priscilla presley net worth: Sofia Coppola and Generation X (So Far) Robert C. Sickels, 2024-08-19 While the work of Sofia Coppola is sometimes dismissed as being stereotypically feminine and placing more focus on spectacle over substance, Sofia Coppola and Generation X (So Far): Anxious and Effervescent draws attention to common characteristics present in Coppola's films to present an authorial signature and aesthetic that are both familiar yet evocative of Generation X's perception in the public consciousness. In analyzing Coppola's films from *The Virgin Suicides* (1999) to *Priscilla* (2023), this book argues that her filmography acts as a reflection of her generation's evolving mindset and self-image from its initial rise to prominence during the late 1980s to its current sentiment of discomfort with its fading influence.

Tyler, 2013-09-24 What Went Wrong: The Big Picture provides an overview of the in-depth analysis of the full book What Went Wrong. Something has gone seriously wrong: The American economy has experienced considerable growth in the last 30 years, but virtually none of this growth has trickled down to the average American. Incomes have been flat since 1985. Inequality has grown, and social mobility has dropped dramatically. Equally troubling, these policies have been devastating to both American productivity and our long-term competitiveness. Many reasons for these failures have been proposed. Globalization. Union greed. Outsourcing. But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U.S. in delivering broad middle-class prosperity. And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership. In *What Went Wrong: The Big Picture*, George R. Tyler, a veteran of the World Bank and the Treasury Department, takes the reader through an objective and data-rich examination of the American experience over the last 30 years. He provides a fascinating comparison between the America and the experience of the family capitalism countries: Australia, Austria, Belgium, Denmark, France, Germany, the Netherlands, and Sweden. Over the last 30 years, they have outperformed the U.S. economy by the only metric that really matters—delivering better lives for their citizens. The policies adopted by the family capitalist countries aren't socialist or foreign. They are the same policies that made the U.S. economy of the 1950s and 1960s the strongest in the world. *What Went Wrong: The Big Picture* describes exactly what went wrong with the American economy, how countries around the world have avoided these problems, and what we need to do to get back on the right track.
