the cost of survival book: Portrayals of Masculinity in Nigerian Plays Beatrice Nwawuloke Onuoha, 2023-10-16 Portrayals of Masculinity in Nigerian Plays explores Nigerian people's notions of masculinity as portrayed in twelve Nigerian plays, written by three generations of Nigerian playwrights. She argues that hegemonic masculinity and other forms, which are referred to as "alternative masculinities," exist in traditional Nigerian society. By analyzing plays written by first, second, and third-generation Nigerian playwrights, Onuoha tracks how notions about masculinity have evolved over the years. Further, she discusses the malleability of masculinity by exploring how women manifest qualities associated with masculinity within Nigerian plays. Through a review of

critical studies on gender constructions, Onuoha examines not only the negative experiences of women within an African patriarchal system, but also the negative experiences of the men who are also direct or indirect victims of such a system.

the cost of survival book: The Cost of Being Female Margery Elfin, Sue Headlee, 1996-11-30 The Cost of Being Female is 30 cents, say the authors of this new book on discrimination against women. They demonstrate their thesis by constructing an index that documents the costs of discrimination against women in five aspects of life: economic, political, social, education, and health. The index compares the costs for American women with those of women in Sweden, Norway, France and China, and measures the costs for three time periods: 1990s, 1950s, and the 19th century. The authors interviewed over 70 women, providing a human approach to the statistics of earnings, occupations, political participation, marriage, divorce, childrearing, education, and

women's health. The women's narratives are living testimony to the experiences of the costs of being female.

the cost of survival book: *The Cost of Being Undocumented* Alix Dick, Antero Garcia, 2025-06-17 An undocumented activist and a social scientist come together to tally of the structural costs of undocumented life An inhumane math pervades this country: even as our government extracts labor and often taxes from undocumented workers, it excludes these same workers from its social safety net. As a result, these essential workers struggle to get their own basic needs met, from healthcare to education, from freedom of association to the ability to drive to work without looking for ICE in the rearview mirror. When Alix Dick's family found themselves in the crosshairs of cartel violence in Sinaloa, Mexico, she and her siblings were forced to flee to the U.S. Many of the scenes that she shares are difficult and unforgettable: escaping from a relationship in which her partner threatened to report her to immigration; getting root canals done in an underground dental clinic. But there are moments of triumph, too: founding her own nonprofit; working on films that tell important stories; and working with her co-author Dr. Garcia to tell her story in a framework that lays bare the realities of structural oppression. As Alix and Antero tally the costs of undocumented life, they present a final bill of what is owed to the immigrant community. In this way, their book flips the traditional narrative about the economics of immigration on its head.

the cost of survival book: *Confessions of the Pricing Man* Hermann Simon, 2015-10-20 The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer. In all walks of life, we constantly make decisions about whether something is worth our money or our time, or try to convince others to part with their money or their time. Price is the place where value and money meet. From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store, price is the most powerful and pervasive economic force in our day-to-day lives and one of the least understood. The recipe for successful pricing often sounds like an exotic cocktail, with equal parts psychology, economics, strategy, tools and incentives stirred up together, usually with just enough math to sour the taste. That leads managers to water down the drink with hunches and rules of thumb, or leave out the parts with which they don't feel comfortable. While this makes for a sweeter drink, it often lacks the punch to have an impact on the customer or on the business. It doesn't have to be that way, though, as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes. A world-renowned speaker on pricing and a trusted advisor to Fortune 500 executives, Simon's lifelong journey has taken him from rural farmers' markets, to a distinguished academic career, to a long second career as an entrepreneur and management consultant to companies large and small throughout the world. Along the way, he has learned from Nobel Prize winners and leading management gurus, and helped countless managers and executives use pricing as a way to create new markets, grow their businesses and gain a sustained competitive advantage. He also learned some tough personal lessons about value, how people perceive it, and how people profit from it. In this engaging and practical narrative, Simon leaves nothing out of the pricing cocktail, but still makes it go down smoothly and leaves you wanting to learn more and do more—as a consumer or as a business person. You will never look at pricing the same way again.

the cost of survival book: Ethics, Conflict and Medical Treatment for Children E-Book Dominic Wilkinson, Julian Savulescu, 2018-08-05 What should happen when doctors and parents disagree about what would be best for a child? When should courts become involved? Should life support be stopped against parents' wishes? The case of Charlie Gard, reached global attention in 2017. It led to widespread debate about the ethics of disagreements between doctors and parents, about the place of the law in such disputes, and about the variation in approach between different parts of the world. In this book, medical ethicists Dominic Wilkinson and Julian Savulescu critically examine the ethical questions at the heart of disputes about medical treatment for children. They use the Gard case as a springboard to a wider discussion about the rights of parents, the harms of treatment, and the vital issue of limited resources. They discuss other prominent UK and international cases of disagreement and conflict. From opposite sides of the debate Wilkinson and Savulescu provocatively outline the strongest arguments in favour of and against treatment. They analyse some of the distinctive and challenging features of treatment disputes in the 21st century and argue that disagreement about controversial ethical questions is both inevitable and desirable. They outline a series of lessons from the Gard case and propose a radical new 'dissensus' framework for future cases of disagreement. - This new book critically examines the core ethical questions at the heart of disputes about medical treatment for children. - The contents review prominent cases of disagreement from the UK and internationally and analyse some of the distinctive and challenging features around treatment disputes in the 21st century. - The book proposes a radical new framework for future cases of disagreement around the care of gravely ill people.
