tim maher guided fishing trips: Cruise Tourism in Polar Regions Michael Lück, Patrick Timothy Maher, Emma J. Stewart, 2010 Cruises are the primary form of tourism in the Polar Regions and cruise ship tourism in both the Arctic and Antarctic is expanding rapidly. The industry has moved beyond its infancy, and is now entering a maturing phase with increased numbers and types of vessels, more demanding routes, and more regular and predictable patterns of activity. The increase in cruise activities, and the associated risks of accidents, as well as the potential and actual impacts of the large numbers of tourists in the polar regions bring with it management challenges for sustainable use of these regions. This book discusses critically the issues around environmental and social sustainability of the cruise industry in Polar Regions. Authors from Canada, USA, Europe, Australia and New Zealand are experts in their respective fields and take an innovative, critical and at times controversial approach to the subject.

tim maher guided fishing trips: Nature's Crossroads George Vrtis, Christopher W. Wells, 2023-01-10 Minnesota's Twin Cities have long been powerful engines of change. From their origins in the early nineteenth century, the Twin Cities helped drive the dispossession of the region's Native American peoples, turned their riverfronts into bustling industrial and commercial centers, spread streets and homes outward to the horizon, and reached well beyond their urban confines, setting in motion the environmental transformation of distant hinterlands. As these processes unfolded, residents inscribed their culture into the landscape, complete with all its tensions, disagreements, contradictions, prejudices, and social inequalities. These stories lie at the heart of Nature's Crossroads. The book features an interdisciplinary team of distinguished scholars who aim to open new conversations about the environmental history of the Twin Cities and Greater Minnesota.
