Landow described a radically new information technology and its relationship to the work of such literary theorists as Jacques Derrida and Roland Barthes. Now Landow has brought together a distinguished group of authorities to explore more fully the implications of hypertextual reading for contemporary literary theory. Among the contributors, Charles Ess uses the work of Jürgen Habermas and the Frankfurt School to examine hypertext's potential for true democratization. Stuart Moulthrop turns to Deleuze and Guattari as a point of

departure for a study of the relation of hypertext and political power. Espen Aarseth places hypertext within a framework created by other forms of electronic textuality. David Kolb explores what hypertext implies for philosophy and philosophical discourse. Jane Yellowlees Douglas, Gunnar Liestol, and Mireille Rosello use contemporary theory to come to terms with hypertext narrative. Terrence Harpold investigates the hypertextual fiction of Michael Joyce. Drawing on Derrida, Lacan, and Wittgenstein, Gregory Ulmer offers an example of the new form of writing hypertextuality demands.

hyper tough manuals: *Hollywood and Israel* Tony Shaw, Giora Goodman, 2022-03-08 Winner, 2023 Shapiro Best Book Award, Association for Israel Studies From Frank Sinatra's early pro-Zionist rallying to Steven Spielberg's present-day peacemaking, Hollywood has long enjoyed a "special relationship" with Israel. This book offers a groundbreaking account of this relationship, both on and off the screen. Tony Shaw and Giora Goodman investigate the many ways in which Hollywood's moguls, directors, and actors have supported or challenged Israel for more than seven decades. They explore the complex story of Israel's relationship with American Jewry and illuminate how media and soft power have shaped the Arab-Israeli conflict. Shaw and Goodman draw on a vast range of archival sources to demonstrate how show business has played a pivotal role in crafting the U.S.-Israel alliance. They probe the influence of Israeli diplomacy on Hollywood's output and lobbying activities, but also highlight the limits of ideological devotion in high-risk entertainment industries. The book details the political involvement with Israel—and Palestine—of household names such as Eddie Cantor, Kirk Douglas, Elizabeth Taylor, Barbra Streisand, Vanessa Redgrave, Arnold Schwarzenegger, Robert De Niro, and Natalie Portman. It also spotlights the role of key behind-the-scenes players like Dore Schary, Arthur Krim, Arnon Milchan, and Haim Saban. Bringing the story up to the moment, Shaw and Goodman contend that the Hollywood-Israel relationship

might now be at a turning point. Shedding new light on the political power that images and celebrity can wield, Hollywood and Israel shows the world's entertainment capital to be an important player in international affairs.
