mcdonalds manager training: Fast Food, Fast Talk Robin Leidner, 1993-08-04 Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting I feel happy! I feel terrific! Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

mcdonalds manager training: Corporate Vices Charles Cohen, 2002-12-30 Corporate Vices uncovers the real performance gap in modern corporations between good business practice that builds companies, and bad corporate habits that eventually bring them down. It builds a detailed picture of how wayward corporations often try too hard, think too little, and forget too much. And it offers a sharp contrast with companies, large and small, that are good businesses, and how they manage to stay that way. Looking behind the headlines of spectacular corporate disasters, such as Enron and Marconi, as well as corporations that are under pressure and going nowhere, Corporate Vices identifies the common theme of badly run companies, that they fail to realise, or just forget, the importance of business basics, such as productivity, as they explore ever more sophisticated and expensive ways of satisfying other more immediate, like keeping cash profits high to satisfy shareholders - even at the expense of productivity. Corporate Vices explores the complex roots and the story of how corporations have allowed themselves to turn business logic on its head with such ease. Corporate Vices puts an alternative way of running companies on the table in its many examples of good businesses. These are companies that manage to keep their eye on the ball, even at a price: not achieving corporate glory, turning down the latest technology, and opportunities to enter new markets. Most of all, Corporate Vices makes it clear how to spot the difference, and then to fix it. It asks the questions, which everyone stuck in a bad company can't seem to answer, like, * Where did we start to go wrong? * What does the CEO think he's doing? * Why can't anyone make a decision any more? * Whose idea was this merger?
