**in the know courses:** Graduating Class Latty L. Goodwin, 2012-02-01 In Graduating Class, Latty L. Goodwin tells the story of a group of students from poor and working-class families who struggle against all odds to graduate from an elite university. The author explores the lived experiences of an engaging group of college students and shares their stories of trials and tribulations, joys and sorrows, and their frustrations and successes. Goodwin shows that even though the affirmative action debate was recently settled in the Supreme Court, universities are still left to grapple with defining who is deserving, meritorious, and qualified for admission. This timely story of hope and of students persevering through academic adversity poignantly demonstrates the justice of democratic access to higher education.

**in the know courses:** Teaching and Learning STEM Richard M. Felder, Rebecca Brent, 2024-03-13 The widely used STEM education book, updated Teaching and Learning STEM: A Practical Guide covers teaching and learning issues unique to teaching in the science, technology, engineering, and math (STEM) disciplines. Secondary and postsecondary instructors in STEM areas need to master specific skills, such as teaching problem-solving, which are not regularly addressed in other teaching and learning books. This book fills the gap, addressing, topics like learning objectives, course design, choosing a text, effective instruction, active learning, teaching with technology, and assessment—all from a STEM perspective. You'll also gain the knowledge to

implement learner-centered instruction, which has been shown to improve learning outcomes across disciplines. For this edition, chapters have been updated to reflect recent cognitive science and empirical educational research findings that inform STEM pedagogy. You'll also find a new section on actively engaging students in synchronous and asynchronous online courses, and content has been substantially revised to reflect recent developments in instructional technology and online course development and delivery. Plan and deliver lessons that actively engage students—in person or online Assess students' progress and help ensure retention of all concepts learned Help students develop skills in problem-solving, self-directed learning, critical thinking, teamwork, and communication Meet the learning needs of STEM students with diverse backgrounds and identities The strategies presented in *Teaching and Learning STEM* don't require revolutionary time-intensive changes in your teaching, but rather a gradual integration of traditional and new methods. The result will be a marked improvement in your teaching and your students' learning. Visit Author's site at <https://educationdesignsinc.com/book/>

**in the know courses:** *Training to Teach in Primary Schools* Jane Medwell, 2015-03-19 Full of practical help and guidance, this is a must have for primary trainees on school experience, whether they are in a school-based or university-based teacher training programme. It begins by helping trainees to plan their own journey through training and beyond. Taking control of their own training in this way supports student teachers to approach the course with confidence, and secure their first teaching job. The book provides guidance on: adapting to working in school observing, planning and evaluating in school teaching on placement assessing, monitoring and reporting on children's progress self-evaluation and how to pre-empt and resolve issues securing the first teaching job and succeeding in the NQT year For student teachers, the experience of school-based training is exciting but also challenging - this book supports them throughout and prepares them for the journey ahead. Student feedback on this book: Having been on a variety of teaching placements myself, I know just how daunting and overwhelming experiences in school can be at times - even with a supportive mentor by your side! Hence, I felt that this book can smooth out and rectify those worries one may face during a school placement, and offers the reader a realistic insight into school experiences. In my opinion, the most useful chapter by far is the 'Moving On' chapter near the end of the book. This

explains how to conclude a school placement, what to expect from an interview, and even how to set out a CV for a teaching position. This was not something I expected to find in this book however it was very much welcomed and is, in fact, a very important, valuable part of the book. This is the type of book you can buy on your very first day of teacher training and use well into your days as a newly qualified teacher. - Jasmin, Primary Teacher Trainee (University of Northampton)

**in the know courses:** **Creating Courses for Adults** Ralf St. Clair, 2015-01-08 Become an effective adult educator by approaching teaching systematically As the author describes at the beginning of *Creating Courses for Adults*, The big idea of this book is that education for adults has to be designed. Whether in basic skills training, English language classes, professional development workshops, personal interest courses, or formal degree programs, good teaching tends to conceal all the planning and decisions which had to be made in order to present participants with a seamless and coherent process for learning. The author posits that nobody is a completely intuitive teacher and that everybody has to make a series of choices as they put courses together. The decisions they make are important and far-reaching, and deserve to be considered carefully. Starting with the three core factors which must be taken into account when creating courses, *Creating Courses for Adults* walks readers through a manageable process for addressing the key decisions which must be made in order to design effective learning. Instructor factors are what the teacher brings to the teaching and learning process, such as experience and preferences. Learner factors are the influences that students bring with them, including their past experiences and expectations for the class. Context factors include the educational setting, whether in-person or online, as well as the subject matter. Readers of *Creating Courses for Adults* will learn a systematic approach to lesson and course design based on research into the ways adults learn and the best ways to reach them, along with pointers and tips for teaching adults in any setting.

Lynne Gabriel and Andrew Reeves provide a compelling explanatory narrative on the importance of translating ethical concepts into meaningful pragmatic practice and practitioner tools. They set out key

theories, concepts, and contemporary challenges in practice ethics, offering multiple lenses through which to make meaning of complex practice or risk scenarios and settings. Importantly, the book considers contemporary concepts associated with social justice including working in anti-oppressive ways. The chapters feature an array of engaging material, including a round table dialogue on working ethically in day-to-day practice, a 'toolkit' for working ethically across multiple contexts and presenting issues, and a rich collection of case examples from the authors' lived experience. This text supports trainees and practitioners in taking ethical frameworks into their direct work with clients and in their wider role in practice.

**in the know courses: Evaluating Second Language Courses** Dale Griffie, Greta Gorsuch, 2016-07-01 Typically, books on evaluation in the second and foreign language field deal with large programs and often result from large-scale studies done by the authors. The challenge for ordinary second and foreign language classroom teachers is that they must extrapolate techniques or strategies for evaluation from a very large scale to a much smaller scale, that of the course. At the same time, classroom teachers are responsible for outcomes of their courses and need to do evaluation on a scale and for needs of their choosing. *Evaluating Second Language Courses* is designed for classroom teachers who are dealing with a single course, and who wish to understand and improve some aspect of their course.

**in the know courses: Emerging Stronger** Jeffrey Chin, Michele Lee Kozimor, 2023-08-31 Responding to the sudden and far-reaching implications of the COVID-19 pandemic in college classrooms and on campus, *Emerging Stronger* assembles an original compilation of chapters that revisit, reframe, and refine the practice of teaching in a fundamentally altered landscape. Cultivated from a wide array of different fields, from sociology and political science to literature and secondary education, expert contributors to this volume extend their scholarship on teaching and learning and offer thoughtful pieces about curricular innovation, teaching tools and techniques, and evidence-based approaches that will interest dedicated faculty in any discipline. The chapters fall into three categories—Modalities of Teaching and Learning, Pedagogical Strategies, and Student Engagement—each of which carry an all-important focus on what readers should know about best practices now and for the foreseeable future. Whether experienced faculty, scholars just starting out in their teaching careers, or aspiring graduate students, readers of this volume will come away with great techniques and strategies, but also community, hope, and opportunity to strengthen their teaching and provide better learning environments in their classrooms.
