miller levine biology answers: *Is Evolution Compatible with Christianity?* Christopher Gieschen, 2019-09-30 All of these statements are false: Christians are science-deniers when it comes to evolution. Real science actually lines up more with evolution than creation as found in Genesis. Fossils are evidence for evolution. The Genesis account is fully compatible with evolution. These questions need answers! What exactly is the difference between evolution right and evolution wrong? Is it possible to bend Genesis to fit evolution? How can one defend belief in a six-day creation from the onslaughts of the evolutionists? How about any questions you have? This book is a must for any Christian about to enter a public high school or university. Accepting evolution as true is the basis for three of the ten reasons Christians give up saving faith. It is time for you to arm yourself with the truth and stand your ground logically, philosophically, scientifically, and most important biblically! Ready? Let's go!

Also included are clear, fascinating explanations of how to think scientifically and grasp the tricky subject of probability. The Canon is a joyride through the major scientific disciplines that reignites our childhood delight and sense of wonder—and along the way, tells us what is actually happening when our ice cream melts or our coffee gets cold, what our liver cells do when we eat a caramel, why the horse is an example of evolution at work, and how we're all really made of stardust.

miller levine biology answers: A Biblical Case against Theistic Evolution Wayne Grudem, 2022-03-21 Leading Bible Scholars Explore Why the Theory of Theistic Evolution Conflicts with Christian Doctrine Even Christians strongly debate Scripture's account of creation, with some declaring that major events in the book of Genesis—from the origin of Adam and Eve to God's curse on the world—were purely symbolic. Several respected scholars endorse this theory, but is it consistent with the Bible's teaching? In A Biblical Case against Theistic Evolution, condensed and adapted from Theistic Evolution, Wayne Grudem and other leading scholars challenge the belief that Genesis is mostly symbolic, rather than a true, historical narrative. Grudem examines 12 specific events in Genesis 1–3 and explains why acknowledging their historicity is critical to understanding the rest of Scripture. He also emphasizes several foundational doctrines, including God's ongoing involvement in creation, the beginnings of mankind, and the origin of sin and death, to show readers how the theory of theistic evolution undermines essential truths throughout the Old and New Testaments. miller levine biology answers: Origins Science in U.S. K-12 Public Schools; Is it Education or Indoctrination? Mark Biedebach, 2020-12-23 A Biophysicist and Constitutional Lawyer Address a Profound Question. Is it OK for our public schools to teach only Atheistic answers to ultimate religious questions? Where do we come from and what is the nature of life? These are the two biggies implicitly addressed by U.S. K-12 origins science education. The answers form the foundation for the third: How should life be lived ethically and morally? The answers to the third will be significantly affected by how we answer the first two. The authors show that there are two evidence-based alternatives to the first two. We either come from unguided material causes without purpose or we come from material and intelligent causes for a purpose. The materialistic alternative provides the foundation for non-theistic religious answers to questions of ethics and morality, while the teleological alternative supports theistic answers. The problem is that modern origins science

uses a concealed materialistic orthodoxy that permits only Atheistic narratives about the origin of the Universe, of life and the diversity of life. Thus, when these materialistic/atheistic explanations are taught by our K-12 public schools, the impressionable kids are only given an atheistic narrative rather than an objective education about the evidence for and against both views. Calvert, the lawyer who switched from stock fraud to Constitutional law 20 years ago, explains how the law actually favors the objective rather than the materialistic method for origins science education. Atheism is just as religious as theism for First Amendment purposes. Accordingly, just as the schools cannot push a theistic prayer during the invocation at a high school graduation, neither can it adopt or implement an atheistic orthodoxy when teaching origins science. He also explains that objectivity is also required as the scientific method for the testing of historical narratives require consideration of all evidence-based alternatives. At the end, the Authors provide a set of ten suggestions for the development of objective standards and curricula for teaching origins science.
