the one minute cure book: *Licensed to Kill* Barbara Every, 2012-12-26 Barb Every Wife, Mother, Grand Mother and Great Grand Mother with all these years and a host of experiences in observing and helping with all sorts of ailments and finding the old remedies of my mother and grand mother often times worked better than the drugs promoted by traditional doctors that only learn prescriptions and surgery in 8 years of Med. School. I started buying health books and monthly news letters by the dozens. When modern medicine nearly killed my dear husband, not once, but two different times, I knew something needed to be done to help others that are being sickened or killed by medicine (poisons). The book *Licensed To Kill* practically wrote itself it took barely over a week. The title of the book, the names of each chapter just fell into place. Even the cover design of prescription containers was done without much thought on my part. (Divine intervention?) The only addition was Chapter 9, Here We Go Again, which personally proved, one more time, what a natural cure (iodine) can do by regulating the pulse, and what medical drugs and procedures cannot do. I'm still reading health books and Newsletters. After all, Natural cures (with no side effects) have been around for literally thousands of years. Drugs and Prescriptions (with many side effects, including death, are relatively new). The Pharmaceutical Companies do not want you well. Why would they? They make their Big Bucks when you are ill and buying their Drugs.

the one minute cure book: *Cure in One Minute a Day* S Nikolson, 2024-10-02 In today's fast-paced world, time is a luxury that most of us don't have. From the moment we wake up to the moment we go to bed, our days are filled with endless demands-emails that need answering, attending meetings, meals that need preparing, and families that need caring for. We are constantly being pulled in multiple directions, and self-care often becomes the first thing to fall by the wayside. We know we should care better for our bodies and minds, but when should we find the time? For many of us, committing to long workouts, extensive meditation sessions, or complicated wellness routines can feel daunting, if possible. Yet, we all understand the importance of staying healthy, reducing stress, and maintaining mental and emotional well-being. The question is: How can we balance these needs with the realities of our busy lives? What if you could start improving your health and well-being in just one minute a day? What if 60 seconds was all it took to start making meaningful changes in your life? It might sound too good to be accurate, but that's the idea behind

Cure in One Minute a Day. This book is designed to show you that you don't need hours of free time or complex routines to feel better. You need a minute-and the commitment to making that minute count. The concept is simple but powerful. You can see real, lasting improvements by dedicating just one minute to your daily health. These brief but focused actions can help you reduce stress, boost your energy levels, strengthen your immune system, improve your mental clarity, and even enhance the quality of your sleep. Each chapter in this book provides a variety of one-minute practices that are easy to incorporate into your daily routine. They don't require special equipment, extensive preparation, or a considerable time commitment. They need consistency, and that's where the magic happens. Why One Minute? You may wonder, How much can change in one minute? The answer is a lot more than you think. Research shows that even short bursts of focused activity can significantly affect your body and mind. One minute of deep breathing can lower your heart rate and reduce stress. One minute of stretching can improve flexibility and circulation. One minute of mindfulness can enhance focus and help clear mental clutter. One minute of gratitude can rewire your brain to focus on the positive and boost your mood. These small actions can lead to significant results over time when practiced regularly. The key lies in the power of habit. You create meaningful rituals supporting your well-being by incorporating these one-minute wellness practices into your daily life. These tiny moments of self-care may seem insignificant on their own, but their cumulative effect is profound. One minute may be a small investment, but when you repeat it consistently, it adds up to lasting change. This book teaches you how to make wellness a habit-not by overhauling your life, but by simply integrating short, manageable practices into your day. Each chapter focuses on a specific area of health and offers practical, actionable tips that take only 60 seconds to complete. You'll learn one-minute techniques for reducing stress, boosting your energy, improving your focus, enhancing your sleep, and even strengthening your immune system. These practices are grounded in evidence-based research and are designed to fit seamlessly into your life, no matter how busy you are

the one minute cure book: *The Cancer Odyssey* Margaret Brennan Bermel, MBA, 2011-03-10
Chemotherapy is the greatest fraud ever perpetrated upon the American public. This statement must reach the public consciousness. The Big Pharma-FDA complex must be exposed as a cartel colluding, not on curing cancer, but on generating profits. Does chemotherapy work? Maybe, sometimes, with some specific cancers. But very often, it does not work. The “best weapon” used in the “war on cancer” traces its genesis to mustard gas. The cancer may die, but the collateral damage is the patient’s life. Approximately 600,000 Americans die each year ostensibly from “cancer”—but are they actually dying from treatment? A very provocative question. Bill Henderson interviews Margaret Bermel about her new book called “The Cancer Odyssey.” Bill says, I really enjoyed your book. If everyone would read it BEFORE they get the cancer diagnosis (and go into fear orbit), the millions of unnecessary cancer deaths would end. Here is a direct link where you can listen to it or download it (plain mp3 audio file). <http://webtalkradio.net/?s=bill+henderson&task=search> How to Live Cancer Free – “The Cancer Odyssey” by Margaret Bermel

the one minute cure book: *HEALTH DISCLOSURE* Adam Masters, 2013-10 A team of doctors and I figured out how to eliminate pain, inflammation, obesity, disease, and cancer to 5 basic elements of health, arranged as a pyramid of priorities. Pain, inflammation and unhealthy weight are simply precursors to disease and obesity arranged in a sequence that begin at the precise point where 1 or more of the 5 imbalances occur. All are symptoms of inflammation, all are caused by imbalances in the pyramid I call the Matrix. Where you are in the Matrix is measured by pH, 7.2 being perfect. By using the Matrix for anyone, for any condition reverses and accelerates recovery past the point of curing to a point of thriving. It makes pain, inflammation, obesity, disease, medication, cancer, and for most, mental illness irrelevant. That pyramid is the fulcrum point from where the sequence of obesity and disease begins. You can stop and reverse ill-health in its tracks by balancing the 5 elements at any point. Blood only becomes alkaline pH 7.0 (+/-0.2) absent of inflammation, to sustain life. PH is the report card of the 5 elements that make up the Matrix pyramid of patient health. The Matrix is the roadmap and the sequence is the path. The difference between existing in a hospital bed, requiring a walker, living with a sore back to thriving can be manipulated by how much you invest in optimizing the 5 elements. The easy part is, prevention and cure for anyone of any disease. Optimization and thriving is where this book wants to take you! Profit has no incentive to change, since profit is working well for individuals that currently control the system, and doctors can't disclose this information without repercussions. The trouble with the health care system is that it is driven by profit and not by incentive for cures. Trauma-care-trained

doctors are practicing health care and the symptom is sick care. Treating symptoms intensifies problems because it ignores the factor of time. Health Disclosure is about health care for the 21st century and its about time!
