how to increase financial literacy: Financial Literacy and Responsible Finance in the FinTech Era John O.S. Wilson, Georgios A. Panos, Chris Adcock, 2021-07-21 A growing body of evidence suggests that financial literacy plays an important role in financial well-being, and that differences in financial knowledge acquired early in life can explain a significant part of financial and more general well-being in adult life. Financial technology (FinTech) is revolutionizing the financial services industry at an unrivalled pace. Views differ regarding the impact that FinTech is likely to have on personal financial planning, well-being and societal welfare. In an era of mounting student debt, increased (digital) financial inclusion and threats arising from instances of (online) financial fraud, financial education and enlightened financial advising are appropriate policy interventions that enhance financial and overall well-being. Financial Literacy and Responsible Finance in the FinTech Era: Capabilities and Challenges engages in this important academic and policy agenda by presenting a set of seven chapters emanating from four parallel streams of literature related to financial literacy and responsible finance. The chapters in this book were originally published as a special issue of The European Journal of Finance.

how to increase financial literacy: Improving Literacy Through Home, School, and Community Partnerships Gatcho, Al Rynne Gabonada, Titar-Improgo, Cecille Marie, Gutierrez, Merry Ruth Morauda, 2024-04-09 The underappreciation of the pivotal roles played by home, school, and community in shaping the literacy journey of individuals. While the mantra Literacy begins at home resonates, it often remains a mere platitude rather than a transformative force. The synergy between these three pillars is essential, yet gaps persist, hindering the development of a truly literate society. As children tread the academic path, the home lays the foundation, and schools amplify these efforts. However, the holistic nature of learning, encompassing life experiences, demands a collaborative approach from families, educators, and communities. This is the crux of the problem - a disjointed system that impedes the seamless development of literacy across diverse backgrounds. Improving Literacy Through Home, School, and Community Partnerships is a groundbreaking book that unravels the complexities of this challenge and illuminates the transformative potential within collaborative efforts. By delving into the dynamic interplay between

home, school, and community, the book offers a roadmap to bridge existing gaps and forge a path toward a more literate society. Early-career researchers will find this a valuable resource to identify and address these gaps, while families, educators, community leaders, and policymakers will gain invaluable perspectives to inform their practices, policies, and research initiatives.
