**through the tunnel short story: *Intonation in Text and Discourse*** Anne Wichmann, 2014-07-15 It is clear that a printed text provides the reader with more information than the words alone. This includes punctuation marks, capitalisation, paragraphs, headings and sub-headings, all of which help the reader to understand how the words are organised into sentences, and sentences are organised into a coherent text. In a spoken text, this typographical information is necessarily absent. So how do readers and speakers provide equivalent information to the listener? *Intonation in Text and Discourse* describes the way in which speech melody, or intonation, is used to signal the structure of spoken texts. It examines the role of intonation in clarifying the relationship between successive utterances, from close cohesive ties ('middles') to major breaks for a new topic ('ends' and 'beginnings'). The book is concerned chiefly with the intonational structuring of read or prepared monologue, but also devotes a chapter to current developments in the analysis of intonation in conversation. It describes not only how intonation is used to organise systematic turn-taking but also how it can signal greater or lesser degrees of co-operativeness. It addresses finally the complex issue of attitudinal intonation - the elusive 'tone of voice'. The first book on discourse intonation to deal with such a wide variety of naturally-occurring spoken data, *Intonation in Text and Discourse* will be of great interest to students, lecturers and researchers of intonation and all aspects of spoken discourse.

**through the tunnel short story: The Social Railway and Its Workers in Europe's Modern Era, 1880-2023** David Welsh, 2025-06-26 This thematically arranged book examines the evolution of rail transport and a number of railway workforces across Europe in the modern era, from around 1880 to 2023. Each chapter explores how, within the context of a social railway, rail workers developed distinct national and international perspectives on the nature of their work and their roles in societies and states. David Welsh convincingly argues that workers formed a raft of entirely new and enduring organisations such as trade unions that, in turn, became ramparts of hope. Welsh goes on to consider how the insurgent character of these organisations produced moments of fury during tumultuous periods in the 20th century. The Social Railway and its Workers in Europe's Modern Era, 1880-2023 explores the national and European contexts in which both characteristics came to the fore, including the ecology of fossil fuel technology (coal and oil). Above all, it argues that social, economic and political forces are not simply external 'scene-shifting' but integral to the history of railway systems. The book examines the cultural construction of European railways through literature, art and other forms of writing as well as recent oral history. It also includes a detailed investigation of the role played by nationalisation and public ownership in Europe. In the context of neoliberalism and globalization, it proposes a 21st century programme for the social railway.

**through the tunnel short story: Crossing Under the Hudson** Angus Kress Gillespie, 2011-10-16 Crossing Under the Hudson takes a fresh look at the planning and construction of two key links in the transportation infrastructure of New York and New Jersey--the Holland and Lincoln Tunnels. Writing in an accessible style that incorporates historical accounts with a lively and entertaining approach, Angus Kress Gillespie explores these two monumental works of civil engineering and the public who embraced them. He describes and analyzes the building of the tunnels, introduces readers to the people who worked there--then and now--and places the structures into a meaningful cultural context with the music, art, literature, and motion pictures that these tunnels, engineering marvels of their day, have inspired over the years. Today, when new concerns about global terrorism may trump bouts of simple tunnel tension, Gillespie's Crossing Under the Hudson continues to cast a light at the end of the Holland and Lincoln Tunnels.

Teachers will find that, while many of the visual and verbal texts may be familiar, the approaches to them offer fresh insights and a rich agenda for the classroom. Shakespeare, Fielding, Hogarth, Blake, Wordsworth, Constable, Turner, the Pre-Raphaelites, Wilfred Owen, Paul Nash, Stanley Spencer, Ted Hughes and Seamus Heaney - the range of authors and artists discussed is both extensive and relevant to the National Curriculum and to post-16 and undergraduate courses.

**through the tunnel short story: The Nail in the Skull and Other Victorian Urban Legends** Simon Young, 2022-06-27 Winner of the 2023 Brian McConnell Book Award from the International Society for Contemporary Legend Research In the last fifty years, folklorists have amassed an extraordinary corpus of contemporary legends including the "Choking Doberman," the "Eaten Ticket," and the "Vanishing Hitchhiker." But what about the urban legends of the past? These legends and tales have rarely been collected, and when they occasionally appear, they do so

as ancestors or precursors of the urban legends of today, rather than as stories in their own right. In *The Nail in the Skull and Other Victorian Urban Legends*, Simon Young fills this gap for British folklore (and for the wider English-speaking world) of the 1800s. Young introduces seventy Victorian urban legends ranging from “Beetle Eyes” to the “Shoplifter’s Dilemma” and from “Hands in the Muff” to the “Suicide Club.” While a handful of these stories are already known, the vast majority have never been identified, and they have certainly never received scholarly treatment. Young begins the volume with a lengthy introduction assessing nineteenth-century media, emphasizing the importance of the written word to the perpetuation and preservation of these myths. He draws on numerous nineteenth-century books, periodicals, and ephemera, including digitized newspaper archives—particularly the British Newspaper Archive, an exciting new hunting ground for folklorists. *The Nail in the Skull and Other Victorian Urban Legends* will appeal to an academic audience as well as to anyone who is interested in urban legends.

**through the tunnel short story:** The Early History of Railway Tunnels Hubert Pragnell, 2024-08-30 To the early railway traveller, the prospect of travelling to places in hours rather than days hitherto was an inviting prospect, however a journey was not without its fears as well as excitement. To some, the prospect of travelling through a tunnel without carriage lighting, with smoke permeating the compartment and the confined noise was a horror of the new age. What might happen if we broke down or crashed into another train in the darkness? To others it was exciting, with the light from the footplate flickering against the tunnel walls or spotting the occasional glimpses of light from a ventilation shaft. To the directors of early railway companies, planning a route was governed by expense and the most direct way. Avoiding hills could add miles but tunnelling through them could involve vast expense as the Great Western Railway found at Box and the London and Birmingham at Kilsby. Creating a cutting as an alternative was also costly not only in labour and time, but also in compensation for landowners, who opposed railways on visual and social grounds having seen their land divided by canals. Construction involved millions of bricks or blocks of stone for sufficiently thick walls to withstand collapse. However, the entrance barely seen from the carriage window might be an impressive Italianate arch as at Primrose Hill, or a castellated portal worthy of the Middle Ages as at Bramhope. This book sets out to tell the story of tunnelling in Britain up to about 1870, when it was a question of burrowing through earth and rock with spade and explosive powder, with the constant danger of collapse or flooding leading to injury and death. It uses contemporary accounts, from the dangers of railway travel by Dickens to the excitement of being drawn through the Liverpool Wapping Tunnel by the young composer Mendelssohn. It includes descriptions from early railway company guide books, newspapers and diaries. It also includes numerous photographs and colored architectural elevations from railway archives.

**through the tunnel short story:** Coming Attractions Lisa Kernan, 2009-07-21 Movie trailers—those previews of coming attractions before the start of a feature film—are routinely praised and reviled by moviegoers and film critics alike: They give away too much of the movie. They’re better than the films. They only show the spectacular parts. They lie. They’re the best part of going to the movies. But whether you love them or hate them, trailers always serve their purpose of offering free samples of a film to influence moviegoing decision-making. Indeed, with their inclusion on videotapes, DVDs, and on the Internet, trailers are more widely seen and influential now than at any time in their history. Starting from the premise that movie trailers can be considered a film

genre, this pioneering book explores the genre's conventions and offers a primer for reading the rhetoric of movie trailers. Lisa Kernan identifies three principal rhetorical strategies that structure trailers: appeals to audience interest in film genres, stories, and/or stars. She also analyzes the trailers for twenty-seven popular Hollywood films from the classical, transitional, and contemporary eras, exploring what the rhetorical appeals within these trailers reveal about Hollywood's changing conceptions of the moviegoing audience. Kernan argues that movie trailers constitute a long-standing hybrid of advertising and cinema and, as such, are precursors to today's heavily commercialized cultural forms in which art and marketing become increasingly indistinguishable.
