

michael swango sentence

michael swango sentence is a topic that draws significant interest due to the notorious background of Michael Swango, a former physician convicted of multiple murders. This article explores the details surrounding Michael Swango's criminal activities, legal proceedings, and the specific sentence he received. Understanding the context of his crimes and the judicial outcomes provides insight into the severity of his actions and the justice system's response. This article will cover the background of Michael Swango, the investigation that led to his arrest, the charges and trial, and the sentencing details. Additionally, it will discuss the broader implications of his case for medical ethics and criminal justice. Readers interested in true crime, legal outcomes, and medical malpractice will find this comprehensive overview informative and detailed.

- Background of Michael Swango
- Investigation and Arrest
- Charges and Trial
- Michael Swango Sentence Details
- Impact and Implications

Background of Michael Swango

Michael Swango was a licensed medical doctor who became infamous for his involvement in numerous suspicious patient deaths. His medical career was marked by a series of unexplained incidents, including patient fatalities and mysterious illnesses, which eventually raised concerns among medical colleagues and authorities. Swango's case is notable for the combination of his medical expertise and his criminal actions, making him one of the most notorious medical serial killers in U.S. history. His background includes medical training at reputable institutions, but his personal history also reveals troubling behavioral patterns. Understanding his background sheds light on how his professional role enabled him to commit his crimes undetected for an extended period.

Early Medical Career

Swango began his medical training with promising prospects but soon encountered issues related to patient safety. During his internships and residencies, multiple patients under his care experienced unusual complications, which initially were attributed to medical errors or bad luck. However, the frequency and nature of these incidents eventually prompted investigations. Despite warning signs, Swango managed to continue working as a physician in various hospitals across the country.

Warning Signs and Behavioral Issues

Colleagues reported troubling behavior from Swango, including dishonesty and suspicious actions surrounding patient care. These red flags were often overlooked or inadequately addressed, allowing him to evade scrutiny for years. His troubling behavior extended beyond the hospital setting, contributing to an overall profile of a manipulative and dangerous individual.

Investigation and Arrest

The investigation into Michael Swango's activities was a complex and multi-jurisdictional effort that eventually uncovered the extent of his crimes. Hospitals and law enforcement agencies collaborated to piece together evidence linking him to multiple suspicious deaths and poisonings. The investigation was hampered by a lack of initial concrete evidence and Swango's ability to relocate and assume new positions in different medical facilities.

Initial Suspicion

The first formal suspicions arose when hospital administrators noticed patterns of patient deaths correlated with Swango's shifts. Internal reviews and audits raised concerns, but conclusive proof was difficult to obtain. These early suspicions led to increased monitoring and eventually formal investigations by authorities.

Apprehension and Evidence Collection

Authorities arrested Michael Swango after uncovering significant evidence, including forged documents, toxicology reports, and eyewitness accounts. The collection of this evidence was critical in building a prosecutable case against him. The investigation also revealed attempts by Swango to conceal his actions and evade detection.

Charges and Trial

Michael Swango faced multiple charges related to patient deaths and attempted poisonings. The charges reflected the severity and premeditated nature of his actions. His trial was closely followed by the public and media due to the unusual nature of a physician committing serial murders.

Legal Charges

Swango was charged with several counts of murder, attempted murder, and fraud. The murder charges specifically related to patients who died under suspicious circumstances while under his care. The attempted murder charges involved patients who survived poisoning or other harmful acts. Fraud charges stemmed from his falsification of medical credentials and employment documents.

Trial Proceedings

The trial included extensive testimonies from medical experts, law enforcement officials, and survivors. The prosecution presented a detailed timeline of Swango's actions, supported by forensic evidence. The defense attempted to challenge the credibility of the evidence and argue for diminished responsibility, but the overwhelming proof led to a conviction.

Michael Swango Sentence Details

The Michael Swango sentence was a culmination of the judicial process addressing the gravity of his crimes. Upon conviction, the court imposed a sentence reflecting both punitive and preventative considerations to protect the public from further harm. The sentence has been subject to analysis in discussions about justice for medical crimes.

Length and Terms of the Sentence

Michael Swango was sentenced to life imprisonment without the possibility of parole. This sentence ensured that he would remain incarcerated for the remainder of his life, effectively removing any chance of returning to medical practice or society. The life sentence was justified by the prosecution as proportionate to the number of victims and the malicious intent demonstrated throughout his criminal activities.

Additional Legal Consequences

Beyond imprisonment, Swango faced revocation of his medical license and additional legal penalties related to fraud and document forgery. These measures prevented any future attempts to practice medicine or engage in fraudulent activities. The sentence serves as a strong deterrent within the medical community against similar misconduct.

Summary of Michael Swango Sentence Components

- Life imprisonment without parole
- Revocation of medical license
- Additional penalties for fraud and forgery
- Restriction from future medical practice

Impact and Implications

The case of Michael Swango and the subsequent sentence had profound implications for medical ethics, hospital oversight, and criminal justice. It highlighted vulnerabilities in the medical system that allowed a dangerous individual to harm patients undetected for years. The sentencing also underscored the legal system's ability to address crimes committed by healthcare professionals.

Medical Community Reforms

Following the Swango case, hospitals and medical boards implemented stricter credential verification processes and monitoring of unusual patient outcomes. These reforms aimed to prevent similar cases by enhancing transparency and accountability within healthcare institutions.

Legal and Ethical Lessons

The Michael Swango sentence set a precedent for handling medical professionals who commit criminal acts. It emphasized the need for collaboration between medical institutions and law enforcement to ensure swift action when patient safety is at risk. Ethical training and reporting mechanisms were strengthened as a direct response to the case.

Frequently Asked Questions

What sentence did Michael Swango receive for his crimes?

Michael Swango was sentenced to life imprisonment without the possibility of parole.

Why was Michael Swango sentenced to life in prison?

michael swango sentence: *Bioterrorism and Biocrimes* W. Seth Carus, Center for Counterproliferation Research, 2002 During the past five years, the threat of bioterrorism has become a subject of widespread concern. Journalists, academics, and policy analysts have considered the subject, and in most cases found much to alarm them. Most significantly, it has captured the attention of policy makers at all levels of government in the United States. Unfortunately, bioterrorism remains a poorly understood subject. Many policymakers and policy analysts present apocalyptic visions of the threat, contending that it is only a matter of time before some terrorist uses biological agents to cause mass casualties. In contrast, other analysts argue that the empirical record provides no basis for concern, and thus largely dismiss the potential threat. Neither approach is helpful. Imagining catastrophic threats inevitably leads to a requirement for impossibly large response capabilities. In contrast, denying the potential danger altogether leads to

the kind of tunnel vision that led U.S. intelligence officials to totally ignore the emergence of Aum Shinrikyo in Japan, despite its overtly hostile attitude towards the United States. This study takes an intermediate course. It provides empirical evidence to support the views of those who argue that biological agents are difficult to use. It also provides abundant evidence that some people have desired to inflict mass casualties on innocent populations through employment of biological agents. Fortunately, these accounts also suggest that such people lacked the capability to follow through with their plans. The research also casts considerable doubt on our ability to predict which biological agents a perpetrator might employ. While some analysts assume that terrorists will use those agents that proved of most interest to state weapons programs, bioterrorists and biocriminals have acquired and used agents of little or no value as weapons of war.

michael swango sentence: The Elements of Murder John Emsley, 2006-07-13 This book is about elements that kill. Mercury, arsenic, antimony, lead, and thallium can be lethal, as many a poisoner knew too well. Emsley explores the gruesome history of these elements and those who have succumbed to them in a fascinating narrative that weaves together stories of true crime, enduring historical mysteries, tragic accidents, and the science behind it all. The colourful cast includes ancient alchemists, kings, leaders, a pope, several great musicians, and a motley crew of murderers. Among the intriguing accounts is that of the 17th century poet Sir Thomas Overbury, who survived four attempts to poison him with mercury but died when given the poison in enema form - under whose direction remains uncertain. Here, too, is detailed the celebrated case of Florence Maybrick, convicted of poisoning her violent husband James with arsenic, but widely believed at the time to be innocent. The question of her guilt is still disputed. Threaded through the book alongside the history is the growing understanding of chemistry, and the effects of different chemical substances on the human body. Thousands suffered the ill effects of poisonous vapours from mercury, lead, and arsenic before the dangers were realized. Hatters went mad because of mercury poisoning, and hundreds of young girls working in factories manufacturing wallpaper in the 19th century were poisoned by the arsenic-based green pigments used for the leaves of the popular floral designs. Even in the middle of the 20th century, accidental mercury poisoning caused many deaths in Minamata Bay, while leaded petrol poisoned the whole planet, and arsenic still continues to poison millions in Asia. Through vividly told stories of innocent blunders, industrial accidents, poisoners of various hues - cold, cunning, desperate - and deaths that remain a mystery, Emsley here uncovers the dark side of the Periodic Table.

michael swango sentence: The Will To Kill James Alan Fox, Jack Levin, Kenna Quinet, 2018-03-22 Written in an engaging manner that challenges critical thinking throughout, the text is very readable and balances providing facts grounded in research with case examples. —Minna Cirino, Shenandoah University Now with SAGE Publishing, *The Will to Kill: Making Sense of Senseless Murder* explores extraordinary and seemingly inexplicable cases of homicide—not to sensationalize them—but to educate students about these crimes. Authored by renowned experts, the Fifth Edition places recent crimes in context by reviewing current homicide laws, introducing the latest theories that seek to explain murder, and presenting up-to-date statistical data that identify homicide patterns and trends. Students develop a foundational understanding of a variety of topics, for example, domestic and workplace homicide, cult and hate killings, murders committed by juveniles, and serial slayings. Students also examine various criminal justice responses to homicide, including the strategies and tactics employed to apprehend, prosecute, and punish killers. New to the Fifth Edition Up-to-date research and data offers students the latest statistics on homicide patterns and trends in recent years. New illustrative cases cover various forms of homicide, focusing on crimes that drew significant interest from the public and policymakers alike and provide students with unique insights into violent behavior. Updated coverage of recent controversies, legislative changes, and Supreme Court decisions includes heightened concern over mass shootings,

hate-motivated homicide and terrorism; new laws, shifting policies, and Supreme Court rulings pertaining to gun rights, juvenile offenders and the death penalty; and advances in surveillance technology, computer-aided investigation, and DNA forensic testing. Early introduction of theories helps students to understand the definition of homicide/homicide laws before developing a theoretical framework to explain violence.

michael swango sentence: Stone Cold Souls Gregory K. Moffatt, 2008-07-30 History's most notorious and brutal killers still enjoy fame as public fascination with their lives and their crimes continues to grow. *Stone Cold Souls* is a detailed examination of the most brutal killers in history. Moffatt does what he does best by looking at historical accounts of events, analyzing them from a psychological perspective, and presenting his assessment in captivating fashion. He examines different types of killers, offers case studies and historical context, and describes what sets these cases apart from other kinds of killings. Even in a day and age where pop culture has made serial crime a mainstay of movies and books, the depravity of the killers profiled in this work will still shock even a desensitized reader. Men, women, and children alike have committed crimes so atrocious that it is hard to imagine that these events are not works of fiction. Moffatt examines the difficult questions that inevitably arise when one reads cases of unthinkable torture and cruelty. Why? Were these people simply evil or is it possible that, given other circumstances, they could have redirected their energies into more productive outlets? The author answers these questions and others and reveals the lives and crimes of these ruthless killers. *Stone Cold Souls* features such well-known cases as: Andrei Chikatilo, Marc Dutroux, Herman Webster Mudgett, Charles Ng, Leonard Lake, Lawrence Bittaker, Roy Norris, Ed Gein, Edmund Kemper, Henry Lee Lucas, Gilles de Rais, Ivan the Terrible, Richard Ramirez, Holly Ann Harvey, Sandy Ketchum, Mary Bell, Jesse Pomeroy, Josef Mengele, Marshall Applewhite, Jeffrey Lundgren, David Koresh, Jim Jones, Father Oliver O'Grady, Charles Cullin, Harold Shipman, Michael Swango, Myra Hindley, Karla Homolka, Aileen Carol Lee Wuornos, Elizabeth Bathory, Charles Sobhraj, Albert Fish, Donald Harvey, and Dennis Rader.

michael swango sentence: Angels of Death Emily Webb, 2019-07-15 Serial killers in the caring professions. Doctors, nurses and health workers have a duty of care to their patients to ensure they act in the best interests of an individual; and not act or fail to act in a way that results in harm. But those featured within these pages are serial killers who roamed their places of work, preying on people at their most vulnerable. *Angels of Death* is an updated collection of real life crimes exploring murders committed in hospitals and doctors' surgeries - the very places where lives are supposed to be healed or saved. The accounts also include cases where the murderers struck in places that are meant to be safe havens, like aged care homes and even people's living rooms. These disturbing crimes take place in Australia, the United Kingdom, the USA, Canada and Europe. Emily Webb is a journalist and author, specialising in true crime. She co-hosts the popular podcast *Australian True Crime*.

michael swango sentence: Soul Eaters Goethe's *Raven* SkÃ¼l VenÃ¥s, 2019-08 This book paints a picture of how humanity is willing to kill and murder it's own people.

michael swango sentence: Blind Eye James B. Stewart, 2000-06-15 The author of *Den of Thieves* traces the path of Michael Swango--who seemed a model young doctor until his patients began dying in suspicious circumstances. The doctor is thought by the FBI to be the most successful serial killer in the nation's history. Second serial to New York Daily News.

michael swango sentence: The Serial Killer Next Door Richard Estep, 2023-01-31 How well do you know your neighbors? Maybe you should get to know them better! Growing up, we are taught that monsters are easy to identify, but the truth is very different. Too often, the serial murderer does not stand out. Otherwise, he, or she, would get caught. The contrast between the ordinary-seeming lives that provided cover for their cruel secrets is exposed in *The Serial Killer Next Door: The Double Lives of Notorious Murderers*. To their coworkers, neighbors, and others who knew them, they led unremarkable lives. They had careers as military pilots, police officers, landscapers, small business owners, farmers, realtors, reporters, authors, veterinary technicians, nurses, doctors, handymen,

painters, and chefs, while they simultaneously stalked city suburbs, college campuses, trailer parks, and red-light districts. This chilling book looks at the horrifying stories of nearly 30 malevolent killers (and hundreds of innocent victims) who were mistakenly trusted, including ... Genene Jones, a nurse responsible for the murder of 60 infants and children in her care. She's said to be the inspiration for Stephen King's iconic character of Annie Wilkes, in *Misery* – and her nephew broke into King's home, threatening to blow up the writer and his family because of it! Robert Lee Yates, a helicopter pilot in the Army National Guard who, when caught, buried one body outside his bedroom window as his wife slept. Gary Ridgway, also known as the Green River Killer, went undetected for 20 years, working for 30 years as a painter for a truck company and married for 17 years. Kathleen Folbigg, whose three children were at first thought to have died from natural causes. She only got caught when her husband found her personal diary. Joseph James DeAngelo, who worked various jobs, including as a police officer and a truck mechanic. He went on a decades-long crime spree and was finally caught with the help of DNA evidence. His case was instrumental in the establishment of California's DNA database. And dozens of other serial killers! It's chilling to realize that many serial killers have created second lives that are completely divorced from the brutality and evils they commit. It's incomprehensible to think that they are able to flip a switch, transforming them from apparently loving, ordinary men and women into torturous, homicidal slaughterers. With more than 120 photos and graphics, *The Serial Killer Next Door* is richly illustrated. Its helpful bibliography and extensive index add to its usefulness. We trust our neighbors, coworkers, and acquaintances. Of course, we do. It's ominous to think that we can't!

michael swango sentence: Killer Doctors Colin Evans, 2007-06-05 Doctors have at their disposal a number of devious ways to extinguish life—and just as many motives—should they desire. Some do. In *Killer Doctors*, the dark side of the men in white is revealed. So are the appalling crimes of those trusted healers. • Michael Swango, a.k.a. “Dr. Death,” one of history’s most notorious serial killers who may have killed at least 35 patients. • Charles Friedgood, whose shoddy surgeries and gruesome incompetence led to murder—and exposed the AMA’s “brotherhood of silence.” • The dim Bernard Finch, whose near-farcical plot to kill his wife revealed a murder so insanely ill-conceived and executed that it left jurors dumbfounded, amused, and deadlocked. • Plus even more shocking stories of grave malpractice, morbid bedside manners, and the chilling exploitations of a privileged profession.

michael swango sentence: Encyclopedia of Murder and Violent Crime Eric Hickey, Ph.D., 2003-07-22 Click ‘Additional Materials’ for downloadable samples As a good encyclopedia does, the *Encyclopedia of Murder and Violent Crime* brings together articles that offer diverse insights into the topic, while at the same time giving the reader a feel for its overall scope. --AGAINST THE GRAIN This carefully researched and excellently presented compendium will be a welcome addition to all libraries. --REFERENCE & USER SERVICES QUARTERLY Murder and violent crime take many forms. Who are the perpetrators? What do they have in common and how are they different? The *Encyclopedia of Murder and Violent Crime* presents the latest research, insightful commentary, and true crime case studies to help in the understanding and deterrence of one of society’s gravest problems. Although there is no easy or single answer to the question of why people kill or commit violent crimes, this important new reference work provides a wealth of information to create a background for cogent analysis. Written for a Wide Audience The *Encyclopedia of Murder and Violent Crime* is intended for a wide audience including school, public, and university libraries. It will also prove invaluable to those who report violent crime’s unfolding stories, such as mass media news outlets, television and radio stations, editorial offices of magazines, and newspapers. Criminal justice professionals will also find it valuable and fascinating balance of academic research and true crime material they can relate to in their own experience. Edited by the World’s Leading Authority on Multiple Homicide Offenders Eric W. Hickey, Ph.D., enjoys a worldwide reputation for his work with serial killers, sex crimes, workplace violence, stalking, and the Unabomber case. A professor of criminal psychology at California State University, Fresno and adjunct professor for Fresno City College and the California School of Professional Psychology, Dr. Hickey has published and lectured

extensively on the etiology of violence and serial crime. His book *Serial Murderers and Their Victims*, 2nd Edition is used as a primary text in colleges and universities and by law enforcement in the study of the nature of violence, criminal personalities and victim-offender relationships. Hickey's research is widely quoted and often is the subject of interviews in the media including National Public Radio, BBC, The Discovery and Learning Channels, Larry King Live, 20/20, and Court TV. He recently developed a cyber-stalking training course for the National District Attorney's Association and the American Prosecutor's Research Institute. His latest research, a study of 220 victims of stalking, examines the psychology and classification of stalkers, victim-offender relationships, intervention and deterrence strategies for potential offenders, and modes of victim assistance.

Contributions From Over 100 Experts in the Field The *Encyclopedia of Murder and Violent Crime* contains 200 entries covering long-documented classifications such as Serial Killers and Organized Crime to cutting edge topics of Cyber-Stalking, Kids Who Kill, and Terrorism. Leading educators, psychologists, sociologists, anthropologists, and criminal justice professionals share their experience and insights on everything from Aggression and Antisocial Personality Disorder to the infamous Zodiac Murders.

A Unique Compilation The *Encyclopedia of Murder and Violent Crime* explores the topic in great detail, looking at a multitude of issues from all angles--academic and professional research, theoretical background, and actual case studies. This combined approach provides a well-rounded overview with both theory and its historical evidence.

michael swango sentence: The Essential Guide to Medical Staff Reappointment Anne Roberts, 2008

michael swango sentence: Monsters Of Medicine William W. Colliflower, M.D., 2013-11-08 Medical training gave them the skills . . . Unfortunately evidence suggests that the medical profession is responsible for more serial killers than all other professions combined. Why is this so? *Monsters of medicine* chronicles the lives of five serial killer physicians in an effort to find a common thread in their lives. The author believes there is evidence to support that these doctors were all

pathologic narcissists. Childhood abuse was present in all their lives. Medical training gave them the skills and opportunities for their murderous and torturous conduct. We are all patients and it is appalling to find institutions and monitoring bodies place reputation and potential liability above weeding out misconduct, incompetence, and our welfare. The fact that two of these killers were actively practicing medicine into the waning days of the 20th century should alert us that this subject is much more than just of historical interest. Key questions of cause, prevention, detection, and treatment are explored. Absolute answers are difficult to expose, but one thing remains almost certain. There is likely another serial killer physician practicing medicine at this time somewhere in the world.

michael swango sentence: Wanted Undead Or Alive Jonathan Maberry, Janice Gable Bashman, 2010 An indispensable guide identifying and describing mankind's enemies: supernatural beasts, ghosts, vampires, serial killers, etc.-- and unearthing effective, time-proven responses to each horrific threat.

michael swango sentence: Medical Monsters Robert Keller, 2016-08-18 The lives and dreadful deeds of 20 horrific medical serial killers, including: Genene Jones: a truly monstrous paediatric nurse who murdered as many as 47 babies and children entrusted to her care. Glennon Engleman: a rather unconventional dentist who moonlighted as a hitman and murder-for-profit killer. Michael Swango: a deadly doctor who took genuine pleasure in poisoning his patients and colleagues. Killed at least 60 in an intercontinental murder spree. The Lainz Angels of Death: four lethal nurses who turned the geriatric ward at an Austrian hospital into their private killing field. Gwendolyn Graham & Cathy Wood: lesbian lovers who got their kicks by suffocating the elderly patients under their care. Teet Haerm: police pathologist who spent his nights hunting prostitutes in Stockholm, Sweden. Haerm actually performed autopsies on many of the women he'd killed. Orville Lynn Majors: an ICU nurse with a deep-seated hatred for his elderly patients, Majors is suspected of over 100 murders. Kimberly Saenz: addicted to prescription drugs and with her life falling apart around her, Saenz struck out at helpless patients, injecting them with bleach. Donald Harvey: dubbed the Angel of Death, Harvey killed at least seventy hospital patients by suffocation, poisoning, drug overdoses and other methods. Thomas Neill Cream: London's East End had barely recovered from Jack the Ripper when Dr. Cream arrived on the scene, dispensing agonizing death with his special little pills. Plus 10 more sensational true crime cases....Scroll up and grab a copy.

michael swango sentence: The Mammoth Book of Bizarre Crimes Robin Odell, 2010-03-25 You couldn't make it up: incredible real-life criminal cases A fascinating A-Z of murderous crimes which spans the globe and the centuries in uncovering the extremes of human criminality in all its strangeness. This collection of unusual, if not sensational, murder cases recalls strange crimes of the past and offers insights into particularly macabre and shocking modern murders. Many of the cases also shed light on advances in crime detection, law enforcement and forensic science. Cases include: Krystian Bala, the Polish writer who killed a rival, and then used the murder as the plot for a novel; Alexander Pichuskin, who was stopped one short of killing the 64 victims he needed to 'fill a chess board'; John Lee, 'the man they could not hang' who survived three attempts to execute him; and Adelaide Bartlett, who was accused of killing her husband with chloroform, but was acquitted because no one could work out how she had done it - and she wouldn't say.

michael swango sentence: Juvenile Sexual Homicide Wade C. Myers, 2002 Sexual homicide is murder committed in tandem with either an overt sexual assault or sexually symbolic behavior. This type of murder carried out by youths is one of the rarest and most poorly understood crimes. How can young people carry out such horrific crimes? Do the offenders have anything in common? Do they show any warning signs? This book highlights groundbreaking research that begins to find the answers to these questions. Juvenile Sexual Homicide is the first book to take a comprehensive look at this specific type of crime and attempt to understand the young criminals involved. It is based on a 10-year study that evaluates a sample of juvenile sexual murderers and provides a revealing look at the psychopathology, personality, criminal, and behavioral characteristics of their offenses. Roger Blashfield, Mark Safarik, and Linda Monaco are contributing authors. Part I reviews the origins and

framework of the research sample and provides a comprehensive overview of sexual homicide. Part II delves deeply into the criminal aspects of the sample study in relation to various mental disorders. Personal findings and psychopathy of the offenders are revealed in addition to the investigation into the role of anger in the crimes. Part III presents a more in-depth look at special issues and circumstances surrounding the juveniles and their crimes. The first in-depth study of juvenile sexual murderers A revealing look at the interaction between mental illness, personality function and crime characteristics

michael swango sentence: *Behind the Murder Curtain* Bruce Sackman, Michael Vecchione, Jerry Schmetterer, 2018-09-18 Behind the Murder Curtain is the true story of Bruce Sackman, Special Agent in Charge of the Department of Veterans Affairs Office of Inspector General. Sackman's main responsibilities had been investigating white-collar crimes such as embezzlement when he is drawn into the macabre world of doctors and nurses who murder their patients. Sackman evolves from an investigator of routine cases to the world's leading expert on Medical Serial Killers—MSKs—doctors and nurses who ply their evil trade hidden behind the privacy curtain at a patient's bedside. Behind the Murder Curtain tells how this dedicated investigator brought down four MSKs in Veterans Hospitals while developing the RED FLAGS PROTOCOL, which is now taught to investigators and forensic nurses throughout the world as a tool for stopping an MSK.
