Covers all current AICPA content requirements for the Financial Accounting and Reporting section of the CPA Exam About the Publisher: In the late 90s, eLearning was still in its infancy and live, on site classes were just about the only option for CPA exam candidates to take a review course. In 1997 a team of CPA review course professors at the University of Texas at Austin (UT) partnered with a highly innovative group of software engineers who, together, envisioned a computer-based course that would enable candidates anywhere to pass at the high rates achieved by students in the UT classroom course. CPAexcel realizes that vision. Since 1998, candidates using CPAexcel have passed the CPA Exam at exceptionally high rates; in recent years at nearly twice the average rate for all candidates. This high pass rate results particularly from using CPAexcel's Bite-Sized Lessons, which increase motivation,

concentration, and learning rate. Most Bite-Sized Lessons can be mastered in about 30 minutes, e.g. on a lunch break, allowing busy professionals to use their time with maximum efficiency. CPAexcel's eBooks are structured this way. In addition to these and other learning advantages, Exam candidates using CPAexcel's complete courses are guaranteed free continuing access to all online course materials until they pass the CPA Exam. Today, CPAexcel is the leading online/offline CPA Exam preparation course, offering a proven pedagogy, excellent content, valuable services, and efficient use of state-of-the-art technology.
