in the know app answers: How the world can be improved Rafael Barracuda, 2022-07-14 If we want to improve life on earth and our own lives, it is necessary to find a new guide: one that can meet the challenges of our time and of the future. The old guides were good in principle, but have become bogged down in calcified structures, often accomplishing the opposite of what was originally intended. The development of society makes it necessary to find new guiding principles from time to time. To do so, however, we need to know what the history was, how the present society is structured, and how it is likely to develop. The author aims to discover this by highlighting the following topics: Information: truth and lies Conspiracies: real and imagined conspiracies Nodes and choices: in history and as individuals Education Religions Cultures and subcultures Good and evil Resolving conflicts Freedom Justice Security How a poor country can become rich. Nature and the environment and global warming Art Creativity The meaning of life Peace Reform of the United Nations Health: Physical and mental Advice on how to become happy What ultimately matters is how to safeguard and promote life on earth. According to the author, making the right choice at certain crucial moments (called nodes) is of great importance. Ultimately, it is about love and the unity of all and everything,
