mcgraw hill global studies textbook: The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran, Saudi Arabia, Egypt and elsewhere in the Arab and Muslim worlds are filled with anti-Western and anti-Israel propaganda. Most readers will be shocked to discover that history and geography textbooks widely used in America's elementary and secondary classrooms contain some of the very same inaccuracies about Jews, Judaism, and Israel. Did you know that there is no record of any important Jewish contribution to the sciences? (World Civilizations, Thomson Wadsworth). Or that Christianity was started by a young Palestinian named Jesus? (The World, Scott Foresman/Pearson). Supplemental materials and other classroom influences are even worse. The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel. The problems uncovered in this ground-breaking analysis are instructive, and illustrate the need for reform in the way textbooks are developed, written, marketed, and distributed. Substitute another area-how we teach American history, Western civilization, or comparative religion-and we have another, equally intriguing case study. The Trouble with Textbooks shows what can go terribly wrong in discussing religion, geography, culture, or history-and in this case-all of them. The Trouble with Textbooks tells a cautionary tale for all readers, whatever their background, of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life, instead disparage some groups and teach historical distortions. With millions of young people using these textbooks each year, the denigration of some should be a concern for all.

mcgraw hill global studies textbook: Securitization Revisited Michael J. Butler, 2019-07-23 This book seeks to interrogate how contemporary policy issues become 'securitized' and, furthermore, what the implications of this process are. A generation after the introduction of the concept of securitization to the security studies field, this book engages with how securitization and desecuritization 'works' within and across a wide range of security domains including terrorism and counter-terrorism, climate change, sexual and gender-based violence, inter-state and intra-state conflict, identity, and memory in various geographic and social contexts. Blending theory and application, the contributors to this volume - drawn from different disciplinary, ontological, and geographic 'spaces' - orient their investigations around three common analytical objectives: revealing deficiencies in and through application(s) of securitization; considering securitization through speech-acts and discourse as well as other mechanisms; and exposing latent orthodoxies embedded in securitization research. The volume demonstrates the dynamic and elastic quality of securitization and desecuritization as concepts that bear explanatory fruit when applied across a wide range of security issues, actors, and audiences. It also reveals the deficiencies in restricting securitization research to an overly narrow set of issues, actors, and mechanisms. This volume will

be of great interest to scholars of critical security studies, international security, and International Relations. Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

mcgraw hill global studies textbook: *A Global History of the Nuclear Arms Race* Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field, this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists, military chiefs, and political leaders. The first book of its kind to provide a global perspective of the arms race, this two-volume work connects episodes worldwide involving nuclear weapons in a comprehensive, narrative fashion. Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision, the authors focus on five basic themes: political dimensions, technological developments, military and diplomatic strategies, and impact. The history of the international nuclear arms race is examined within the context of four historical eras: America's nuclear monopoly, America's nuclear superiority, superpower parity, and the post-Cold War era. Information about the historical development of the independent deterrence of Britain, France, and China, as well as the piecemeal deterrence of newcomers Israel, India, Pakistan, and North Korea is also included, as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non-proliferation regime.
