Mueller, Katja Sarkowsky, 2022-03-12 Reading the Social in American Studies offers a unique exploration of the advantages and benefits in using sociological terms and concepts in American literary and cultural studies and, conversely, in using literature—understood broadly—to uncover a microlevel of the social. Its temporal scope ranges from the early 19th to the 21st century, providing a historical dimension that is otherwise often missing from studies on the conjunction of literature and sociology. The contributors' approaches include genre reflections as well as close readings, theoretical discussions of crucial sociological terms, and literary observations backed up by empirical sociological studies. The book will familiarize international readers with ideas on the social from both sides of the Atlantic, including scholarship of such figures as John Dewey, Georg Simmel, Norbert Elias, and Pierre Bourdieu.

tara westwood studies: An Intergenerational Feminist Media Studies Jessalynn Keller, Jo Littler, Alison Winch, 2019-10-23 Feminism and generation are live and ideologically freighted issues that are subject to a substantial amount of media engagement. The figure of the millennial and the baby boomer, for example, regularly circulate in mainstream media, often accompanied by hyperbolic and vitriolic discourses and effects of intergenerational feminist conflict. In addition, theories of feminist generation and waves have been, and continue to be, extensively critiqued within feminist theory. Given the compelling criticisms directed at these categories, we ask: why bother examining and foregrounding issues of generation, intergeneration, and transgeneration in feminist media studies? While remaining skeptical of linearity and familial metaphors and of repeating reductive, heteronormative, and racist versions of feminist movements, we believe that the concept of generation does have critical purchase for feminist media scholars. Indeed, precisely because of the problematic ways in which it is used, and its prevalence as a volatile, yet only too palpable, organizing category, generation is in need of continual critical analysis, and is an important tool to be used—with care and nuance—when examining the multiple routes through which power functions in order to marginalize, reward, and oppress. This book covers a range of media forms: film; games; digital media; television; print media; and practices of media production, intervention, and representation. The contributors explore how figures at particular stages of life—particularly the girl and the aging woman—are constructed relationally and circulate within media, with particular attention to sexuality. The book emphasizes exploring the ways in which the category of generation is mobilized in order to gloss sexism, racism, ageism, class oppression, and the effects of neoliberalism. The chapters in this book were originally published as a special issue of Feminist Media Studies.

tara westwood studies: *Why Minorities Play or Don't Play Soccer* Kausik Bandyopadhyay, 2013-09-13 Soccer, the most popular mass spectator sport in the world, has always remained a marker of identities of various sorts. Behind the façade of its obvious entertainment aspect, it has proved to be a perpetuating reflector of nationalism, ethnicity, community or communal identity, and cultural specificity. Naturally therefore, the game is a complex representative of minorities' status especially in countries where minorities play a crucial role in political, social, cultural or economic life. The question is also important since in many nations success in sports like soccer has been used as an instrument for assimilation or to promote an alternative brand of nationalism. Thus, Jewish teams in pre-Second World War Europe were set up to promote the idea of a muscular Jewish identity. Similarly, in apartheid South Africa, soccer became the game of the black majority since it was excluded from the two principal games of the country - rugby and cricket. In India, on the other hand, the Muslim minorities under colonial rule appropriated soccer to assert their community-identity. The book examines why in certain countries, minorities chose to take up the sport while in others they backed away from participating in the game or, alternatively, set up their own leagues and practised self-exclusion. The book examines European countries like the Netherlands, England and France, the USA, Africa, Australia and the larger countries of Asia - particularly India. This book was previously published as a special issue of Soccer and Society.

tara westwood studies: *In the Shadow of Islamophobia* Özge Onay, 2025-02-25 This book explores the multifaceted experiences of British Turks, particularly focusing on how they navigate and negotiate Islamophobia in contemporary British society. It delves into the complexities of identity, ethnicity, and religion, shedding light on the unique ways in which British Turks respond to and reshape the discourses surrounding Islamophobia. By examining the intersection of Turkish secularism, national identity, and global socio-political dynamics, this book offers a nuanced understanding of how Islamophobia is both experienced and deflected within this community. Through a combination of in-depth interviews, ethnographic insights, and analysis of social discourses, the book highlights how British Turks engage in practices of passing and identity negotiation. It uncovers how these strategies are informed by broader themes such as Brexit, cosmopolitanism, and the legacy of Turkey's relationship with Europe. This study challenges monolithic interpretations of Islamophobia, presenting a more diverse and intricate portrayal of its impact on different Muslim communities. This book is an essential resource for scholars and students of Sociology, Criminology, Cultural Studies, and Religious Studies, as well as policymakers and practitioners working in multicultural and multi-ethnic contexts. It will be of particular interest to those studying the intersections of race, religion, and identity in the Middle East and Contemporary Europe.

tara westwood studies: *Contested Tourism Commodities* Konstantinos Tomazos, 2020-05-21 This book discusses tourism niches as contested commodities that have grown and become part of the tourist setting in many destinations. Over time, they develop organically, and, in some cases, underground before they explode into the mainstream, and, more often than not, cause controversy. The text traces the roots of different tourism trends, using examples from both industry and existing studies, revealing the importance of understanding their key drivers, dynamics and impacts. It is in managers' interest to monitor such trends and tourist pursuits as they cross over because they hold the potential to influence new markets, as destinations diversify their tourist offering. This volume explores a number of different tourism niches, including slum tourism, trophy hunting tourism, cosmetic surgery tourism, volunteer tourism, and sex tourism, to name but a few. It shows that the margins between contested commodity and mainstream acceptance are fluid and relative, becoming increasingly blurred. In this environment, it is easy for a seemingly marginal tourist pursuit to cross into the mainstream. What is pivotal in this emerging picture is that, as the understanding of each niche matures into the broader public's consciousness, and supply grows, it becomes another

experience that can be replicated, homogenised and sold. Turning these niches into tourism products requires enough understanding of them to be sold commercially and further segmented to benefit as many stakeholders as possible. In this reality, it is paramount that the tourism industry maintains an open mind and explores the potential of turning new trends into products for tourist consumption.
