hood college majors: Book of Majors 2014 The College Board, 2013-07-02 The Book of Majors 2014 by The College Board helps students answer these questions: What's the major for me? Where can I study it? What can I do with it after graduation? Revised and refreshed every year, this book is the most comprehensive guide to college majors on the market. In-depth descriptions of 200 of the most popular majors are followed by complete listings of every major offered at more than 3,800 colleges, including four-year and two-year colleges and technical schools. The 2014 edition covers every college major identified by the U.S. Department of Education—over 1,200 majors are listed in all. This is also the only guide that shows what degree levels each college offers in a major, whether a certificate, associate, bachelor's, master's or doctorate. The guide features: • insights—from the professors themselves—on how each major is taught, what preparation students will need, other majors to consider and much more. • updated information on career options and employment prospects. • the inside scoop on how students can find out if a college offers a strong program for a particular major, what life is like for students studying that major, and what professional societies and accrediting agencies to refer to for more background on the major.

hood college majors: Education for a Global Century , 1981-01-01 This handbook describes international programs for undergraduates, provides a short section on selected consortia, and suggests ideas for widening international education. The programs selected for this volume met certain criteria. In addition to being effective, the programs do not place a large strain on institutional budgets and can be easily adapted by others. The volume is arranged into four chapters. Chapter I, the largest section, describes over 60 two-year and four-year college and university programs. Chapter II describes six consortia programs. Each description includes a brief introduction to the institution and an overview of the international aspects of the curriculum as well as information about how the international aspects are organized, the educational impact, and the resource persons who can be contacted for further information. Chapter III presents worthwhile, imaginative ideas that are used at other institutions. Chapter IV consists of a thematic index that lists each program or approach under general program theme or pedagogic approach categories, such as foreign languages, study abroad, and integrated curriculum.
