Unlike traditional wellness programs, it offers a multidimensional approach that addresses the body, mind, emotions, and energy system.

Philosophical Foundations

inner engineering program: Inner Engineering Sadhguru, 2016-09-20 NEW YORK TIMES BESTSELLER • Thought leader, visionary, philanthropist, mystic, and yogi Sadhguru presents Western readers with a time-tested path to achieving absolute well-being: the classical science of yoga. "A loving invitation to live our best lives and a profound reassurance of why and how we can."—Sir Ken Robinson, author of *The Element*, *Finding Your Element*, and *Out of Our Minds: Learning to Be Creative* NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY SPIRITUALITY & HEALTH The practice of hatha yoga, as we commonly know it, is but one of eight branches of the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function

at their optimal capacity. It is a means to create inner situations exactly the way you want them, turning you into the architect of your own joy. A yogi lives life in this expansive state, and in this transformative book Sadhguru tells the story of his own awakening, from a boy with an unusual affinity for the natural world to a young daredevil who crossed the Indian continent on his motorcycle. He relates the moment of his enlightenment on a mountaintop in southern India, where time stood still and he emerged radically changed. Today, as the founder of Isha, an organization devoted to humanitarian causes, he lights the path for millions. The term guru, he notes, means “dispeller of darkness, someone who opens the door for you. . . . As a guru, I have no doctrine to teach, no philosophy to impart, no belief to propagate. And that is because the only solution for all the ills that plague humanity is self-transformation. Self-transformation means that nothing of the old remains. It is a dimensional shift in the way you perceive and experience life.” The wisdom distilled in this accessible, profound, and engaging book offers readers time-tested tools that are fresh, alive, and radiantly new. Inner Engineering presents a revolutionary way of thinking about our agency and our humanity and the opportunity to achieve nothing less than a life of joy.

inner engineering program: What They Don't Teach you at IITs and IIMs! Dr Mukesh Jain, 2023-12-21 In the bustling realm of education, certain institutions have emerged as iconic hubs of intellectual rigor and unparalleled prestige. Among these, the Indian Institutes of Technology (IITs) and the Indian Institutes of Management (IIMs) shine brightly, revered as beacons of academic excellence and incubators of future leaders. These institutions, known for their rigorous curriculum and high-achieving students, have long been associated with the pursuit of technical and managerial mastery. Yet, as our understanding of education and personal growth expands, it becomes increasingly apparent that knowledge transcends the boundaries of any particular domain. Education is not confined to textbooks and lecture halls alone but extends far beyond to encompass the multidimensional facets of human existence. This book, *What They Do Not Teach at IITs and IIMs*, seeks to bridge the gap between conventional education and the profound wisdom offered by psychologists, neurologists, and the popular authors. It invites readers to explore the untrodden paths of self-awareness, emotional intelligence, and personal development, crucial aspects that are often overlooked in traditional academic settings. In a world driven by rapid technological advancements and the relentless pursuit of success, it is essential to pause and reflect on the true purpose of education. While technical skills and managerial acumen undoubtedly play a pivotal role, they are only a fraction of the expansive mosaic that shapes a well-rounded individual. By delving into the realms of psychology, neuroscience, and timeless philosophical wisdom, we embark on a transformative journey that can enhance our understanding of ourselves and others, enriching our lives in unimaginable ways.

inner engineering program: Life and Death in One Breath Sadhguru, 2013-11-01 For ages, most of humanity has placed “life” and “death” at two ends of the existential spectrum – favoring one, fearing the other and continuously floundering between the two. Only when someone who has consciously traversed between both life and death offers to articulate some aspects of it, does humanity get a glimpse of what lies beyond the horizon of its normal perception. With his extraordinary insights, coming from a profound inner experience, Sadhguru reveals that life and death are, in fact, two sides of the same coin. It is only by embracing both that we can break the shackles of our self-made struggles and be set free. In his own words, he says: “Death is a cosmic joke. If you get the joke, when you fall on the other side, it will be wonderful. If you don’t get the joke, when you are here you fear the other side, and when the other side comes, you just don’t know what it is about. If death becomes a laughing matter in your life, life becomes an utterly effortless process – there is no need to restrain yourself in the process of life; you can live your life absolutely, totally.” “The distance between your life and death is just one breath, isn’t it?” – Sadhguru

inner engineering program: Consciousness Erwin Bratengeyer, Galactic Sage, 2024-06-06 This book was created in an experimental collaboration with the artificial intelligence (AI) ChatGPT-4. All texts were written by the AI, albeit under human editorial guidance. By specially adapting ChatGPT-4 to 'Galactic Sage,' the AI was enabled to research, reference, and correctly prepare topic-specific content in German. The thematic focus was on philosophical perspectives with an open-minded approach to the phenomenon of consciousness. I hope that this human-machine experiment, expanded into a book, provides useful insights, both in terms of the AI's writing competence and, of course, in relation to the topic itself.

inner engineering program: Of Mystics & Mistakes Sadhguru, 2012-01-01 "THERE ARE ONLY TWO TYPES OF PEOPLE: MYSTICS AND MISTAKES," says Sadhguru, leaving readers in no doubt of the category to which they belong! That sounds damning. But mistakes can thankfully be rectified. And that's the hope this book holds out to seekers. It reminds us that each one of us can make the journey—from confusion to clarity, from error to enlightenment, from self-deception to self-discovery—if only we choose.

inner engineering program: Place/No-Place in Urban Asian Religiosity Joanne Punzo Waghorne, 2016-07-15 This book discusses Asia's rapid pace of urbanization, with a particular focus on new spaces created by and for everyday religiosity. The essays in this volume – covering topics from the global metropolises of Singapore, Bangalore, Seoul, Beijing, and Hong Kong to the regional centers of Gwalior, Pune, Jaipur, and sites like Wudang Mountain – examine in detail the spaces created by new or changing religious organizations that range in scope from neighborhood-based to consciously global. The definition of "spatial aspects" includes direct place-making projects such as the construction of new religious buildings – temples, halls and other meeting sites, as well as less tangible religious endeavors such as the production of new "mental spaces" urged by spiritual leaders, or the shift from terra firma to the strangely concrete effervesce of cyberspace. With this in mind, it explores how distinct and blurred, and open and bounded communities generate and participate in diverse practices as they deliberately engage or disengage with physical landscapes/cityscapes. It highlights how through these religious organizations, changing class and gender configurations, ongoing political and economic transformations, continue as significant factors shaping and affecting Asian urban lives. In addition, the book goes further by exploring new and often bittersweet "improvements" like metro rail lines, new national highways, widespread internet access, that bulldoze – both literally and figuratively – religious places and force relocations and adjustments that are often innovative and unexpected. Furthermore, this volume explores personal experiences within the particularities of selected religious organizations and the ways that subjects interpret or actively construct urban spaces. The essays show, through ethnographically and historically grounded case studies, the variety of ways newly emerging religious communities or religious institutions understand, value, interact with, or strive to ignore extreme urbanization and rapidly changing built environments.

inner engineering program: Singapore, Spirituality, and the Space of the State Joanne Punzo Waghorne, 2020-03-19 This book examines spirituality in Singapore, showing how important the city state is for understanding contemporary global configurations of urban space, religion, and spirituality. Joanne Punzo Waghorne highlights how the formal religious spaces-temples, churches, and mosques-have been confined to allotted sites on the map of Singapore, whereas various "spiritual" organizations, particularly of Hindu origins and headed by a guru, still continue to operate as "societies" classified by the government with other "clubs." These unconventional

religiosities are not confined but ironically make their own places, meeting in ostensive secular venues: high-rise flats, malls, businesses, and community centers, thus existing in the overall space of religion, commerce, and the state. The book argues that State of Singapore also operates between the secular and the religious, constructing an overarching spatial regime that both accommodates and yet rivals the alternate spheres that spiritual movements construct under its umbrella. Both spatial configurations challenge the presumed relationships between myth and reality, religion and commerce, the ethereal and the concrete, the sacred and the secular, on the levels of self, community, and polity. Singapore, now deemed a model for urban development in Asia, also offers an understanding of a new post-secularity and perhaps reveals where the urbanized world is headed.
