wes moore education: *Discovering Wes Moore* Wes Moore, 2013-09-10 From the governor-elect of Maryland comes a story of two fatherless boys from Baltimore, both named Wes Moore. One is in prison, serving a life sentence for murder. The other is a Rhodes Scholar, an army veteran, and an author whose book is being turned into a movie produced by Oprah Winfrey. The story of "the other Wes Moore" is one that the author couldn't get out of his mind, not since he learned that another boy with his name—just two years his senior—grew up in the same Baltimore neighborhood. He wrote that boy—now a man—a letter, not expecting to receive a reply. But a reply came, and a friendship grew, as letters turned into visits and the two men got to know each other. Eventually, that friendship became the inspiration for *Discovering Wes Moore*, a moving and cautionary tale examining the factors that contribute to success and failure—and the choices that make all the difference. Two men. One overcame adversity. The other suffered the indignities of poverty. Their stories are chronicled in *Discovering Wes Moore*, a book for young people based on Wes Moore's bestselling adult memoir, *The Other Wes Moore*. Includes an 8-page photo insert. Praise for *Discovering Wes Moore* "Moore wisely opens the door for teens to contemplate their own

answers and beliefs, while laying out his own experiences honestly and openly.”—Publishers Weekly
“He argues earnestly and convincingly that young people can overcome the obstacles in their lives when they make the right choices and accept the support of caring adults.”—Kirkus Reviews

wes moore education: *The Other Wes Moore* Wes Moore, 2010-04-27 NEW YORK TIMES BESTSELLER • From the governor of Maryland, the “compassionate” (People), “startling” (Baltimore Sun), “moving” (Chicago Tribune) true story of two kids with the same name: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a spectacularly botched armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn’t shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they’d hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, *The Other Wes Moore* tells the story of a generation of boys trying to find their way in a hostile world.

wes moore education: *The Collectivity of Life* Joel Wendland, 2016-02-01 The *Collectivity of Life* is a study of autobiographical writing and oral histories situated in the late twentieth century United States. The central thesis is that by studying how the authors of these narratives articulate space in their stories, we can uncover a recurring critique of meritocratic individualism and reconstruct a counter-mythology that locates social mobility in collectivist experiences. Fourteen autobiographical works are studied, including those of Malcolm X, Audre Lorde, Barack Obama, and numerous other from multiple ethnic and several regions of the U.S., ranging from 1964 through 2008. More than 40 oral histories housed in archives in several regions of the country help to establish the book’s goal. By using a concept of space, this book shifts the focus of personal narrative from the internal resources of the individual to networks of support and collective efforts in the formation of their identities and the basis of their life accomplishments.

Jarvis, 2012 This timely volume explores essential themes, issues, and challenges related to adolescents' lives and learning in underserved urban areas. Distinguished scholars provide theoretically grounded, multidisciplinary perspectives on contexts and forces that influence adolescent development and achievement. The emphasis is on what is positive and effective, what can make a real difference in the lives and life chances for urban youths, rather than deficits and negative dysfunction. Going beyond solely traditional psychological theories, a strong conceptual framework addressing four domains for understanding adolescent development undergirds the volume: developmental continuities from childhood primary changes (biological, cognitive, social) contexts of development adolescent outcomes. A major federal government initiative is the development of programs to support underserved urban areas. Directly relevant to this initiative, this volume contributes significantly to gaining a realistic understanding of the contexts and institutions within which urban youths live and learn.

wes moore education: An Unbroken Educational Apartheid Legacy David E. Morgan Ph.D., 2015-03-17 This is a thought-provoking book on the black-white academic achievement gap in Chicago's predominantly black communities of color and what highly effective school boards can do to change it. In this book, the reader will be powerfully enlightened by a civil and human rights debate that calls for effective leadership in our schools, beginning with effective school boards. The primary agenda of effective school boards is raising student achievement performance levels and engaging the school district community to attain that goal. These instructive analyses of effective school board leadership builds on the research and wisdom of great leaders. Simultaneously, it develops a breath of fresh air for school reformers who seek to implement a new model and escape the insanity and pathology inherent in school board dysfunctions and violations of our civil and human rights which prevents progress in Chicago's south suburban communities of color. In both highs and lows of awesome moments, as educational reform leaders and school board members, we are in a strategic leadership position to help school boards carry out their essential responsibilities for creating equity and excellence in public education. In doing so, highly effective school leaders can team with our school board leaders to lead our school district communities in preparing all students to succeed in a rapidly changing global society. School board members doing the same things over and over again and then expecting different results in academic outcomes is the definition for insanity. Education is freedom. In an era of mass educational apartheid with its consequent mass incarceration of blacks that has surpassed the enforced chattel bondage of slavery's peak numbers in 1860, this book addresses a subject that is critically essential, timely, and in need of immediate attention for the security, success, and ultimate survival of black America. As the problems of the academic under-achievement gap is addressed in this book, it is also essential that school boards, educators, and community and national leaders accept reality, to view the problem in its true perspective, to contemplate it as it is, in providing essential solutions toward removing limiting and limited school boards' dysfunctions, obstructions, and other barriers to academic achievement in effective school board leadership. Supporting educational excellence will thereby produce more African American scholars in mathematics, science, and in many other disciplines. This book will provide information and focus on some key action areas that successful school boards in America and around the world have focused their attention on: Vision, Standards, Assessment, Resource Alignment, Climate, Collaboration, and Continuous Academic Improvement.

wes moore education: *The Work* Wes Moore, 2015-07-21 NEW YORK TIMES BESTSELLER • The acclaimed author of *The Other Wes Moore* and governor of Maryland continues his inspirational quest for a meaningful life and shares the powerful lessons—about self-discovery, service, and risk-taking—that led him to a new definition of success for our times. “This book is about how to make our journeys not just about surviving and succeeding, but about coming truly alive.”—Arianna Huffington *The Work* is the story of how one young man traced a path through the world to find his life's purpose. Wes Moore graduated from a difficult childhood in the Bronx and Baltimore to an adult life that would find him at some of the most critical moments in our recent history: as a combat officer in Afghanistan; a White House fellow in a time of wars abroad and disasters at home; and a Wall Street banker during the financial crisis. In this insightful book, Moore shares the lessons he learned from people he met along the way—from the brave Afghan translator who taught him to find his fight, to the resilient young students in Katrina-ravaged Mississippi who showed him the true meaning of grit, to his late grandfather, who taught him to find grace in service. Moore also tells the stories of other twenty-first-century change-makers who've inspired him in his search, from Daniel Lubetzky, the founder of KIND, to Esther Benjamin, a Sri Lankan immigrant who rose to help lead the Peace Corps. What their lives—and his own misadventures and moments of illumination—reveal is that our truest work happens when we serve others, at the intersection between our gifts and our broken world. That's where we find the work that lasts. An intimate narrative about finding meaning in a volatile age, *The Work* will inspire readers to see how we can each find our own path to purpose and help create a better world.

Each of us goes through periods of life that have a certain character—a few months or a few years, good times or difficult circumstances, times of brilliant joy or periods of dark clouds. Often we say, “It's just the season of life I'm in.” But did you know that just as God has purposes for the seasons of nature, he also uses seasons in your life to grow you, work with you, and talk to you? Richard Blackaby explains in *The Seasons of God* how understanding the principles of the seasons can offer us hope, direction, insight, and intimacy with God himself. It's a thoughtful exploration of God's patterns at work in our lives—how His will is being carried out in the best way...at the best time. Your plans, your relationships, your career, your ministry—all have their unique God-intended moment. God's Word expresses it this way: “For everything there is a season, and a time for every matter under heaven.” So what's your season of life? And what is God telling you through the season

you're in?

wes moore education: Handbook of Research on Character and Leadership Development in Military Schools Ryan, Mark Patrick, Weekes, Timothy L., 2021-01-22 Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders, and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills, and dispositions gained at those academies into higher education, the business world, military service, civic endeavors, and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school/college education and how those components successfully produce leaders of character for our military, civic, academic, and business worlds both in the United States and abroad. The *Handbook of Research on Character and Leadership Development in Military Schools* synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics, and other dimensions of both global and national, and both private and public, military academies. This book is ideal for current leaders, staffs, governing board members, and alumni of military academies both in the United States and internationally along with policymakers, government officials, practitioners, researchers, academicians, and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.

wes moore education: Neighborhood Democracy Richard Guarasci, 2023-07-03 Higher education and America stand at a perilous moment brought about by economic and social inequality, racism, and the fracture of civic cohesion and structures. From its origins, the mission of American higher education was to promote democratic governance and a free, fair, and orderly society through the education of responsible citizens. Just as its mission has become more urgent, it is being undermined as colleges and universities find themselves trapped in a fiscal crisis that threatens their very institutional viability—a crisis in large part brought about by the very perpetuation of economic and racial inequity, and the consequent erosion of consensus about civic purpose and vision. This book argues that higher education can and must again take leadership in promoting the participatory processes and instilling the democratic values needed to build a vibrant and fair society. How to do that when, as Guarasci argues, a majority of colleges and universities are floundering under a business model that generates insufficient net revenue while making college unaffordable? Guarasci offers a model of civic mission and engagement whereby, through relatively modest investment, colleges can develop reciprocal partnerships with local institutions, civic, and business groups to raise the quality and outcomes of K-12 education, promote local entrepreneurship and community involvement, raise incomes, and increase the attainment of
