our sexuality 14th edition questions: Christian Ethics in Secular Cultures Thomas K. Johnson, 2018-05-10 A central question in Christian ethics is the relationship between the moral principles we should follow within the Christian community and the ethics followed in the secular societies in which we live. Our dilemma is that we have received a revelation of God's moral will in the Bible and in creation which must shape the identity of believers over against unbelieving cultures, while our neighbors follow the ethics of other world views which concern us deeply. Remember the Holocaust, where the ethics of a secular ideology wreaked destruction in an entire society. How should we, as Christians whom God has called to a distinct identity, participate in the moral considerations that will shape our cultures and communicate some of our convictions in a way that brings moral light into our worlds? Johnson offers the insight gained by 20 years of teaching ethics in secular universities in Europe and North America. First he addresses questions of sex, marriage, and family; then questions of work and economics; and finally theological and philosophical foundations.

our sexuality 14th edition questions: *Essays in Medical Sociology* Renée Claire Fox, This outstanding collection of essays by Renee C. Fox encompasses almost thirty years of original, pioneering research in the sociology of medicine. Based on fieldwork in a variety of medical settings in the United States, Belgium, and Zaire, these ethnographic essays examine chronic and terminal illness, medical research, therapeutic innovation, medical education and socialization, and bio-ethics. Within this framework, three empirical cases have been singled out for special scrutiny--the process of becoming a physician, the development of the artificial kidney machine and organ transplantation, and the evolution of medical research in Belgium. Without ignoring social structural or psychodynamic factors, Dr. Fox has explored basic cultural phenomena and questions associated with health, illness, and medicine: values, beliefs, symbols, rites, and the nuances of language: ethical and existential dilemmas and dualities; and the complex interrelationships between medicine, science, religion, and magic. She draws systematically and imaginatively upon anthropological, psychological, historical, and biological insights and integrates observations and analyses from her own studies in American, Western European, and Central African societies. This second, augmented edition includes Professor Fox's more recent contributions to the expanding field of the sociology of medicine. They are The Evolution of Medical Uncertainty; The Human Condition of Health Professionals; Reflections on the Utah Artificial Heart Program; Is Religion Important in Belgium?; Medical Morality is Not Bioethics--Medical Ethics in China and the United States; and Medicine, Science and Technology. The work also includes a new introduction, Endings, Beginnings and Continuities. Now, anthropologists, sociologists, medical educators, scientists, researchers, and students can join her on her journeys into the field and share with her the priceless insights to be gained from the physicians, nurses, medical students, patients, and their families, who are working, living, and dying on the edge of what is known, scrutable, and remediable--on the edge of medical science.
