oromo culture: Being and Becoming Oromo Paul Trevor William Baxter, Jan Hultin, Alessandro Triulzi, 1996 The Oromo people are one of the most numerous in Africa. Census data are not reliable but there are probably twenty million people whose first language is Oromo and who recognize themselves as Oromo. In the older literature they are often called Galla. Except for a relatively small number of arid land pastoralists who live in Kenya, all homelands lie in Ethiopia, where they probably make up around 40 percent of the total population. Geographically their territories, though they are not always contiguous, extend from the highlands of Ethiopia in the north, to the Ogaden and Somalia in the east, to the Sudan border in the west, and across the Kenyan border to the Tana River in the south. Though different Oromo groups vary considerably in their modes of subsistence and in their local organizations, they share similar cultures and ways of thought.

oromo culture: Oromo Indigenous Religion and Oromo Christianity Ujulu Tesso Benti, 2018-05-31 The early non-Oromo writers have distorted the history of the Oromo. Without scientific research, they were speaking of the so-called Oromo migration of the 16th century. Against the unscientific thesis, of the early scholars, this work confirmed the Oromo to be not only the indigenous African peoples, but also belong to the Cushitic Africans who invented the first world civilization. Their egalitarian and holistic culture, the gadaa system is part of the ancient Cushitic civilization. It is the base for modern democratic system of governance. The root word of 'gadaa' is originated from 'Ka', the creator God of the ancient religion of the Cushitic Africans. From this very name, Ka originated the Oromo word "Waaqa", which also means creator of everything. This shows that the Oromo are among the first nations who came up with the idea of monotheism. Therefore, this work disqualifies the missionary assumptions describing the Oromo Indigenous Religion (OIR) as Satanism and its religious experts, the Qaalluus as witchdoctors or sorcerers. This dissertation discovered many identical, similar, partial similar and few differing elements between the Oromo Indigenous Religion (OIR) and Oromo Christianity (OC). Also, the study identified many Oromo cultural elements that are compatible to Christianity, therefore must be adopted by the Oromo Christianity. According modern scholarship God revealed himself in every human culture and religion is part of human culture. Therefore, no religion can claim to be "the only true religion". Based on this principle, this dissertation calls all leaders of religious institutions in Oromia, to change their attitude, develop culture of tolerance, conduct constructive religious dialogue, create the atmosphere of peaceful coexistence of all religions and establish sustainable peace that serves humanity.

oromo culture: *The Oromo Movement and Imperial Politics* Asafa Jalata, 2022-03-11 This book critically examines the dialectical relationship between Ethiopian colonialism, Oromo culture, and the collective grievances of the Oromo nation. It identifies the chains of sociological and historical factors that developed the Oromo national movement and demonstrates how that movement is transforming Ethiopian imperial politics.

oromo culture: *Baro Tumsa: The Principal Architect of the Oromo Liberation Front* Asafa Jalata, 2024-09-16 This book identifies and examines the role of Baro Tumsa in clandestinely bringing together a few Oromo nationalists of diverse backgrounds from all over Oromia, the Oromo country, to establish the Oromo Liberation Front (OLF) between the late 1960s and the mid- 1970s in Oromia and Ethiopia. The Haile Selassie government's destruction of Oromo movements, mainly the Macha-Tulama Self-Help Association (MTA), was an immediate reason for the birth of the front. While most Oromos have supported and sympathized with this liberation organization, the colonizers and their agents have vilified and attacked it to make the Oromo society leaderless. For almost a half-century, the OLF has been struggling to uproot Ethiopian (Amhara-Tigray) settler colonialism and its institutions from Oromia to end the domination and exploitation of the Oromo. The book also examines the roles of leaders and social movements in organizing oppressed peoples for collective actions by creating organizations that have visions and missions to liberate themselves. It is a case study of global social movements and leadership studies.

oromo culture: *Ethiopian Elites' Political Cultures: a critical juncture* Solomon

Hailemariam PhD, 2025-05-09 Recurrent ethnic conflicts have been seen in Ethiopia, especially during the last three decades, since the introduction of a governance structure of ethnic federalism in 1991. Attempts to bring political stability to the country have not been successful, as competing political cultures constantly struggle for hegemony. Political constituencies have fragmented, based on sub-national political cultures. This book shows the influence of Amhara, Oromo, and Tigrayan political cultures in Ethiopia and their contribution to the recurrent ethnic conflict in the country. The book used the concepts of political culture and neo-patrimonialism as analytical tools to understand the differences among and between the educated people from these ethnic groups. The findings show that members of each ethnic group are deeply entrenched in their own culture, with clear distrust of the political motives of other ethnicities. Beyond the disagreements on political history, the educated elites accuse each other when it comes to the many challenges faced by the country. They accuse each other of state capture, corruption, inciting ethnic conflicts, malpractice, poor governance, misguided policies, divide-and-rule practices, and misappropriation of the nation's economic wealth. The elites themselves do not shoulder responsibility for any failure in the country and do not show any interest in understanding other points of view, do not show sincere respect for the other's value but claim privileged political positions in present-day Ethiopia for past accomplishments.

oromo culture: Fighting Against the Injustice of the State and Globalization A. Jalata, 2002-02-08 The book examines, compares, and contrasts the African American and Oromo movements by locating them in the global context, and by showing how life chances changed for the two peoples and their descendants as the modern world system became more complex and developed. Since the same global system that created racialized and exploitative structures in African American and Oromo societies also facilitated the struggles of these two peoples, this book demonstrates the dynamic interplay between social structures and human agencies in the system. African Americans in the United States of America and Oromos in the Ethiopian Empire developed their respective liberation movements in opposition to racial/ethnonational oppression, cultural and colonial domination, exploitation, and underdevelopment. By going beyond its focal point, the book also explores the structural limit of nationalism, and the potential of revolutionary nationalism in promoting a genuine multicultural democracy.

oromo culture: Creating African Fashion Histories JoAnn McGregor, Heather Akou, Nicola Stylianou, 2022-04-05 Creating African Fashion Histories examines the stark disjuncture between African self-fashioning and museum practices. Conventionally, African clothing, textiles, and body adornments were classified by museums as examples of trade goods, art, and ethnographic materials—never as fashion. Counterposing the dynamism of African fashion with museums' historic holdings thus provides a unique way of confronting ways in which coloniality persists in knowledge and institutions today. This volume brings together an interdisciplinary group of scholars and curators to debate sources and approaches for constructing African fashion histories and to examine their potential for decolonizing museums, fashion studies, and global cultural history. The editors of this volume seek to answer questions such as: How can researchers use museum collections to reveal traces of past self-fashioning that are obscured by racialized forms of knowledge and institutional practice? How can archival, visual, oral, ethnographic, and online sources be deployed to capture the diversity of African sartorial pasts? How can scholars and curators decolonize the Eurocentric frames of thinking encapsulated in historic collections and current curricula? Can new collections of African fashion decolonize museum practice? From Moroccan fashion bloggers to upmarket Lagos designers, the voices in this ground-breaking collection reveal fascinating histories and geographies of circulation within and beyond the continent and its diasporic communities.

oromo culture: A Cultural History of Genocide in the Early Modern World Igor Pérez Tostado, 2023-05-04 Historical studies of genocide in the 20th century trace the roots back to the sociopolitical, economic, and cultural developments of the early modern period. From globalization

to urbanization, to imperialism, state formation and homogenization, from religious warfare to enlightenment, to racism: many factors connected with genocide first emerged or vastly developed between the 15th and 18th centuries. While the early modern period did not have a crime of genocide, it possessed its own legal system which contemplated the rightful destruction of whole peoples, and a political culture that sanctioned the use of mass violence. As a result, early modern genocide has been denied or blurred as a regrettable side effect of the global circulation of ideas, goods, and peoples, and the creation of new societies, cultures, and languages arising from it. This collection looks at the different genocides which unfolded around the globe, emphasizing its gendered dimension and its disproportionate and enduring impact on indigenous populations. Although European imperialism and homogenization play a central role, it aims more widely to cover the principal agents, victims and rationale for genocide in the early modern world. As a whole, this volume aims at fostering the debate on the early modern history of genocide, not as an insulated or secondary subject, but as a central issue of the era with profound implications for our own.

oromo culture: Oral Literary Worlds Sara Marzagora, Francesca Orsini, 2025-01-31 The discipline of world literature has traditionally focused on written literatures, particularly the novel, with little emphasis placed on the unwritten verbal arts, despite the significance of oral literary expressions around the world, in the past as in the present. This volume redresses this gap by putting the discipline of world literature into dialogue with scholarship on orature and folklore. It asks, what does world literature look like if we start from orature, from oral texts and utterances, and from the performances and audiences that support it? Featuring contributions from an international array of scholars, *Oral Literary Worlds* explores oral traditions from three multilingual regions: the Maghreb, East Africa and South Asia. Essays discuss a variety of vernacular genres, from Swahili tumbuizo to Na'o folk songs, shedding light on less studied forms of vernacular oral production. Collectively, the contributions critique the characterisation of oral traditions as static and pre-modern, and underscore the contemporary relevance of orature to cultural and political discourse. *Oral Literary Worlds* offers a timely and accessible perspective on world literature through the lens of orature, moving away from traditional hierarchies and dichotomies that have characterised previous scholarship. It aims to open up new ways of thinking through local and transnational textual circulation, literary power dynamics, the interaction between textuality and audiences, and aesthetic philosophies. This volume will be an invaluable resource for scholars of world literature, folklore and performance studies, and will further interest teachers and students of popular culture, literature of dissent and music.

Accessibly written, this handbook is an essential read for scholars, students, and policy professionals interested in the contemporary politics in the Horn of Africa.

Moreover, she engages Irreecha in relation to the hugely contested meaning making processes attached to the Thanksgiving ritual which has now become an integral part of Oromo national identity.

oromo culture: Modern Afaan Oromo Grammar Taha M. Roba, 2017-03-16 This publication is the second edition of the Oromo Textbook. It is designed to teach the Oromo language to those who can speak the language but are unable to read it; for those children who were born and live outside their homeland; and for those who are interested in learning one of the major languages of Africa. The Oromo language is spoken by close to 40 million people in Ethiopia and northern Kenya and is the second or third largest language in Africa. It is a testament to the resilience of the Oromo language and how it survived over a century of Abyssinian onslaught and suppression. By reading this handbook one can grasp aspects of Oromo culture, systems of thought the principle of social organization and the art of communication. Rare among Oromo educational material, this volume reads smoothly; from learning the sounds of Oromo alphabets also known as qubee, to reading, and understanding the Oromo language. This work is distinct because it brings out the Oromo oral tradition. It is loaded with specific ways Oromos learned, thought, and preserved their language and culture, the essence of their Orommumma (Oromomness). This book strives to fill the void of Oromo educational material not only in North- America, but also in Oromia (Ethiopia), where teaching and learning the Oromo language outlawed by successive Ethiopian regimes and not sufficiently developed under the current government. This book will undoubtedly emerge as a conversation and discussion piece in the learning and teaching of the Oromo language, Oromo history and tradition of the Oromo people.

Through its pages, the refugees speak to us in powerful, vivid language. They reveal their childhood dreams and struggles for education; the wars and persecution that drove them from their homes; their terror and strength during their extraordinary journeys. They expose the reality of living in the camp; tell of their lives after the 'Jungle' and their hopes for the future. Through their stories, the refugees paint a picture of a different kind of 'Jungle': one with a powerful sense of

community despite evictions and attacks, and of a solidarity which crosses national and religious boundaries. Illustrated with photographs and drawings by the writers, and interspersed with poems, this book must be read by everyone seeking to understand the human consequences of this world crisis.
