philipp von bernstorff actor: The Actors of Postnational Rule-Making Elaine Fahey, 2015-07-16 Despite its centrality to academic discussions of power and influence, there is little consensus in legal scholarship over what constitutes an actor in rule-making. This book explores the range of actors involved in rule-making within European Union law and Public International law, and focuses especially on actors that are often overlooked by formative and doctrinal approaches. Drawing together contributions from many scholars in various fields the book examines such issues as the accommodation of new actors in the process of postnational rule-making, the visibility or

covertness of actors within the process, and the role of social acceptance and legitimacy in postnational rule-making. In its endeavour to render and examine the work and effect of actors often side-lined in the study of postnational rule-making, this book will be of great use and interest to students and scholars of EU law, international law and socio-legal studies.

philipp von bernstorff actor: The Battle for International Law Jochen von Bernstorff, Philipp Dann, 2019-10-22 This volume provides the first comprehensive analysis of international legal debates between 1955 and 1975 related to the formal decolonization process. It is during this era, couched between classic European imperialism and a new form of US-led Western hegemony, that fundamental legal debates took place over a new international legal order for a decolonised world. The book argues that this era presents in essence a battle, a battle that was fought out in particular over the premises and principles of international law by diplomats, lawyers, and scholars. In a moment of relative weakness of European powers, 'newly independent states' and international lawyers from the South fundamentally challenged traditional Western perceptions of international legal structures engaging in fundamental controversies over a new international law. The legal outcomes of this battle have shaped the world we live in today. Contributions from a global set of authors cover contemporary debates on concepts central to the time, such as self-determination, sources and concessions, non-intervention, wars of national liberation, multinational corporations, and the law of the sea. They also discuss influential institutions, such as the United Nations, International Court of Justice, and World Bank. The volume also incorporates contemporary regional approaches to international law in the 'decolonization era' and portraits of important scholars from the Global South.

philipp von bernstorff actor: Self-Determination as Voice Natalie Jones, 2024-01-18 Self-Determination as Voice addresses the relationship between Indigenous peoples' participation in international governance and the law of self-determination. Many states and international organizations have put in place institutional mechanisms for the express purpose of including Indigenous representatives in international policy-making and decision-making processes, as well as in the negotiation and drafting of international legal instruments. Indigenous peoples' rights have a higher profile in the UN system than ever before. This book argues that the establishment and use of mechanisms and policies to enable a certain level of Indigenous peoples' participation in international governance has become a widespread practice, and perhaps even one that is accepted as law. In theory, the law of self-determination supports this move, and it is arguably emerging as a rule of customary international law. However, ultimately the achievement of the ideal of full and effective participation, in a manner that would fulfil Indigenous peoples' right to self-determination, remains deferred.

philipp von bernstorff actor: Research Handbook on International Law and Cities Aust, Helmut P., Nijman, Janne E., Marcenko, Miha, 2021-08-27 This groundbreaking Research Handbook provides a comprehensive analysis and assessment of the impact of international law on cities. It sheds light on the growing global role of cities and makes the case for a renewed understanding of international law in the light of the urban turn.

philipp von bernstorff actor: The Conflict in Syria and the Failure of International Law to Protect People Globally Jeremy Julian Sarkin, 2021-11-28 This book explores, through the lens of the conflict in Syria, why international law and the United Nations have failed to halt conflict and massive human rights violations in many places around the world which has allowed tens of millions of people to be killed and hundreds of millions more to be harmed. The work presents a critical socio-legal analysis of the failures of international law and the United Nations (UN) to deal with mass atrocities and conflict. It argues that international law, in the way it is set up and operates, falls short in dealing with these issues in many respects. The argument is that international law is state-centred rather than victim-friendly, is, to some extent, outdated, is vague and often difficult to understand and, therefore, at times, hard to apply. While various accountability processes have

come to the fore recently, processes do not exist to assist individual victims while the conflict occurs or the abuses are being perpetrated. The book focuses on the problems of international law and the UN and, in the context of the many enforced disappearances and arbitrary detentions in Syria, why nothing has been done to deal with a rogue state that has regularly violated international law. It examines why the responsibility to protect (R2P) has not been applied and why it ought to be used, generally, and in Syria. It uses the Syrian context to evaluate the weaknesses of the system and why reform is needed. It examines the UN institutional mechanisms, the role they play and why a civilian protection system is needed. It examines what mechanism ought to be set up to deal with the possible one million people who have been disappeared and detained in Syria. The book will be a valuable resource for students, academics and policy-makers working in the areas of public international law, international human rights law, political science and peace and security studies.

philipp von bernstorff actor: *Reckoning with Empire: Self-Determination in International Law* Miriam Bak Mckenna, 2022-11-28 The book adopts a new approach to self-determination's international legal history, tracing the ways in which various actors have sought to reinvent self-determination in different juridical, political, and economic iterations to create the conditions for global transformation. The value of the book's approach lies not only in a more nuanced understanding of self-determination's legal history, but in excavating the multiple ways in which actors, particularly those from the Global South, have challenged the existing normative and legal structures which rendered them unequal under the European system of international law. Rethinking this process touches on issues that are relevant not only to debates about the enduring legacy of imperialism in our present, but also to contemporary discussions of the position self-determination has come to occupy in international law.

philipp von bernstorff actor: *International Law and History* Ignacio de la Rasilla, 2021-01-21 This interdisciplinary exploration of the modern historiography of international law invites a diverse assessment of the indissoluble unity of the old and the new in the most global of all legal disciplines. The study of the history of international law does not only serve a better understanding of how international law has evolved to become what it is and what it is not. Its histories, which rethink the past in the present, also influence our perception of contemporary matters in international law and our understandings of how they may potentially unfold. This multi-perspectival enquiry into the dominant modes of international legal history and its fundamental debates may also help students of both international law and history to identify the historical approaches that best suit their international legal-historical perspectives and best address their historical and legal research questions.

philipp von bernstorff actor: *History, Politics, Law* Annabel Brett, Megan Donaldson, Martti Koskeniemi, 2021-10-07 Historians of political thought and international lawyers have both expanded their interest in the formation of the present global order. History, Politics, Law is the first express encounter between the two disciplines, juxtaposing their perspectives on questions of method and substance. The essays throw light on their approaches to the role of politics and the political in the history of the world beyond the single polity. They discuss the contrast between practice and theory as well as the role of conceptual and contextual analyses in both fields. Specific

themes raised for both disciplines include statehood, empires and the role of international institutions, as well as the roles of economics, innovation and gender. The result is a vibrant cross-section of contrasts and parallels between the methods and practices of the two disciplines, demonstrating the many ways in which both can learn from each other.

philipp von bernstorff actor: Expert Laws of War Anton O. Petrov, 2020-06-26 Over recent decades, international humanitarian law has been shaped by the omnipresence of so-called expert manuals. Astute and engaging, this discerning book provides a comprehensive account of these black letter rules and commentaries produced by private expert groups and demonstrates why the general acceptance of these expert manuals is largely unjustified. The author innovatively links interdisciplinary insights to the needs of military lawyers in practice, showing the pitfalls of relying on private manuals as arguable restatements and interpretations of the law 'as it is'.

philipp von bernstorff actor: Non-Governmental Interests in International Regional Organizations Elisa Tino, 2018-03-20 International organizations are typically intergovernmental in nature and endowed with a bipolar institutional structure where organs of States are usually juxtaposed with the Secretariat. On these premises, in *Non-Governmental Interests in Regional Organizations: The Role of Parliamentary, Socio-Economic and Territorial Institutions* Elisa Tino aims at analysing the unexplored phenomenon of institutional multipolarism of regional organizations, namely the trend to establish institutions representing non-governmental interests. Particularly, illustrating their diffusion in various geographic areas, explaining rationales underlying their establishment and investigating their institutional aspects, Elisa Tino pinpoints the contribution of these institutions to the development of regional organizations both according to the functionalist approach and the constitutionalist one. Thus, she aims at providing food for thought in the study of international organizations.

philipp von bernstorff actor: **International Development Organizations and Fragile States** Marie von Engelhardt, 2017-12-14 This book addresses a conundrum for the international development community: The law of development cooperation poses major constraints on delivering aid where it is needed most. The existence of a state with an effective government is a basic condition for the transfer of aid, making development cooperation with 'fragile' nations particularly challenging. The author explores how international organizations like the World Bank have responded by adopting formal and informal rules to engage specifically with countries with weak or no governments. Von Engelhardt provides a critical analysis of the discourse on fragile states and how it has shaped the policy decision-making of international organizations. By demonstrating how perceptions of fragility can have significant consequences both in practice and in law, the work challenges conventional research that dismisses state fragility as a phenomenon beyond law. It also argues that the legal parameters for effective global policy play a crucial role, and offers a fresh approach to a topic that is central to international security and development.

philipp von bernstorff actor: **Reducing Armed Violence with NGO Governance** Rodney Bruce Hall, 2013-10-01 NGOs have proliferated in number and become increasingly influential players in world politics in the past three decades. From the 1970s, with the access of social movements and private NGOs to local and international institutions, NGOs have enjoyed an opening to bring impact global policy debates. Yet NGOs find themselves highly constrained in bringing their material and epistemic resources to bear in the security arena where their activities normally must be authorized by states, or international organizations acting with authority delegated from states. They also find their activities, particularly in the security arena come frequently under attack as lacking accountability or lacking legitimacy, as NGOs are self-appointed private actors, often representing only themselves, they are seen by many as self-appointed meddlers in transnational affairs, This book provides a comprehensive and accessible analysis whether, or the extent to which, NGOs can contribute as private actors to authoritative governance outcomes in the security realm,

and thereby help mitigate armed violence by plugging governance gaps in this arena that state actors, or international governmental organizations (IGOs) either neglect, or can better address with NGO assistance. This book examines the current and future issues surrounding this objective in four sections: (i) a practitioner's perspective of the potentials of conflict governance NGOs, (ii) global civil society and legitimation of conflict governance NGO activities, (iii) conflict governance NGOs as norm entrepreneurs and norm diffusion in global governance (iv) conflict governance NGOs in action.

philipp von bernstorff actor: Research Handbook on Global Administrative Law Sabino Cassese, 2016-02-27 This Handbook explores the main themes and topics of the emerging field of Global Administrative Law with contributions by leading scholars and experts from universities and organizations around the world. The variety of the subjects addressed and the internationality of the Handbook's perspectives make for a truly global and multi-dimensional view of the field. The book first examines the growth of global administrations, their interactions within global networks, the emergence of a global administrative process, and the development of the rule of law and democratic principles at a global level. It goes on to illustrate the relationship between global law and other legal orders, with particular attention to regional systems and national orders. The final section, devoted to the emergence of a global legal culture, brings the book full circle by identifying the growth of a global epistemic community. The Research Handbook on Global Administrative Law provides a contemporary overview of the nascent field in detailed yet accessible terms, making it a valuable book for university courses. Academics and scholars with an interest in international law, administrative law, public law, and comparative law will find value in this book, as well as legal professionals involved with international and supranational organizations and national civil servants dealing with supranational organizations.

philipp von bernstorff actor: Boundaries of State, Boundaries of Rights Tsvi Kahana, Anat Scolnicov, 2016-10-20 This collection of essays draws together innovative scholars to examine the relationship between two legal and political phenomena: the shrinking of the state as a monopoly of power in favour of the expansion of power over individuals in private hands, and the change in the nature of rights. The authors expertly discuss the implications of the changing boundaries of state power, the legal responses to this development, its application to human rights, and re-conceptualizations of public life as obligations are handed over to private hands. This innovative book deals with an important set of problems and offers a fresh perspective of different legal themes in an integrated fashion.

philipp von bernstorff actor: Armed Non-State Actors in International Humanitarian and Human Rights Law Dr Konstantinos Mastorodimos, 2016-01-28 The accountability of armed non-state actors is a neglected field of international law, overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy. Yet armed non-state actors are important players in the international arena and their activities have significant repercussions. This book focuses on their obligations and accountability when they do not function as state agents, regardless of the existence or extent of accountability of their individual members. The author claims that their distinct features lead to their classification into three different types: de facto entities, armed non-state actors in control of territory, and common article 3 armed non-state actors. The mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations. In both cases, the author argues that armed non-state actors should not be treated as entering international law and process exclusively through the state. The study concludes by focussing on their accountability in international humanitarian and human rights law and, more specifically, to the rules of attribution, remedies and reparations for violations of their primary obligations.
