histories examine the impact of the papacy on each pope's family and how each influenced the history of the church.

giuseppe financial planning: *Neoliberal Transformations of the Italian State* Adriano Cozzolino, 2021-01-28 'The book is an exploration, on both theoretical and empirical grounds, into the nature and the transformation of the state in the neoliberal era. Nowadays, a widespread crisis of legitimation affects the institutions and authority of the state; similarly, and especially after the Great Crisis of 2008 to present, the European project is increasingly questioned by populist and neo-nationalist forces, which politically advance in the state and society, and promote further coercive-oriented reconfiguration of state powers and apparatus. The 'nationalist international', the 'new populists' and/or the 'rise of new international fascism' are questions on the verge of international scholarship and political debate. However, many of these studies often miss the specificity and critical importance of the study of the state and of state (institutional and ideological)

powers; even more importantly, the phenomenon of populism/neo-authoritarianism is interpreted by the mainstream as a clear break with traditional centrist parties, with the result of neglecting the past authoritarian tendencies that accompany the entire history of neoliberalism. This book aspires to be a guide for political activist and policy-makers: specifically, by showing how the state is of critical importance to the making of neoliberalism in institutional and cultural terms, it also aims to rethink the state as the arena of politics and, accordingly, as the key site to promote alternatives to neoliberalism
