Overview of the UFLI Reading Program

The UFLI reading program is a research-based literacy initiative developed by the University of Florida Literacy Institute. Its primary goal is to provide educators with comprehensive tools and strategies to teach reading effectively, especially to students who struggle with traditional methods. The program is grounded in the principles of structured literacy, which promotes explicit instruction in the fundamental aspects of reading. It is designed to be adaptable across various educational settings, including general education classrooms, special education, and tutoring programs. The UFLI reading program not only targets early readers but also supports older students who require intervention to build or reinforce their reading skills.

Historical Background and Development

The UFLI reading program originated from extensive literacy research conducted at the University of Florida. The program was developed to address the gaps identified in conventional reading instruction, particularly for

students with dyslexia and related learning disabilities. By integrating evidence-based practices, the UFLI reading program has evolved into a dynamic curriculum that aligns with current literacy standards and cognitive science research. Its ongoing revisions and updates ensure that it remains relevant and effective in meeting diverse learner needs.

Target Audience and Usage

The program is intended for educators, reading specialists, and interventionists working with students from kindergarten through middle school. It is particularly beneficial for learners who demonstrate difficulties in decoding, word recognition, and comprehension. Schools and districts implement the UFLI reading program as part of their Response to Intervention (RTI) or Multi-Tiered System of Supports (MTSS) frameworks. Additionally, the program is used in private tutoring and specialized literacy clinics to provide individualized instruction.

Core Components of the UFLI Reading Curriculum

The UFLI reading program emphasizes a structured approach to literacy by incorporating several essential components that collectively support reading proficiency. These components are systematically taught to ensure mastery and retention.

Phonemic Awareness

Phonemic awareness is the ability to recognize and manipulate individual sounds in spoken words. The UFLI reading program provides explicit lessons to develop this skill, which is critical for decoding and spelling. Activities include segmenting, blending, and manipulating phonemes to build auditory discrimination and sound awareness.

Phonics and Decoding

The program offers a comprehensive phonics curriculum that teaches the relationships between letters and sounds. Students learn to decode words by applying consistent phonics rules, including consonant blends, digraphs, vowel patterns, and syllabication. The systematic progression ensures that learners gain confidence and accuracy in word recognition.

Fluency Development

Reading fluency is addressed through repeated reading practices and guided oral reading exercises. The UFLI reading program encourages the development

of smooth, expressive, and automatic reading, which supports comprehension and overall reading enjoyment.

Vocabulary and Language Skills

Building a robust vocabulary is integral to reading comprehension. The program integrates vocabulary instruction with reading activities, focusing on both explicit teaching of new words and strategies for independent word learning. Language skills, including syntax and morphology, are also incorporated to enhance understanding.

Reading Comprehension

The UFLI reading program includes targeted comprehension strategies such as predicting, questioning, summarizing, and inferencing. These skills are taught through guided reading sessions and text analysis, enabling students to extract meaning and engage critically with texts.

Instructional Strategies in the UFLI Reading Program

The instructional framework of the UFLI reading program is characterized by explicit, systematic, and multisensory teaching methods. These strategies accommodate various learning styles and ensure that reading instruction is accessible to all students.

Explicit Instruction

Lessons in the UFLI reading program are carefully scripted to provide clear, direct teaching of reading concepts. This explicit approach minimizes ambiguity and helps students understand exactly what they need to learn and practice.

Systematic Progression

The curriculum follows a logical sequence where skills build upon one another. This systematic progression prevents gaps in knowledge and ensures that foundational skills are solid before introducing more complex concepts.

Multisensory Techniques

To reinforce learning, the program incorporates multisensory strategies such

as visual aids, tactile activities, and auditory exercises. Engaging multiple senses helps solidify neural pathways associated with reading and supports memory retention.

Diagnostic Assessment and Progress Monitoring

The UFLI reading program includes tools for assessing student performance and monitoring progress regularly. These assessments guide instruction and allow educators to tailor interventions based on individual needs.

ufli reading program: *Evaluating the Effects of the University of Florida Literacy Initiative (UFLI) on the Reading Skills of Spanish-speaking English Language Learners*
Stephanie Liset Arriaza de Allen, 2010 ABSTRACT: Many English language learners (ELLs) in schools experience reading difficulties, particularly Spanish-speaking students. This is a serious problem given the tendency for struggling readers to fall further behind as they advance in school. This issue becomes more pressing as the number of ELLs enrolled in schools rises and the availability of native language instruction diminishes. Fortunately, there is evidence that English reading interventions that have proven to be effective for struggling native English speakers are also effective for ELLs with different levels of English oral proficiency. Given that the literature is scarce, it is important to investigate the impact of other reading interventions on the reading outcomes of ELLs. The purpose of this study was to examine the effectiveness of a modified version of the University of Florida Literacy Initiative tutoring program in promoting the reading skills of second-grade Spanish-speaking ELLs who are struggling to read. The program was modified to include small-group instruction and practices that supported the language needs of ELLs.

Hoppey, 2017-03-01 This book provides illustrations of urban school-university partnerships recognized by the Shirley Schwartz Award of Council of Great City Schools. The authors share their work by blending practitioner and researcher voices to offer other school and university based educators, policy makers, and foundation leadership potential solutions to the complex problem of preparing educators and enhancing teaching within urban schools. In each chapter, the authors describe their urban partnership story, the greatest challenges they faced, how they responded to those challenges, and evidence of impact. Given that each partnership is unique, the authors conclude each chapter by offering a set of questions for discussion. This book serves as an excellent resource for educators interested in establishing urban school-university partnerships that improve educator quality, strengthen the pipeline of urban educators, and expand Pk-12 students' learning experiences. The book is divided into three sections: (1) Teacher Candidate Preparation, (2) Teacher Professional Development, and (3) Principal Development.
