

nature communications submission

nature communications submission is a critical process for researchers aiming to publish their scientific findings in one of the most reputable open-access journals. This article provides a comprehensive guide to navigating the submission process, highlighting essential requirements, manuscript preparation tips, and peer review stages. Understanding the intricacies of the nature communications submission workflow can significantly increase the chances of acceptance and ensure compliance with editorial standards. Additionally, insights into ethical considerations, formatting guidelines, and common pitfalls are discussed to assist authors in producing high-quality manuscripts. The following sections will cover everything from initial manuscript preparation to post-submission procedures, offering a valuable resource for prospective authors.

- Understanding Nature Communications
- Manuscript Preparation
- Submission Process
- Peer Review and Editorial Decisions
- Ethical Guidelines and Compliance
- Post-Acceptance Procedures

Understanding Nature Communications

Nature Communications is a multidisciplinary, open-access journal that publishes high-quality research across the natural sciences. It is well-regarded for its rigorous peer review process and broad readership, making it a coveted venue for scientists worldwide. Knowing the journal's scope and editorial standards is crucial before initiating a nature communications submission. The journal covers topics ranging from biology, physics, and chemistry to earth sciences and interdisciplinary studies. Authors should ensure their research aligns with the journal's focus on significant advances in the field and broad scientific interest.

Scope and Subject Areas

The journal accepts original research articles that contribute new knowledge or understanding in various scientific disciplines. Articles that demonstrate novelty, scientific rigor, and impact are favored. Nature Communications encourages submissions that include multidisciplinary approaches, novel methodologies, or findings that challenge

existing paradigms. Authors should review the journal's scope carefully to confirm their manuscript fits within the accepted fields.

Open Access and Licensing

As an open-access journal, Nature Communications makes all published articles freely available to readers worldwide. Upon acceptance, authors agree to publish their work under a Creative Commons license, typically CC BY, allowing others to share and adapt the content with appropriate attribution. Understanding this aspect is important for authors considering the implications for dissemination and reuse of their work.

Manuscript Preparation

Proper manuscript preparation is fundamental to a successful nature communications submission. The journal provides detailed guidelines to ensure consistency and quality across published articles. Careful attention to formatting, structure, and content presentation can facilitate the editorial assessment and peer review process.

Formatting Guidelines

Manuscripts should be prepared following the journal's formatting rules, which include specifications for font size, line spacing, margin widths, and referencing style. Authors must submit files in acceptable formats, typically Microsoft Word or LaTeX. Figures and tables should be clear, well-labeled, and placed appropriately within the manuscript or submitted separately as high-resolution files.

Manuscript Structure

A standard manuscript for Nature Communications includes several key sections: Title, Abstract, Introduction, Results, Discussion, Methods, References, Acknowledgments, and Supplementary Information if applicable. The abstract should succinctly summarize the main findings and significance. The introduction sets the context and rationale for the study, while results and discussion detail the experimental data and their interpretation. The methods section provides sufficient detail to allow replication.

Data Availability and Supplementary Material

Nature Communications requires authors to provide a data availability statement indicating where and how data supporting the findings can be accessed. Supplementary

materials, such as additional figures, tables, or datasets, can be submitted to complement the main manuscript. Proper preparation and clear labeling of these materials are essential to enhance transparency and reproducibility.

Submission Process

The nature communications submission process is conducted through an online manuscript submission system designed to streamline handling and communication. Familiarity with the platform and submission requirements helps avoid delays and errors.

Creating an Account and Initial Submission

Authors must create an account on the submission portal to initiate the process. The system guides users through step-by-step instructions for uploading manuscript files, entering author information, suggesting reviewers, and confirming compliance with ethical standards. It is important to carefully review all uploaded documents before final submission.

Cover Letter and Author Information

A well-crafted cover letter accompanies the manuscript and highlights the significance of the research and its suitability for Nature Communications. The letter should briefly summarize the main findings and explain why the work merits publication in the journal. Accurate and complete author details, including affiliations and corresponding author contact information, must be provided.

Suggesting Reviewers

Authors are often invited to suggest potential reviewers who possess relevant expertise. These suggestions can expedite the peer review process by identifying qualified individuals. However, the editorial team retains full discretion in selecting reviewers and may choose independent experts to ensure impartiality.

Peer Review and Editorial Decisions

After submission, manuscripts undergo initial editorial screening followed by peer review. Understanding the review stages and decision outcomes helps authors anticipate timelines and prepare for possible revision requests.

Initial Editorial Assessment

The editorial team evaluates the manuscript's scope, novelty, and adherence to submission guidelines. Manuscripts that do not meet basic criteria may be rejected without external review. Those passing the initial check proceed to peer review.

Peer Review Process

Typically, two to three independent experts assess the manuscript's scientific validity, originality, and clarity. Reviewers provide detailed comments and recommendations, which the editors use to make decisions. This process can take several weeks, depending on reviewer availability and responsiveness.

Decision Outcomes

Possible editorial decisions include acceptance, acceptance with minor or major revisions, or rejection. Authors receive reviewer comments and are invited to submit a revised manuscript addressing the critiques. Clear, well-structured responses to reviewer comments can facilitate positive outcomes.

Ethical Guidelines and Compliance

Nature Communications maintains strict ethical standards to ensure the integrity of published research. Compliance with these guidelines is mandatory for successful nature communications submission.

Research Ethics and Consent

Authors must confirm that all research involving human participants or animals complies with relevant ethical regulations and has received appropriate institutional approval. Informed consent statements are required where applicable. Failure to provide ethical compliance information can result in rejection.

Plagiarism and Originality

The journal uses plagiarism detection software to verify originality. Manuscripts must represent original work not under consideration elsewhere. Proper citation of prior work and avoidance of duplicate publication are critical.

Conflict of Interest and Funding Disclosure

Authors are required to disclose any potential conflicts of interest and funding sources that supported the research. Transparency in these areas promotes trust and accountability in the scientific community.

Post-Acceptance Procedures

Once a manuscript is accepted, several steps follow to prepare the article for publication. Understanding these procedures helps authors comply with publisher requirements and expedite the release of their work.

Proofreading and Author Corrections

Authors receive page proofs for final review before publication. This is an opportunity to correct typographical errors and verify accuracy. Prompt and careful proofreading ensures a polished final article.

Publication and Dissemination

Accepted articles are published online under open access, with immediate availability to the global scientific community. Authors can promote their work through various channels to maximize visibility and impact.

Post-Publication Updates

In cases of errors or additional data, authors may submit corrections or supplementary information post-publication. Nature Communications supports maintaining the scientific record's accuracy through these mechanisms.

Checklist for a Successful Nature Communications Submission

- Confirm manuscript aligns with journal scope and standards.
- Prepare manuscript according to formatting and structure guidelines.

- Include a clear, concise cover letter and complete author details.
- Provide data availability statements and supplementary materials as needed.
- Disclose conflicts of interest, funding sources, and ethical approvals.
- Suggest qualified, impartial reviewers if requested.
- Respond thoroughly to reviewer comments during revision.
- Review proofs carefully before final publication.

Frequently Asked Questions

What is the scope of Nature Communications for manuscript submission?

Nature Communications publishes high-quality research across all areas of the natural sciences, including biology, chemistry, physics, earth sciences, and interdisciplinary research.

How do I submit a manuscript to Nature Communications?

Manuscripts can be submitted online through the Nature Communications submission portal by creating an account and following the step-by-step submission process.

What are the formatting requirements for Nature Communications submissions?

Nature Communications requires manuscripts to be prepared according to their guidelines, which include structured abstracts, clear figures, references in a specified format, and adherence to word limits.

Is there an article processing charge (APC) for publishing in Nature Communications?

Yes, Nature Communications is an open access journal and charges an article processing fee upon acceptance to cover publication costs.

What is the average peer review timeline for Nature

Communications submissions?

The peer review process typically takes around 4 to 6 weeks, but this can vary depending on reviewer availability and the nature of the manuscript.

Can I suggest reviewers when submitting to Nature Communications?

Yes, authors are encouraged to suggest potential reviewers during submission, but the editorial team makes the final decision on reviewer selection.

Does Nature Communications allow preprint submissions before manuscript submission?

Yes, Nature Communications supports the posting of manuscripts on recognized preprint servers prior to submission and encourages authors to share their work early.

What types of articles can be submitted to Nature Communications?

Nature Communications accepts original research articles, reviews, and technical reports that present significant advances in their respective fields.

Additional Resources

1. Publishing in Nature Communications: A Comprehensive Guide

This book offers an in-depth walkthrough of the submission process specific to Nature Communications. It covers manuscript preparation, understanding editorial expectations, and tips for successful peer review. Researchers will find practical advice to enhance their chances of acceptance.

2. Scientific Writing for High-Impact Journals

Focusing on writing strategies tailored for journals like Nature Communications, this book helps authors craft clear, concise, and compelling manuscripts. It includes guidance on structuring papers, presenting data effectively, and avoiding common pitfalls in scientific writing.

3. Mastering the Peer Review Process

This text explains the peer review system and how authors can navigate it effectively. It provides insights into reviewer perspectives, addressing critiques, and revising manuscripts to meet journal standards, especially for multidisciplinary journals like Nature Communications.

4. Ethics in Scientific Publishing

A vital resource that discusses ethical considerations in research publication, including plagiarism, authorship, and data integrity. The book emphasizes maintaining transparency and honesty when submitting to prestigious journals such as Nature Communications.

5. *Data Visualization for Scientific Papers*

Effective communication of results often hinges on clear visuals. This book teaches best practices in creating figures and tables that comply with Nature Communications' guidelines and enhance the impact of scientific findings.

6. *Open Access Publishing and Its Impact*

As Nature Communications is an open access journal, this book explores the benefits and challenges of open access publishing. It provides an overview of funding models, copyright issues, and how open access influences research dissemination.

7. *Crafting a Compelling Cover Letter for Journal Submission*

A focused guide on writing persuasive cover letters aimed at journal editors. It includes examples and tips on highlighting the significance of your work to capture the attention of editors at Nature Communications.

8. *Interdisciplinary Research and Publication Strategies*

Nature Communications often publishes cross-disciplinary studies. This book helps authors effectively present interdisciplinary research, bridging gaps between fields and appealing to a broad scientific audience.

9. *Responding to Reviewers: Strategies for Success*

This practical guide provides techniques for addressing reviewer comments constructively and professionally. It emphasizes communication skills that help authors maintain positive interactions with editors and reviewers during the revision process.

nature communications submission: Preparation and Submission of Budget Estimates

United States. Office of Management and Budget, 1989

nature communications submission: TEXT BOOK OF RESEARCH METHODOLOGY Prof.

(Dr.) Mukesh Chandra Sharma , Dr. Prashant Vishnu Ajmire, Dr. Manoj Kumar Katual, Vandana Bhatia, Dr Swati Rana, 2025-01-10 Textbook of Research Methodology is an essential guide for students and researchers, providing a comprehensive understanding of research fundamentals. The book is systematically organized into nine chapters, covering the foundational aspects of research, including its meaning, objectives, and motivation, along with concepts like theory, empiricism, and the scientific method. Readers are introduced to the intricacies of problem identification and hypothesis formulation, with detailed explanations of null and alternative hypotheses, and the importance of hypothesis testing. The chapter on research design explores various types, such as exploratory, descriptive, and experimental designs, emphasizing their features and applications. Qualitative and quantitative research methodologies are thoroughly explained, highlighting key concepts like causality, generalization, and replication. The book also delves into measurement techniques, addressing challenges in validity, reliability, and different levels of measurement, such

as nominal, ordinal, interval, and ratio scales. Sampling techniques are extensively discussed, including probability sampling methods like simple random sampling, stratified sampling, and multi-stage sampling, with practical insights on determining sample size and addressing sampling errors. Data analysis is covered with a focus on univariate and bivariate methods, such as cross-tabulations and chi-square tests, aiding readers in hypothesis testing and statistical interpretation. The final chapters guide researchers on paper writing, ethical publishing practices, and the use of modern tools like reference management software, LaTeX, and plagiarism detection tools. This textbook serves as a valuable resource for understanding the research process, making it an indispensable companion for academic and professional pursuits.

nature communications submission: 23rd Annual Conference of the German Crystallographic Society, March 16-19, 2015, Göttingen, Germany , 2015-04-28 Zeitschrift für Kristallographie. Supplement Volume 35 presents the complete Abstracts of all contributions to the 23rd Annual Conference of the German Crystallographic Society in Göttingen (Germany) 2015: - Plenary Talks - Microsymposia - Poster Session Supplement Series of Zeitschrift für Kristallographie publishes Abstracts of international conferences on the interdisciplinary field of crystallography.

nature communications submission: **An Introduction to Metascience** Gabriel Bennett, Emma Goodall, 2024-09-13 An Introduction to Metascience delves into core metascientific concepts, offering a critical examination of current knowledge creation processes and scrutinising researchers and their methodologies across disciplines. This book stands alone as a comprehensive guide to metascience, offering readers a singular resource for understanding and implementing metascientific principles into their research practices. Readers will find this book invaluable for perfecting their research skills and enhancing the quality of their academic work. It exposes the reader to the intricacies of research processes, prompting a reevaluation of preconceived notions and fostering a deeper understanding of the flaws and solutions inherent in knowledge creation. Furthermore, it offers thought-provoking insights into implementing strategies to enhance research productivity, and it elucidates both the benefits and pitfalls of incorporating artificial intelligence in research production. Designed for scientists and researchers seeking to gain insight into the scientific process, An Introduction to Metascience caters to those interested in understanding how research evolves over time. It appeals to individuals eager to explore methods, practices, and philosophies of science to refine their approach to knowledge creation.

nature communications submission: Global Governance and the International Law of the Sea Shani Friedman, 2024-07-12 This book conducts an examination of the international legal regime of the continental shelf through the lens of international relations (IR), with a primary focus on global governance theory. Presenting a new perspective within the field of IR and international law, the book offers new insights into the rules, principles, practices, and actors that establish and govern social interactions and the management of common affairs at the transnational level. The governance framework within the continental shelf can encompass a wider scope than legal laws alone, incorporating informal rules or potentially disregarding formal “black letter” rules that may not be effectively applied in practice. To exemplify how governance theory and other IR theories contribute to the analysis of the legal regime concerning the continental shelf, the book conducts an in-depth examination of three significant issues: (i) the demarcation and delimitation of the continental shelf, (ii) the rights and obligations of coastal States in the continental shelf, and (iii) procedural matters related to the continental shelf and international maritime adjudication. This book will be of interest to students and scholars in the field of the law of the sea, international law, global governance, and international relations.

nature communications submission: **Russia** Jean Radvanyi, Marlene Laruelle, 2023-07-27 Thirty years after the end of the Soviet Union, multiple ghosts haunt Russia, its elites, and its society, from concern over demographic and economic decline to worry about the country’s vulnerability to external intervention, reviving the old notion of Russia as a “besieged fortress.” Faced with both a West that emerged victorious from the Cold War and a shockingly dynamic China, Russia constantly questions its identity and the notion that its fate is to bridge East and West. This

book offers a comprehensive overview of Russia's fears and challenges that could help the American public to understand how the country deals with its own issues and how this influences Russia's foreign policy, including the ongoing war in Ukraine. This is critical to understanding Russia's international stance and its impact on US policy and security.

nature communications submission: Genomic Intelligence Sheetanshu Gupta, Dhirendra Kumar, Radhika Negi, Ranjan Singh, Mohammad Javed Ansari, Shakuli Kashyap, Sudhir Mehrotra, 2024-12-06 The field of metagenomics has revolutionized our comprehension of microbial diversity and function across various habitats, from the human body to terrestrial and aquatic environments. Simultaneously, advancements in AI have empowered researchers to analyze vast troves of genomic data with unprecedented speed and precision, facilitating new insights into the complex interplay between microorganisms and their surroundings. The subject matter in this book provides an overview of metagenomics and discusses the combination of metagenomics and AI and its significant consequences for advancements in science. The chapters examine the approaches, difficulties, and revolutionary uses of AI in metagenomics and provide insight into the convergence of genomics, metagenomics, and AI's potential to revolutionize diverse fields from healthcare to environmental. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan or Bhutan)

nature communications submission: Library Scholarly Communication Programs Isaac Gilman, 2013-10-31 Libraries must negotiate a range of legal issues, policies and ethical guidelines when developing scholarly communication initiatives. Library Scholarly Communication Programs is a practical primer, covering these issues for institutional repository managers, library administrators, and other staff involved in library-based repository and publishing services. The title is composed of four parts. Part one describes the evolution of scholarly communication programs within academic libraries, part two explores institutional repositories and part three covers library publishing services. Part four concludes with strategies for creating an internal infrastructure, comprised of policy, best practices and education initiatives, which will support the legal and ethical practices discussed in the book. - Demonstrates the importance of creating a policy infrastructure for scholarly communication initiatives - Offers a novel combination of legal and ethical issues in a plain, approachable format - Provides samples of policy and contract language, as well as several case studies, to illustrate the concepts presented

nature communications submission: *The Union Theological Seminary in the City of New York* George Lewis Prentiss, 1899

nature communications submission: Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for Fiscal Year 1992 United States. Congress. Senate. Committee on Appropriations. Subcommittee on Commerce, Justice, State, the Judiciary, and Related Agencies, 1991

nature communications submission: *Encyclopedia of Human Rights* Edward H. Lawson, 1996 Preface to the first edition

nature communications submission: Making Peoples Heard Asbjørn Eide, Jakob Th. Möller, Ineta Ziemele, 2011-06-22 A leading theme in this impressive collection of essays in honour of Professor Gudmundur Alfredsson is the advancement of international rules and mechanisms to empower individuals, groups and peoples everywhere to pursue their rights nationally, regionally and internationally. The book deals with the many areas of international law and national policies and practices in which important progress has been made since the adoption of the Universal Declaration of Human Rights for better protection of human rights in the modern world. It equally provides a critical discussion of the difficulties and failures in various areas and probes questions and issues that are pending solution at the national, regional or universal levels. The book begins with the examination by several authors from their different perspectives (general international law, international human rights law and humanitarian law) of the existence and meaning of the right to peace. Subsequent chapters examine in detail the standard setting, monitoring and other ways of ensuring compliance by States and international organizations with the applicable human rights rules. A special chapter is devoted to the rights of indigenous peoples and minorities, an issue of

particular interest and concern to Gudmundur Alfredsson. The contributors are academics or practitioners in the field of international law and human rights, nearly all of whom having in their own work been closely associated with Professor Alfredsson's various projects aimed at the promotion and protection of human rights. This is a remarkable book, written by insiders for one of the most prominent players in the international human rights system, particularly at the UN level. It can serve as a genuine commentary on many of the most burning issues within that system, ranging from the performance of the UN Human Rights Council and the situation of UNmikistan (Kosovo) to the latest developments of the law on minorities and indigenous peoples, both at the global and regional level. H.E. Judge Bruno Simma, International Court of Justice.

nature communications submission: *Directory of Federal Court Guidelines* In-house: MR, 1996-01-01 The *Directory of Federal Court Guidelines* outlines the requirements of over 600 federal judges in detailed form along with the procedures they mandate on such essential matters as discovery, scheduling conferences, alternative dispute resolution, voir dire, marking of exhibits, and jury participation. This is critical inside information directly from the federal courts and judges compiled and published in cooperation with the American Bar Association's Section of Litigation. You will get every sitting judge's educational background, previous experience on the bench, with the government and in private practice, and honors and awards. Many judges have provided photographs and the names and telephone numbers of their secretaries and court clerks as well. Updated three times a year, *Directory of Federal Court Guidelines* will prove to be a vital research tool for preparing your case.

nature communications submission: *Applied Swarm Intelligence* Yaniv Altshuler, 2024-12-19 This book provides a comprehensive analysis of the tools and techniques used today for designing and modeling of efficient and robust swarm-intelligence based systems: highly (or fully) decentralized, semi-autonomous, highly-scalable infrastructures in various real-life scenarios. Among others, the book reviews the use of the swarm intelligence paradigm in financial investment, blockchain protocols design, shared transportation systems, communication networks, bioinformatics, and military applications. Theoretical and practical limitations of such systems, as well as trade-offs between the various economic and operational parameters of the systems, are discussed. The book is intended for researchers and engineers in the fields of swarm systems, economics, agriculture, nutrition, and operation research.

nature communications submission: Disruptive Technologies And Muslim Societies: From Ai And Education To Food And Fintech Shahid Jameel, David C Clary, 2025-03-07 This edited volume brings together leading experts to explore the impact of disruptive technologies across a spectrum of Islamic countries and Muslim societies. Spanning artificial intelligence, science and technology, health and education, food systems, and fintech, the seventeen chapters of this collection offer a diverse array of perspectives. Contributors to this volume from across the world — including Islamic countries such as Malaysia, Morocco, Pakistan, Qatar, Saudi Arabia, and Türkiye — provide in-depth analyses, revealing how disruptive technologies are transforming Muslim societies, and the subtle nuances shaping their impact. Together, the chapters show that these technologies tend to drive substantial change in Muslim societies, but the nature and extent of these shifts vary, sometimes mirroring developments in the West but often diverging due to distinct cultural and ethical contexts. An essential resource for scholars, policymakers, and practitioners, this book offers valuable insights into the evolving technological landscape of the Islamic World.

nature communications submission: *The Science of Science* Dashun Wang, Albert-László Barabási, 2021-03-25 This is the first comprehensive overview of the exciting field of the 'science of science'. With anecdotes and detailed, easy-to-follow explanations of the research, this book is accessible to all scientists, policy makers, and administrators with an interest in the wider scientific enterprise.

nature communications submission: Community Climate Justice and Sustainable Development Roy, Parimal Kumar, Hamidi, Mashitah Binti, Wahab, Haris Abd, 2025-03-26 Climate justice is a crucial issue, particularly for Indigenous communities that are disproportionately

affected by environmental changes despite contributing the least to global emissions. Achieving sustainability and social justice requires an inclusive approach that considers diverse policies, cultural perspectives, and methodological interventions. As globalization deepens interconnectivity, addressing climate justice through equitable policies, climate finance, and community-driven solutions becomes essential for ensuring a just and sustainable future. Examining both policy gaps and actionable solutions can help create frameworks that protect vulnerable populations while advancing global sustainability goals. Community Climate Justice and Sustainable Development explores the intersection of climate justice, Indigenous rights, and sustainable development, highlighting the policies and actions needed to achieve social and environmental equity. By analyzing case studies, policy frameworks, and financial mechanisms, it provides a comprehensive discussion on bridging the gap between climate commitments and real-world impact. Covering topics such as climate migrants, tribal rights, and indigenous knowledge, this book is an excellent resource for social justice advocates, environmentalists, policymakers, professionals, researcher, scholars, academicians, and more.

nature communications submission: Balancing Greenhouse Gas Budgets Benjamin Poulter, Joseph Canadell, Daniel Hayes, Rona Thompson, 2022-05-09 Balancing Greenhouse Gas Budgets: Accounting for Natural and Anthropogenic Flows of CO₂ and other Trace Gases provides a synthesis of greenhouse gas budgeting activities across the world. Organized in four sections, including background, methods, case studies and opportunities, it is an interdisciplinary book covering both science and policy. All environments are covered, from terrestrial to ocean, along with atmospheric processes using models, inventories and observations to give a complete overview of greenhouse gas accounting. Perspectives presented give readers the tools necessary to understand budget activities, think critically, and use the framework to carry out initiatives. Written by a combination of experts across career stages, presenting an integrated perspective for graduate students and professionals alike Includes sections authored by those involved in both early and later IPCC assessments Provides an interdisciplinary resource that spans many topics and methodologies in oceanic, land and atmospheric processes

nature communications submission: Biotech Solutions in Aquaculture and Fisheries Yashwant Choudhury, 2025-02-20 Immerse yourself in the revolutionary world of Biotech Solutions in Aquaculture and Fisheries. This comprehensive guide explores the synergy between aquaculture, fisheries, and biotechnology, offering a transformative perspective on the sustainable future of aquatic ecosystems. From foundational concepts to genetic enhancement and disease management, this book provides a holistic view of how biotechnology is reshaping practices in aquaculture and fisheries. Discover the science behind formulated feeds, nutrient optimization, and futuristic nutrigenomics, along with sustainable practices, water quality management, and bioremediation strategies. Dive into artificial reproduction techniques, hormonal manipulation, and cryopreservation, and get insights into emerging technologies like IoT, robotics, automation, and biomedical applications in fisheries research. Reflect on the socioeconomic impacts, ethical considerations, and the importance of community engagement in responsible aquaculture. This book is an essential resource for anyone interested in the innovative intersections of biotechnology and aquatic science, aimed at fostering a sustainable future for our water-based resources.

nature communications submission: As Gods Matthew Cobb, 2022-11-15 The thrilling and terrifying history of genetic engineering In 2018, scientists manipulated the DNA of human babies for the first time. As biologist and historian Matthew Cobb shows in *As Gods*, this achievement was one many scientists have feared from the start of the genetic age. Four times in the last fifty years, geneticists, frightened by their own technology, have called a temporary halt to their experiments. They ought to be frightened: Now we have powers that can target the extinction of pests, change our own genes, or create dangerous new versions of diseases in an attempt to prevent future pandemics. Both awe-inspiring and chilling, *As Gods* traces the history of genetic engineering, showing that this revolutionary technology is far too important to be left to the scientists. They have the power to change life itself, but should we trust them to keep their ingenuity from producing a hellish reality?
