when did bill nye die: Bill Nye's History of England Bill Nye, 2005-12-01 In those days agriculture, trade, and manufacturing were diversions during the summer months; but the regular business of life was warfare with the Danes, Scots, and Welsh. These foes of England could live easily for years on oatmeal, sour milk, and cod's heads, while the fighting clothes of a whole regiment would have been a scant wardrobe for the Greek Slave, and after two centuries of almost uninterrupted carnage their war debt was only a trifle over eight dollars.-from The Troublous Middle Ages One of the most beloved humorists of the late 19th century, Bill Nye was forced, by his untimely death, to leave unfinished his twisted history of England. But though he was able to tweak the Brits only through the era of King Henry VIII, this 1896 book is nevertheless a classic of historical satire, one that will delight fans of such works as 1066 and All That. Profusely illustrated by the witty cartoons of W. M. Goodes and A. M. Richards, Nye's cheeky humor as he rampages through the storied past of the Sceptred Isle is as clever as it is wily, demonstrating a shrewd understanding of human nature as the driving force of history. American writer EDGAR WILSON BILL NYE (1850-1896) also wrote Bill Nye's History of the United States, Bill Nye and Boomerang, and Forty Liars and Other Lies.

Now T. A. Larson, a dyed-in-the-wool Nye fan for more than thirty years, has assembled the best of Bill Nye's work, most of it dating from the seven Wyoming years when Nye made his name. The selections are chosen from Laramie, Cheyenne, and Denver newspapers and from six books published in the 1890's. The resulting collection is both good fun and a valuable picture of a lively period.

when did bill nye die: Bill Nye's Sparks Edgar Wilson Nye (Bill Nye), 2024-01-02 The amusing pieces in Bill Nye's Sparks were penned by Edgar Wilson Nye, writing under the pen name Bill Nye. Renowned American humourist and journalist Bill Nye was well-known for his sharp mind and caustic viewpoint on a wide range of topics. Readers can anticipate several amusing observations and commentary on society, daily life, and human behavior in Bill Nye's Sparks. To keep his audience entertained, Nye uses a unique comedic style that combines wordplay and satire. The pieces offer a light-hearted look at the peculiarities and eccentricities of late 19th-century American culture on a variety of subjects. Although the essays' exact subjects may differ, readers can always count on Nye's distinctive humour and his ability to make the mundane hilarious. The word Sparks in the title can imply that Nye's works are humorous or insightful sparks that cause others to laugh and think. Troops had no blankets, and straw was not to be had. It was extremely sad; but there was no wavering. Officers were approached by the enemy with from one hundred to one thousand pounds if they would accept and use their influence to effect a reconciliation; but, with blazing eye and unfaltering attitude, each stated that he was not for sale, and returned to his frozen mud-hole to rest and dream of food and freedom. Those were the untitled nobility from whom we sprung. Let us look over our personal record and see if we are living lives that are worthy of such heroic sires. Five minutes will now be given the reader to make a careful examination of his personal record. In the spring the joyful news came across the sea that, through the efforts of Benjamin Franklin, France had acknowledged the independence of the United States, and a fleet was on the way to assist the struggling troops. The battle of Monmouth occurred June 28. Clinton succeeded Howe, and, alarmed by the news of the French fleet, the government ordered

Clinton to concentrate his troops near New York, where there were better facilities for getting home. Washington followed the enemy across New Jersey, overtaking them at Monmouth. Lee was in command, and got his men tangled in a swamp where the mosquitoes were quite plenty, and, losing courage, ordered a retreat. Washington arrived at that moment, and bitterly upbraided Lee. He used the Flanders method of upbraiding, it is said, and Lee could not stand it. He started towards the enemy in preference to being there with Washington, who was still rebuking him. The fight was renewed, and all day long they fought. When night came, Clinton took his troops with him and went away where they could be by themselves...

Collecting 100-year-old lithographs attached to the inside lids of wooden cigar boxes is a gratifying hobby. This Jack Minor cigar box imitates a log house, not the typical venue for cigar makers who made plane wooden boxes for their cigar brands. Since the log house box is labelled Jack Miner, one presumes it was made in Canada because Jack Miner, from southwestern Ontario, was world-renowned as a Canadian conservationist banding thousands of migratory geese during his life. Acquired after Volume III of this four-volume series had gone to the printer, this rare cigar box is now displayed on the back cover of Volume III. Made, 1925, by B. R. Hahn, a member of the Isaak Walton League, Bay City, Michigan, this cigar maker wished to salute this Canadian with a custom-made cigar box. There are some 200 Isaak Walton League (see Volume II, page 81) Chapters across the U.S.A.
