icivics lesson plans: Democracy's Discontent and Civic Learning Charles S. White, 2018-09-01 Around the globe, democracy is under assault. For a dozen years, global freedom has followed a downward slope, according to Freedom House. Once viewed as the world's model of freedom, the United States has slipped in world ratings of democracy. For a rising portion of the world's population, faith in democracy is flagging. At the same time, a wave of nationalism and xenophobia is rising in the West, questioning democracy's ability to meet the needs of its citizens. The contributors to this volume examine democracy's discontent from a variety of perspectives. What forces have produced the extreme partisanship and polarization roiling America's civic life and politics? How has today's populist movement challenged democratic norms and institutions? What role has social media played in democracy's discontent and its defense? How do we overcome persistent racism in the face of emboldened White supremacist and anti-immigrant agitation? Across the pages of this book, teachers, teacher educators, and education policy makers will recognize a common theme in responding to democracy's discontent - the need to rebuild the nation's civic infrastructure. Research on best practices in civic learning and engagement serve as a guide to transforming how we prepare citizens for democratic deliberation and civic action. Creative and effective teaching materials and approaches await only the will to invest the needed time and support. Repairing our civic infrastructure will help to restore confidence in our civic capabilities and trust in our ability to work together for the public good. Without a serious recommitment to the

civic mission of schools, the nation will be ill prepared to defend against those within and beyond our borders who are intent on undermining democracy.

icivics lesson plans: *Civic Education in the Twenty-First Century* Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians, governmental institutions, schools, new technologies, and interest groups work together to promote informed, engaged citizens. *Civic Education in the Twenty-First Century* brings together scholars from various disciplines to show how such a United States is possible today. Inspired by Alexis de Tocqueville's analysis of American democracy in the early 1800s, this edited volume represents a multidimensional evaluation of civic education in its new and varied forms. While some lament a civics crisis in America today, *Civic Education in the Twenty-First Century* raises hope that we can have an informed and active citizenry. We find the activities of a number of politicians, government institutions, schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy. New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology. With *Civic Education in the Twenty-First Century*, we call for the United States to make these practices less isolated and more common throughout the country. The volume is broken into three major sections. First there are four chapters exploring the history and philosophical debates about civic education, particularly with respect to its role in America's educational institutions. Then, the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations. As some examples, this section explores how politicians through campaigns and

judiciaries through community programs enhance civic knowledge and encourage civic engagement. This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry. Finally, the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education, engagement and our knowledge of them. From the virtual civics campus of Fort Hayes State to citizens' academies throughout the country, this section shows the possibilities for schools today to once again be civics actors and promoters.

icivics lesson plans: *Teaching America* David J. Feith, 2011-08-11 In *Teaching America*, more than 20 leading thinkers sound the alarm over a crisis in citizenship—and lay out a powerful agenda for reform. The book's unprecedented roster of authors includes Justice Sandra Day O'Connor, Senator Jon Kyl, Senator Bob Graham, Secretary Rod Paige, Alan Dershowitz, Juan Williams, Glenn Reynolds, Michael Kazin, Frederick Hess, Andrew Rotherham, Mike Feinberg, Seth Andrew, Mark Bauerlein and more. Their message: To remain America, our country has to give its kids a civic identity, an understanding of our constitutional system, and some appreciation of the amazing achievements of American self-government. But we are failing. Young Americans know little about the Bill of Rights, the democratic process, or the civil rights movement. Three of every four high school seniors aren't proficient in civics, nine of ten can't cut it in U.S. history, and the problem is only aggravated by universities' disregard for civic education. Such civic illiteracy weakens our common culture, disenfranchises would-be voters, and helps poison our politics.

icivics lesson plans: *Resonant Games* Eric Klopfer, Jason Haas, Scot Osterweil, Louisa Rosenheck, 2025-05-13 Principles for designing educational games that integrate content and play and create learning experiences connecting to many areas of learners' lives. Too often educational videogames are narrowly focused on specific learning outcomes dictated by school curricula and fail to engage young learners. This book suggests another approach, offering a guide to designing games that integrates content and play and creates learning experiences that connect to many areas of learners' lives. These games are not gamified workbooks but are embedded in a long-form experience of exploration, discovery, and collaboration that takes into consideration the learning environment. *Resonant Games* describes twenty essential principles for designing games that offer this kind of deeper learning experience, presenting them in connection with five games or collections of games developed at MIT's educational game research lab, the Education Arcade. Each of the games—which range from *Vanished*, an alternate reality game for middle schoolers promoting

STEM careers, to Ubiquitous Bio, a series of casual mobile games for high school biology students—has a different story, but all spring from these fundamental assumptions: honor the whole learner, as a full human being, not an empty vessel awaiting a fill-up; honor the sociality of learning and play; honor a deep connection between the content and the game; and honor the learning context—most often the public school classroom, but also beyond the classroom. The open access edition of this book was made possible by generous funding from the MIT Libraries and Klopfer's lab.

icivics lesson plans: Supporting Reading in Grades 6-12 Sybil M. Farwell, Nancy L. Teger, 2012-06-11 This book presents a curricular framework for students grades 6-12 that school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives, beyond the required schoolwork. *Supporting Reading Grades 6-12: A Guide* addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities; support classroom teachers' instruction; and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information-skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st-Century Learner.

icivics lesson plans: Madam Chief Justice W. Lewis Burke, Joan P. Assey, 2015-12-22 The story of South Carolina's first female Chief Justice, with contributions by Sandra Day O'Connor, Ruth Bader Ginsburg, legal scholars, family members, and more. As a lawyer, legislator, and judge, Jean Hoefler Toal is one of the most accomplished women in South Carolina history. In this volume, contributors—including two United States Supreme Court Justices, federal and state judges, state leaders, historians, legal scholars, leading attorneys, family, and friends—provide analysis, perspective, and biographical information about the life and career of this dynamic leader and her role in shaping South Carolina. Growing up during the 1950s and '60s, Jean Hoefler was a youthful witness to the civil rights movement in the state and nation. Observing the state's premier civil

rights lawyer, Matthew J. Perry Jr., in court encouraged her to attend law school, where she met her husband, Bill Toal. When she was admitted to the South Carolina Bar in 1968, fewer than one hundred women had been admitted in the state's history. From then on she was both a leader and a role model. She excelled in trial and appellate work and won major victories on behalf of Native Americans and women. In 1975, she was elected to the South Carolina House of Representatives, and despite her age and gender quickly became one of the most respected members of that body. During her years in the House, Toal promoted major legislation on issues including constitutional law, criminal law, utilities regulation, local government, state appropriations, workers compensation, and freedom of information. In 1988, she was sworn in as the first female justice on the Supreme Court of South Carolina, and twelve years later she was elected Chief Justice, becoming the first woman ever to hold the highest position in the state's judiciary. As Chief Justice, Toal modernized not only her court, but also the state's judicial system. As a child, she loved roller skating in the lobby of the post office—a historic building that now serves as the Supreme Court of South Carolina. From a child in Columbia to Madam Chief Justice, her story comes full circle in this compelling account of her life and influence. Contributors include: Joseph F. Anderson, Jr. * Joan P. icivics lesson plans: Schooling Corporate Citizens Ronald W. Evans, 2014-11-27 Schooling

Corporate Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years. Based in extensive archival research, it traces the origins and development of accountability reform as marked by key government- and business-led reports—from A Nation at Risk to No Child Left Behind and Race to the Top. By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools, Evans shows how reformers have applied principles of business management to schools in extreme ways, damaging civic education and undermining democratic learning. The first full-length narrative account of accountability reform and its impact on social studies and civic education, Schooling Corporate Citizens offers crucial insights to the ongoing process of American school reform, shedding light on its dilemmas and possibilities, and allowing for thoughtful consideration of future reform efforts.
