The discussions also include perspectives from the neurosciences. huma mindfulness reviews: Fully Human Susan Packard, 2019-02-12 HGTV cofounder Susan Packard launches the next chapter in emotional intelligence (EQ), and shows you how to increase your personal satisfaction and productivity—in work and life—via her three-step path toward EQ Fitness. Emotions can sink us, or they can power us like fuel to succeed. Many of us show up for work, and life, feeling lonely even in a room full of people, or bringing unproductive emotions into work, like anger or fear. You don't have to feel this way. Susan Packard offers an accessible new guidebook to grow your emotional fitness, and it's arrived just in time, as technology is quickly becoming our main interface for communication. No matter where you are in your career, success is an inside job. Packard lays out how to develop interdependent work relationships, and for leaders, how to build healthy company cultures. huma mindfulness reviews: Effects of Stress on Human Health Hülya Çakmur, 2020-05-13 Stress response is a physiological reaction of the human body to potential dangers (tangible or intangible). For a living organism, stress within physiological limits is necessary to stay alive. But the protective effects of stress can easily be potentially harmful for the body when it is out of control. Invariably, life events and stress are combined. It is well established that chronic and excessive stress may reduce the quality and duration of life. Even though the negative health consequences of stress may be physical or psychological, it has been observed that many people still maintain a disease-free lifespan after exposure to intensive stressful conditions. It can be inferred that some people have biologically and psychologically higher resilience capacity. However, there is no doubt that management of stress may be possible and could be learned. Therefore, it is important to be aware of stress management strategies to ensure a life free from stress-related health problems and a healthy lifespan.
