Chapter 1: No One's Crazy

Alexander Cooper, 2021-11-10 Summary of The Psychology of Money - Timeless Lessons on Wealth, Greed, and Happiness - A Comprehensive Summary In chapter one of the book, called "No One's Crazy," the author begins by talking about the crazy things that people do with money. Everyone does crazy things with their money, but the truth is that no one is crazy. Everyone has a different opinion about how money should be handled depending on what generation they came from and how they were raised. They all have their own experiences of the world, and that affects how they think money should be spent. Your experience with money only makes up about 1/100millionth of what has happened in the entire world but about 80% of what you think other people should do with their money. Take the Depression, for example, you have no firsthand knowledge of the Depression, so how can you even try to fathom why someone who grew up during that time would refuse to own stock or would at this time discourage their grandchildren from purchasing stock? They would believe that purchasing stock is crazy. To be continued... Here is a Preview of What You Will Get: □ A Full Book Summary □ An Analysis □ Fun quizzes □ Quiz Answers □ Etc. The book is not complicated like many books that talk about the stock market and do nothing more than confuse the reader and build the writer's ego, but instead, it is filled with the knowledge that the reader can put to use. The book is packed full of wisdom for those who are new to the stock market. This book is not for those who are looking to become billionaires overnight but for those who want to grow their wealth over the long term and enjoy a comfortable life when they are older. There are plenty of stories about how greedy people have lost fortunes as well. You learn about the mindset of wealth and why that is important. The most important lesson that you will learn in this book is that how well you do with money has nothing to do with how smart you are, but it has everything to do with how you behave. That is why so many rich people end up broke after such a short period. They don't know how to behave. However, it also means that an ordinary person can grow their wealth if they can learn a few behavioral skills.
