garden of eden walkthrough: Topos in Utopia: A peregrination to early modern utopianism's space Sotirios Triantafyllos, 2021-09-07 'Topos in Utopia' examines early modern literary utopias' and intentional communities' social and cultural conception of space. Starting from Thomas More's seminal work, published in 1516, and covering a period of three centuries until the emergence of Enlightenment's eudaimonia, this work provides a thorough yet concise examination of the way space was imagined and utilised in the early modern visions of a better society. Dealing with an aspect usually ignored by the scholars of early modern utopianism, this book asks us to consider if utopias' imaginary lands are based not only on abstract ideas but also on concrete spaces. Shedding new light on a period where reformation zeal, humanism's optimism, colonialism's greed and a proto-scientific discourse were combined to produce a series of alternative social and political paradigms, this work transports us from the shores of America to the search for the Terra Australis Incognita and the desire to find a new and better world for us.

garden of eden walkthrough: Righting America at the Creation Museum Susan L. Trollinger, William Vance Trollinger, 2016-05-15 In *Righting America at the Creation Museum*, Susan L. Trollinger and William Vance Trollinger, Jr., take readers on a fascinating tour of the museum. The Trollingers vividly describe and analyze its vast array of exhibits, placards, dioramas, and videos, from the Culture in Crisis Room, where videos depict sinful characters watching pornography or considering abortion, to the National Selection Room, where placards argue that natural selection doesn't lead to evolution. The book also traces the rise of creationism and the history of fundamentalism in America.

garden of eden walkthrough: Creating the Creation Museum Kathleen C. Oberlin, 2020-12-15 Investigates how the Christian fundamentalist movement brings Creationism into the mainstream through a Kentucky museum In *Creating the Creation Museum*, Kathleen C. Oberlin shows us how the largest Creationist organization, Answers in Genesis (AiG), built a museum—which has had over three million visitors—to make its movement mainstream. She takes us behind the scenes, vividly bringing the museum to life by detailing its infamous exhibits on human fossils, dinosaur remains, and more. Drawing on over three years of research at the Creation Museum, where she was granted rare access to AiG's leadership, Oberlin examines how the museum convincingly reframes scientific facts, such as modeling itself on traditional natural history museums. Through a unique historical dataset of over 1,000 internal documents from creationist organizations and an analysis of media coverage, *Creating the Creation Museum* shows how the museum works as a site of social movement activity and a place to contest the secular mainstream. Oberlin ultimately argues that the Creation Museum has real-world consequences in today's polarized era.

garden of eden walkthrough: Contemporary Architecture and the Digital Design Process Peter Szalapaj, 2014-04-23 Contemporary Architecture and the Digital Design Process introduces the reader to new developments in the computer modelling of design form in contemporary architectural practice through a series of detailed case studies. The book illustrates how evolving design practices use and exploit the potential of new computing technologies in a wide range of areas and application. A central thesis of this book is that technology follows design demand, rather than design adjusting to available new technology. Designers are not merely passive recipients of prescribed computing tools and techniques. Instead, they are increasingly able to express their intuitive design ideas through the rational medium of computing. The book features several contemporary building projects, each of which introduces a range of CAD and computing issues based upon the work of creative architectural and engineering design practices. These include the offices of Frank O. Gehry, Peter Cook and Colin Fournier, Anthony Hunt Associates, Peter Hubner, Szyskowitz-Kowalski, and Faulkner Brown. All these examples show what architects need to know and the skills they need to acquire to use advanced CAD technology.
