marine corps manuals: 21st Century U.S. Military Manuals Department of Defense, U. S. Military, U. S. Marine Corps (USMC), 2017-11-26 This U.S. Marine Corps manual is to be used as a tool to help ensure that the values of the Corps continue to be reinforced and sustained in all Marines after being formally instilled in entry level training. This document is a compendium of discussion guides developed and used by Marine Corps formal schools. The guides are part of the formal inculcation of values in young Marines, enlisted and officer, during the entry level training process. This guide is designed to be used as a departure point for discussing the topics as a continuation of the process of sustaining values within the Marine Corps. The User's Guide also serves as a resource for leaders to understand the talk and the walk expected of them as leaders.

New graduates of the Recruit Depots and The Basic School have been exposed to these lessons and expect to arrive at their first duty assignments and MOS schools to find these principles and standards exhibited in the Marines they encounter. Leaders must remember that as long as there is but one Marine junior to them, they are honor bound to uphold the customs and traditions of the Corps and to always walk the walk and talk the talk. We are the parents and older siblings of the future leaders of the Marine Corps. America is depending on us to ensure the Marines of tomorrow are ready and worthy of the challenges of this obligation. Teaching, reinforcement, and sustainment of these lessons can take place in the field, garrison, or formal school setting. Instructional methodology and media may vary depending on the environment and location of the instruction. However, environment should not be considered an obstacle to the conduct or quality of the instruction. This guide has been developed as a generic, universal training tool that is applicable to all Marines regardless of grade. Discussion leaders should include personal experiences that contribute to the development of the particular value or leadership lesson being discussed. As a bonus, this reproduction includes the Marine Corps Manual, the basic publication of the United States Marine Corps issued by the Commandant of the Marine Corps and approved by the Secretary of the Navy - sold separately for \$7.99. marine corps manuals: *21st Century U.S. Military Manuals* Department of Defense, U. S. Military, U. S. Marine Corps, 2017-09-26 This U.S. Marine Corps doctrinal manual covers command and control. It describes a theory and philosophy of command and control for the U.S. Marine Corps. Put very simply, the intent is to describe how we can reach effective military decisions and implement effective military actions faster than an adversary in any conflict setting on any scale. In so doing, this publication provides a framework for all Marines for the development and exercise of effective command and control in peace, in crisis, or in war. This publication represents a firm commitment by the Marine Corps to a bold, even fundamental shift in the way we will view and deal with the dynamic challenges of command and control in the information age. The Marine Corps' view of command and control is based on our common understanding of the nature of war and on our warfighting philosophy, as described in Marine Corps Doctrinal Publication 1, Warfighting. It takes into account both the timeless features of war as we understand them and the implications of the ongoing information explosion that is a consequence of modern technology. Since war is fundamentally a clash between independent, hostile wills, our doctrine for command and control accounts for animate enemies actively interfering with our plans and actions to further their own aims. Since we recognize the turbulent nature of war, our doctrine provides for fast, flexible, and decisive action in a complex environment characterized by friction, uncertainty, fluidity, and rapid change. Since we recognize that equipment is but a means to an end and not the end itself, our doctrine is independent of any particular technology. Taking a broad view that accounts first for the human factors central in war, this doctrine provides a proper framework for designing, appraising,

and deploying hardware as well as other components of command and control support.

marine corps manuals: Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References , Over 5,300 total pages MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When

properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. marine corps manuals: 21st Century U.S. Military Manuals Department of Defense, U. S. Military, U. S. Marine Corps, 2017-09-26 This publication is about winning in combat. Winning requires many things: excellence in techniques, an appreciation of the enemy, exemplary leadership, battlefield judgment, and focused combat power. Yet these factors by themselves do not ensure success in battle. Many armies, both winners and losers, have possessed many or all of these attributes. When we examine closely the differences between victor and vanquished, we draw one conclusion. Success went to the armies whose leaders, senior and junior, could best focus their efforts--their skills and their resources--toward a decisive end. Their success arose not merely from excellence in techniques, procedures, and material but from their leaders' abilities to uniquely and effectively combine them. Winning in combat depends upon tactical leaders who can think creatively and act decisively. This book pertains equally to all Marine leaders, whether their duties entail combat service support, combat support, or combat arms. It applies to the Marine air-ground task force commander as well as the squadron commander and the fire team leader. All Marines face tactical decisions in battle regardless of their roles. Tactical leaders must develop and hone their warfighting skills through study and practice. This publication serves as a guide for that professional development. It addresses the theory of tactics and its application in a chaotic and uncertain

environment. The concepts and ideas within this publication are battle-tested. Throughout our history, one of the most important reasons for the success of the United States Marine Corps has been the military skill of our leaders at every level of command. Through their tactical skill and battlefield judgment, our commanders achieved tactical and operational advantage at the decisive time and place.

marine corps manuals: 21st Century U.S. Military Manuals Department of Defense, U. S. Military, U. S. Marine Corps, 2018-03-21 Afoot in the Desert, Desert Survival, Deserts of the World Marine Corps Field Manual (FMFRP 0-53) provides information about individual survival in desert theaters of operation. This manual explains some scientific theories on how plants, animals, and humans adapt to dry climates. It deepens understanding of how individuals may live, travel, and conduct themselves with others they may meet in the deserts. A survival expert once said, The Arabs don't know much about survival in the desert. Of course not! They just live there! You can live there too if you get rid of fear, forget the superstitions and popular fallacies you learned from desert adventure romances, and know a few of the facts of life about deserts. Respect the desert but don't be afraid of it. Don't keep water in your canteen and weaken yourself when you can drink that water and maintain your efficiency. Would you be so foolish as to sap your strength by purposely cutting an artery just so you could practice using a tourniquet? Of course not. Learn the facts about your body needs of water and practice the horse sense those facts will give you. Separate truth from the old wives' tales about the lands of little water. If you do that, you may get to like the desert instead of fearing it.

marine corps manuals: 21st Century U.S. Military Manuals Department of Defense (DoD), U. S. Military, U. S. Marine Corps (USMC), U. S. Army, 2018-04-04 These three USMC documents cover chaplain training and religious ministry: Religious Ministry Team (RMT) Training and Readiness Manual *Religious Ministry Team Handbook * Religious Ministry Support in the U.S. Marine Corps. The purpose of the Marine Corps Ground Training and Readiness (T&R) program is to provide the commander with training standards for all ground personnel. The goal is to develop Religious Ministry Team (RMT) capabilities for ministry in expeditionary environments. The performance standards are designed to ensure proficiency in core competencies. An effective T&R program is the first step in providing a commander with a RMT capable of providing religious ministry in support of a unit's wartime mission. The T&R program provides the fundamental tools for commanders to build and maintain RMT combat readiness. Using these tools, training managers can construct and execute an effective training plan that supports both unit and RMT mission essential task lists (METL). Marine Corps Reference Publication (MCRP) 6-12A, Religions Ministry Team Handbook, guides commanders, chaplains, Religious Program Specialists (RPs), and lay leaders in providing religious ministry and effective command religious programs (CRPs). It builds on the operational religious ministry principles in Marine Corps Warfighting Publication (MCWP) 6-12, Religious Ministry Support in the U.S. Marine Corps, and lessons learned from chaplains who ministered in war and peace. MCRP 6-12A clarifies the tasks and functions of the religious ministry team (RMT). It is a ready access to the tools RMTs need to perform their duties in today's expeditionary forces. Religious ministry in the Marine Corps is a combination of technique, common sense, art, experience, and caring about Marines and their families in garrison while being operationally ready at all times in every clime and place. Religious Ministry Support in the U.S. Marine Corps - As Lieutenant General Knutson noted in his foreword, this publication describes the Chaplain Corps' philosophy of providing ministry to the Marine Corps. This ministry is possible because of the partnership formed by the U.S. Marine Corps and the U.S. Navy Chaplain Corps, forged in freedom and tempered in the adversities faced together over two centuries of chaplains serving with Marines. It is my hope that this keystone publication will give commanders and chaplains a clear understanding of the purpose, mission, and principles of religious ministry support and religious accommodation. This, and subsequent publications, will serve as the tools that will enable religious ministry teams to continue to provide the highest quality pastoral care to Marines, Sailors, and their families.

marine corps manuals: Small Wars Manual United States Marine Corps, 2023-11-23 The Small Wars Manual is a seminal work produced by the United States Marine Corps that articulates the principles and strategies of irregular warfare, encapsulating the essence of counterinsurgency and cohesive military organization in conflict scenarios. Written during World War II, the manual is characterized by its direct, pragmatic prose and a commitment to presenting actionable guidelines rather than abstract theories. It serves as a pivotal resource for military practitioners, emphasizing the importance of understanding local cultures and the socio-political dynamics that influence warfare in small, often asymmetric conflicts. The text is rich with historical references and practical case studies that illuminate the complexities of operations in environments marked by instability and resistance to conventional military approaches. The authorship of the Small Wars Manual is attributed to the collective expertise of the Marine Corps, drawing on insights gathered from prior conflicts, including the Philippines and Nicaragua, and reflecting the urgent need for adaptation in tactics and strategy in the face of evolving threats. The manual emerged from a period when traditional notions of warfare were being challenged, meriting its significance as a counterpoint to large-scale engagements seen in the early 20th century. This indispensable text is highly recommended for military professionals, historians, and scholars interested in understanding the nuances of irregular warfare. Its enduring relevance provides essential lessons in modern military operations and a foundational understanding for contemporary conflicts, making it a crucial addition to the library of anyone engaged in security studies, policy formulation, and military strategy.
