hunter test prep: Twilight of the Elites Chris Hayes, 2013-06-11 A powerful and original argument that traces the roots of our present crisis of authority to an unlikely source: the meritocracy. Over the past decade, Americans watched in bafflement and rage as one institution after another – from Wall Street to Congress, the Catholic Church to corporate America, even Major League Baseball – imploded under the weight of corruption and incompetence. In the wake of the Fail Decade, Americans have historically low levels of trust in their institutions; the social contract between ordinary citizens and elites lies in tatters. How did we get here? With *Twilight of the Elites*, Christopher Hayes offers a radically novel answer. Since the 1960s, as the meritocracy elevated a more diverse group of men and women into power, they learned to embrace the accelerating inequality that had placed them near the very top. Their ascension heightened social distance and spawned a new American elite—one more prone to failure and corruption than any that came before it. Mixing deft political analysis, timely social commentary, and deep historical understanding, *Twilight of the Elites* describes how the society we have come to inhabit – utterly forgiving at the top and relentlessly punitive at the bottom – produces leaders who are out of touch with the people they have been trusted to govern. Hayes argues that the public's failure to trust the federal government, corporate America, and the media has led to a crisis of authority that threatens to engulf not just our politics but our day-to-day lives. Upending well-worn ideological and partisan categories, Hayes entirely reorients our perspective on our times. *Twilight of the Elites* is the defining work of social criticism for the post-bailout age.

hunter test prep: The Cult of Smart Fredrik deBoer, 2020-08-04 Named one of *Vulture's* Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the *Cult of Smart* is destroyed.
