Contributing authors demonstrate that these shows are positioned and understood as comprising an increasingly recognizable genre characterized by familiar markers of distinction. In contrast to most accounts of elite categorizations of contemporary US television programming that center on HBO and its primary streaming rivals, these essays examine how efforts to imbue series with prestigious or elevated status now permeate the rest of the medium, including network as well as basic and undervalued premium cable channels. Case study chapters focusing on diverse series, ranging from widely recognized examples such as *The Americans* (2013-2018) and *The Knick* (2014-15) to contested examples like *Queen of the South* (2016-2021) and *How I Met Your Mother* (2005-2014), highlight how contributing authors extend conceptions of the genre beyond expected parameters.

the terror dan simmons review: Haunted Soundtracks Kevin J. Donnelly, Aimee Mollaghan, 2023-10-05 The turn of the millennium has heralded an outgrowth of culture that demonstrates an awareness of the ephemeral nature of history and the complexity underpinning the relationship between location and the past. This has been especially apparent in the shifting relationship between landscape, memory and sound in film, television and other media. The result is growing interest in soundtracks, as part of audiovisual culture, as well as an interest in the spectral aspects of culture more generally. This collection of essays focuses on audiovisual forms that foreground landscape, sound and memory. The scope of inquiry emphasises the ghostly qualities of a certain body of soundtracks, extending beyond merely the idea of 'scary films' or 'haunted houses.' Rather, the notion of sonic haunting is tied to ideas of trauma, anxiety or nostalgia associated with spatial and temporal dislocation in contemporary society. Touchstones for the approach are the concepts of psychogeography and hauntology, pervasive and established critical strategies that are interrogated and refined in relation to the reification of the spectral within the soundtracks under consideration here.

the terror dan simmons review: The Spectral Arctic Shane McCorristine, 2018-05-01 Visitors to the Arctic enter places that have been traditionally imagined as otherworldly. This strangeness fascinated audiences in nineteenth-century Britain when the idea of the heroic explorer voyaging through unmapped zones reached its zenith. The Spectral Arctic re-thinks our understanding of Arctic exploration by paying attention to the importance of dreams and ghosts in the quest for the Northwest Passage. The narratives of Arctic exploration that we are all familiar with today are just the tip of the iceberg: they disguise a great mass of mysterious and dimly lit stories beneath the surface. In contrast to oft-told tales of heroism and disaster, this book reveals the hidden stories of dreaming and haunted explorers, of frozen mummies, of rescue balloons, visits to Inuit shamans, and of the entranced female clairvoyants who travelled to the Arctic in search of John Franklin's lost expedition. Through new readings of archival documents, exploration narratives, and fictional texts, these spectral stories reflect the complex ways that men and women actually thought about the far North in the past. This revisionist historical account allows us to make sense of current cultural and political concerns in the Canadian Arctic about the location of Franklin's ships.

the terror dan simmons review: Ships of State Laurie Ellinghausen, 2024-03-01 The ideological roots of the British Empire have been widely discussed in early modern studies, as have maritime settings in the period's imaginative writing. However, these perspectives have not adequately accounted for how literature's evolving representations of the common British seaman

shaped the early stages of public discourse about Britain's imperial endeavours. Filling that gap in scholarship, *Ships of State* argues that literary representations of seaborne labour play a distinct and crucial role in the early formation of British imperial attitudes. The book analyses these representations across an array of popular genres: New World promotion tracts, civic pageantry, stage drama, and broadside ballads. These genres demonstrate how imaginative modes of discourse both reflected and influenced popular conceptions of the common seaman and, by extension, the national ambitions he represented. Placing these depictions into dialogue with the larger national conversation about maritime expansion, *Ships of State* sheds new light on the role of seaborne labour and its literary representations in creating and sustaining empire.

the terror dan simmons review: *Where the Dead Wait* Ally Wilkes, 2023-12-05

"Haunting...Ominous." —The New York Times Book Review A "wonderfully chilling" (Christopher Golden, New York Times bestselling author) polar gothic about a Victorian explorer in search of his lost shipmate—and redemption—from the Bram Stoker Award-nominated author of *All the White Spaces*. William Day should be an acclaimed Arctic explorer. But after a failed expedition, in which his remaining men only survived by eating their dead comrades, he returned in disgrace. Thirteen years later, his second-in-command, Jesse Stevens, has gone missing in the same frozen waters. Perhaps this is Day's chance to restore his tarnished reputation by bringing Stevens—the man who's haunted his whole life—back home. But when the rescue mission becomes an uncanny journey into his past, Day must face up to the things he's done. Abandonment. Betrayal. Cannibalism. Aboard ship, Day must also contend with unwanted passengers: a reporter obsessively digging up the truth about the first expedition, as well as Stevens's wife, a spirit-medium whose séances both fascinate and frighten. Following a trail of cryptic messages, gaunt bodies, and old bones, their search becomes more and more unnerving. The restless dead are never far behind in this "breathtaking achievement" (Publishers Weekly, starred review).

the terror dan simmons review: *The Imagined Arctic in Speculative Fiction* Maria

Lindgren Leavenworth, 2023-07-31 *The Imagined Arctic in Speculative Fiction* explores the ways in which the Arctic is imagined and what function it is made to serve in a selection of speculative fictions: non-mimetic works that start from the implied question What if? Spanning slightly more than two centuries of speculative fiction, from the starting point in Mary Shelley's 1818 *Frankenstein* to contemporary works that engage with the vast ramifications of anthropogenic climate change, analyses demonstrate how Arctic discourses are supported or subverted and how new Arctics are added to the textual tradition. To illuminate wider lines of inquiry informing the way

the world is envisioned, humanity's place and function in it, and more-than-human entanglements, analyses focus on the function of the actual Arctic and how this function impacts and is impacted by speculative elements. With effects of climate change training the global eye on the Arctic, and as debates around future northern cultural, economic and environmental sustainability intensify, there is a need for a deepened understanding of the discourses that have constructed and are constructing the Arctic. A careful mapping and serious consideration of both past and contemporary speculative visions thus illuminate the role the Arctic has played and may come to play in a diverse set of practices and fields.

the terror dan simmons review: *Visual Representations of the Arctic* Markku Lehtimäki, Arja Rosenholm, Vlad Strukov, 2021-03-30 Privileging the visual as the main method of communication and meaning-making, this book responds critically to the worldwide discussion about the Arctic and the North, addressing the interrelated issues of climate change, ethics and geopolitics. A multi-disciplinary, multi-modal exploration of the Arctic, it supplies an original conceptualization of the Arctic as a visual world encompassing an array of representations, imaginings, and constructions. By examining a broad range of visual forms, media and forms such as art, film, graphic novels, maps, media, and photography, the book advances current debates about visual culture. The book enriches contemporary theories of the visual taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices, including imaginary constructions of the North. Original contributions include case studies from all the countries along the Arctic shore, with Russian material occupying a large section due to the country's impact on the region

the terror dan simmons review: Tracking the Franklin Expedition of 1845 Stephen Zorn, 2023-08-29 The Franklin Northwest Passage Expedition of 1845 is perhaps the greatest disaster in the history of exploration--all 129 men vanished, as did the expedition's two ships, HMS Erebus and Terror. Over the next 150 years, searchers found bones, clothing and a variety of relics. Inuit narratives provided some of the details of what happened to the frozen, starving sailors after they deserted their ice-locked ships in 1848. Then, in 2014 and 2016, Canadian researchers found the sunken wrecks, not far from the bleak, windswept King William Island in the Arctic. At last, the mystery of the Franklin Expedition would be solved. Or would it? This book pulls together the various searchers' discoveries; the many recent scientific studies that shed light on when, how and why the men died (and whether, in extremis, they ate each other); and illuminates what we know, and what we don't and may never know, about the fate of the expedition.

the terror dan simmons review: *On the Backs of Others* Edward Armston-Sheret, 2024 In the Victorian and Edwardian eras British explorers sought to become respected geographers and popular public figures, downplaying or reframing their reliance on others for survival. Far from being solitary heroes, these explorers were in reality dependent on the bodies, senses, curiosity, and labor of subaltern people and animals. In *On the Backs of Others* Edward Armston-Sheret offers new perspectives on British exploration in this era by focusing on the contributions of the people and animals, ordinarily written out of the mainstream histories, who made these journeys possible. He explores several well-known case studies of enduring popular and academic interest, such as Richard Francis Burton and John Hanning Speke's Nile expeditions (1856-59 and 1860-63); Isabella Bird's travels in North America, Persia, and East Asia (1872-c. 1900); and Captain Robert Falcon Scott's two Antarctic expeditions (1901-4 and 1911-13). Armston-Sheret argues that numerous previously ignored stories show the work and agency of subaltern groups. In rethinking the history of exploration *On the Backs of Others* offers the first book-length study of the relationship between exploration and empire and their legacies within academic geography. --

In Bradford's hometown, Eric discovers an extraordinary history -- a glorious domed hotel where movie stars, presidents, athletes, and mobsters once mingled, and hot springs whose miraculous mineral water cured everything from insomnia to malaria. Neglected for years, the resort has been restored to its former grandeur just in time for Eric's stay. Just hours after his arrival, Eric experiences a frighteningly vivid vision. As the days pass, the frequency and intensity of his hallucinations increase and draw Eric deeper into the town's dark history. He discovers that something besides the hotel has been restored -- a long-forgotten evil that will stop at nothing to regain its lost glory. Brilliantly imagined and terrifyingly real, *So Cold the River* is a tale of irresistible suspense with a racing, unstoppable current.

the terror dan simmons review: *Nature and Narrative* Markku Lehtimäki, 2025-05-23 The book explores environmental issues in twenty-first-century Anglophone fiction and how those issues are dealt with by specific literary means. It proposes a reciprocal relationship between nature and narrative—the idea according to which nature both informs and inspires artistic creations, while literary designs and rhetoric also shape our ideas and perceptions of the natural environment. It is argued that in order to address design and rhetoric in environmental texts, we need a close analysis of those world-shaping functions of literary narratives that unite ecocritical and narratological interests. The author presents readings of contemporary novels and their varying ways of seeing nature through narrative devices and fictional minds. The novels discussed in the book are Hilary Mantel's *Wolf Hall*, Toni Morrison's *A Mercy*, Ian McGuire's *The North Water*, Barbara Kingsolver's *The Lacuna*, Paul Harding's *Tinkers* and Enon, J. M. Coetzee's *Elizabeth Costello*, Ian McEwan's *Solar*, and Jenny Offill's *Weather*.
