next edition: Data-Driven Business Decisions Chris J. Lloyd, 2011-10-25 A hands-on guide to the use of quantitative methods and software for making successful business decisions The appropriate use of quantitative methods lies at the core of successful decisions made by managers, researchers, and students in the field of business. Providing a framework for the development of sound judgment and the ability to utilize quantitative and qualitative approaches, Data Driven Business Decisions introduces readers to the important role that data plays in understanding business outcomes, addressing four general areas that managers need to know about: data handling and Microsoft Excel, uncertainty, the relationship between inputs and outputs, and complex decisions with trade-offs and uncertainty. Grounded in the author's own classroom approach to business statistics, the book reveals how to use data to understand the drivers of business outcomes, which in turn allows for data-driven business decisions. A basic, non-mathematical foundation in statistics is provided, outlining for readers the tools needed to link data with business decisions; account for uncertainty in the actions of others and in patterns revealed by data; handle data in Excel; translate their analysis into simple business terms; and present results in simple tables and charts. The author discusses key data analytic frameworks, such as decision trees and multiple regression, and also explores additional topics, including: Use of the Excel® functions Solver and Goal Seek Partial correlation and auto-correlation Interactions and proportional variation in regression models Seasonal adjustment and what it reveals Basic portfolio theory as an introduction to correlations Chapters are introduced with case studies that integrate simple ideas into the larger business context, and are followed by further details, raw data, and motivating insights. Algebraic notation is used only when necessary, and throughout the book, the author utilizes real-world examples from diverse areas such as market surveys, finance, economics, and business ethics. Excel® add-ins StatproGo and TreePlan are showcased to demonstrate execution of the techniques, and a related website features extensive programming instructions as well as insights, data sets, and solutions to problems included in the material. Data Driven Business Decisions is an excellent book for MBA quantitative analysis courses or undergraduate general statistics courses. It also serves as a valuable reference for practicing MBAs and practitioners in the fields of statistics, business, and finance.

next edition: A Declaration of Christian Truth Randy Gingrich, 2022-11-21 Truth *

Repentance * Glory * Revival This book takes the reader on an adventure of intriguing theological thought as it explores over fifty topics relevant to the Christian life. The author's teaching is to the point, yet comprehensive enough to answer a range of questions as it articulates the truth of God's Word. The value of understanding the Bible blossoms in the beauty of God's glory as the wisdom of the Lord applies his truth to our everyday life. A much-needed systematic theology is established as doctrine is taught with originality in the power of the Holy Spirit with dynamic revelation. It builds solid truth in a structural style and should resonate with any believer as prophetic, personal, and inspirational. Theologically, it is equivalent to a four-year Bible College. Biblical truth is taught to equip the Christian and minister with significant knowledge and wisdom on over fifty topics. Many false beliefs and misconceptions are dealt with while God's Word is taught in clarity. The book shares breakthrough insight on many subjects of the Bible that are hard to understand. Also, there is significant teaching on the born-again experience, the constitution of the Christian or who we are in Christ, the baptism with the Holy Spirit, authentic worship, and much more! This is a textbook for the Christian life. Many will see it as a great source of sermons, curriculum, and position papers. The titles of the forty-four chapters should strike the interest of any God-fearing truth-loving Christian. You will not be disappointed as the Holy Spirit articulates God's will, sorts out ideas, clears away confusion, and builds solid beliefs and practice! You will see a consistency of relationship. The Bible

is a unified masterpiece of truth; it's all related. Most chapters start fresh with new topics and developing themes. There are studious sections that dig deep for the purpose of benefiting everyone with greater appreciation and knowledge of God's Word while attempting to satisfy the Bible College graduate. There is much teaching today that has obscured the true meaning and application of Scripture, placed a veil over the heart of believers, and deprived Christians of its complete relevant impact upon them. Therefore, it was necessary to write a book which establishes a systematic theology based upon the full counsel of God (Acts 20:27) without imposing agendas nor being controlled by any religious group.
