us holocaust memorial museum webquest: Social Studies for Secondary Schools Alan J. Singer, 2014-10-08 Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: Think it over, Add your voice to the discussion, Try it yourself, and It's your classroom. All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text

us holocaust memorial museum webquest: Figures of Memory Michael Bernard-Donals, 2016-03-25 Explores how the USHMM and other museums and memorials both displace and disturb the memories that they are trying to commemorate. Figures of Memory examines how the United States Holocaust Memorial Museum (USHMM) in Washington, DC, uses its space and the design of its exhibits to [move] its visitors to memory. From the objects and their placement to the architectural design of the building and the floor plan, the USHMM was meant to teach visitors about the Holocaust. But what Michael Bernard-Donals found is that while they learn, and remember, the Holocaust, visitors also call to mind other, sometimes unrelated memories. Partly this is because memory itself works in multidirectional ways, but partly it's because of decisions made in the planning that led to the creation of the museum. Drawing on material from the USHMM's institutional archive, including meeting minutes, architectural renderings, visitor surveys, and comments left by visitors, Figures of Memory is both a theoretical exploration of memory's relation to identity, space, and ethics and a practical analysis of one of the most discussed memorials in the United States. The book also extends recent discussions of the rhetoric of memorial sites and museums by arguing that sites like the USHMM don't so much [make a case for] events through the act of memorialization, but actually displace memory, disturbing it and the museum visitor so much so that they call it into question. Memory, like rhetorical figures, moves, and the USHMM moves its visitors, figuratively and literally, both to and beyond the events the museum is meant to

commemorate.
