then and now photos: School Memories Cristina Yanes-Cabrera, Juri Meda, Antonio Viñao, 2016-09-15 This book reveals how school memories offer not only a tool for accessing the school of the past, but also a key to understanding what people today know (or think they know) about the school of the past. It describes, in fact, how historians' work does not purely and simply consist in exploring school as it really was, but also in the complex process of defining the memory of school as one developed and revisited over time at both the individual and collective level. Further, it investigates the extent to which what people "know" reflects the reality or is in fact a product of stereotypes that are deeply rooted in common perceptions and thus exceedingly difficult to do away with. The book includes fifteen peer-reviewed contributions that were presented and discussed during the International Symposium "School Memories. New Trends in Historical Research into Education: Heuristic Perspectives and Methodological Issues" (Seville, 22-23 September, 2015).

then and now photos: *Camera Graeca: Photographs, Narratives, Materialities* Philip Carabott, Yannis Hamilakis, Eleni Papargyriou, 2016-03-09 While written sources on the history of Greece have been studied extensively, no systematic attempt has been made to examine photography as an important cultural and material process. This is surprising, given that Modern Greece and photography are almost peers: both are cultural products of the 1830s, and both actively converse with modernity. *Camera Graeca: Photographs, Narratives, Materialities* fills this lacuna. It is the first inter-disciplinary volume to examine critically and in a theorised manner the entanglement of Greece with photography. The book argues that photographs and the photographic process as a whole have been instrumental in the reproduction of national imagination, in the consolidation of the nation-building process, and in the generation and dissemination of state propaganda. At the same time, it is argued that the photographic field constitutes a site of memory and counter-memory, where various social actors intervene actively and stake their discursive, material, and practical claims. As such, the volume will be of relevance to scholars and photographers, worldwide. The book is divided into four, tightly integrated parts. The first, 'Imag(in)ing Greece', shows that the consolidation of Greek national identity constituted a material-cum-representational process, the projection of an imagery, although some photographic production sits uneasily within the national canon, and may even undermine it. The second part, 'Photographic narratives, alternative histories', demonstrates the narrative function of photographs in diary-keeping and in photobooks. It also examines the constitution of spectatorship through the combination of text and image, and the role of photography as a process of materializing counter-hegemonic discourses and practices. The third

part, 'Photographic matter-realities', foregrounds the role of photography in materializing state propaganda, national memory, and war. The final part, 'Photographic ethnographies'

Cordell, 2015-11-10 Learn how to teach visual literacy through photography—an easy way for you to combine student interest with resources at hand to enhance a key learning skill. Fortunately, this critical skill can be incorporated into existing curriculum, and this book shows you how to do just that. Written for K-12 classroom teachers and librarians, this all-you-need-to-know volume discusses the importance of visual literacy in education and examines how it helps address current learning standards. The book shows you how to use photography and digital images to cultivate critical thinking, inquiry, and information literacy; provides examples of the use of photographic images in the classroom and in real life; and addresses how students can be ethical practitioners in a digital world. In addition, the book includes sample lessons you can easily implement, regardless of your level of technical and photographic expertise. A resource list of photo editing, curation, and museum sites is included.
