vista higher learning spanish textbooks: *The Handbook of Technology and Second Language*

Teaching and Learning Carol A. Chapelle, Shannon Sauro, 2017-06-28 The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.

vista higher learning spanish textbooks: Current Perspectives in Spanish Lexical Development Irene Checa-García, Laura Marqués-Pascual, 2023-10-04 New quantitative methodology and the development of corpus and experimental linguistics tools have recently made researching lexical comprehension and production more accessible. While several tools and data sets are available in English (Coh-metrix, CELEX) and a few other languages, the development of resources and empirical research is still lacking in Spanish. This volume brings together original empirical research and theoretical perspectives that examine lexical development in Spanish L1, L2 and L3, with a focus on different teaching approaches and textbook coverage of Spanish lexicon in L2 curricula and the use of corpus linguistics in methodological investigations. Some questions addressed include the role of lexical development in mapping grammatical acquisition phases, the potential transfers of L1 to L2 lexical abilities, the effect of explicit vocabulary learning techniques in L2, how affective meaning modulates L2 acquisition, or how a typological understanding of lexical organization can help in teaching more effectively the lexicon of a language, among many others. The book offers an overview of what is currently being done in the field of Spanish lexical acquisition through a myriad of approaches and topics.

vista higher learning spanish textbooks: *AfroLatinas and LatiNegras* Concetta Bondi, Rosita Scerbo, 2022-11-28 AfroLatinas as a subject of scholarship are woefully underrepresented, and this edited volume, *AfroLatinas and LatiNegras: Culture, Identity, and Struggle from an Intersectional Perspective*, offers an important and timely intervention. The consistent attention to AfroLatinas' agency across all the chapters is empowering and attentive to the difficult circumstances of asserting that agency, and to the tremendous breadth of what agency can look like. The authors argue for the analytical power of the concept of Intersectionality while considering the hegemonic pressures on AfroLatinidad and the essentializing moves that an intersectional approach enables: evading, overthrowing, and resisting systems of power. Through the study of multiple cultural expressions of Blackness, such as photography, colonial inquisition records, dance, music, fiction, non-fiction, poetic memoir, and religious expression, and throughout different region of the

Americas, the chapter contributors of this book consider the relationship that social and historical processes, such as sovereignty and colonialism, have on narrative and cultural production. Rosita Scerbo, Concetta Bondi, and the contributors acknowledge that racial and gender equity cannot exist without Intersectionality, and the inclusion of activist voices broadens this volume's reach and links theory to praxis.

vista higher learning spanish textbooks: **New Methodological Approaches to Foreign Language Teaching** Thomas H. Schmidt, Laura Torres-Zúñiga, 2017-06-23 This volume explores how the traditional academic disciplines of linguistics, translation, literature and cultural studies can contribute to, or be integrated into, the teaching of a foreign language by means of innovative methodologies, techniques and instruments. The book begins with a selection of essays on applied linguistics that share some significant findings in the context of second or foreign language acquisition. It then examines the ways in which linguistics, translation theory, literature and cultural studies are brought into the foreign language classroom not just as objects of study but also as vehicles for language-learning. By presenting studies on four main foreign languages, English, Spanish, French and German, the collection offers, to the foreign language profession, an opportunity for the sharing and comparison of strategies across languages at both the secondary and higher education level. The text is a valuable resource for language teachers with a more philologically-oriented background who would like to learn how to apply their research knowledge and experience to the design and implementation of new methodological approaches.

vista higher learning spanish textbooks: **The Metalinguistic Dimension in Instructed Second Language Learning** Karen Roehr, Gabriela Adela Ganem-Gutierrez, 2013-07-04 The metalinguistic dimension refers to the way in which learners bring to bear knowledge about language into their learning of a second language, the L2. This book brings together new research on the metalinguistic dimension, given its increasing importance in the study of L2 acquisition. In applied linguistics it is widely accepted that L2 learners develop and use knowledge about language

when engaging with the challenging task of acquiring a new language; this applies to both children and adults. It is definitions of the metalinguistic dimension that vary, and findings regarding its role in L2 learning are not necessarily homogenous or compatible. The scope exists for further, empirical, detailed research. This book explores the nature, development and role of the metalinguistic dimension and will be essential reading for all SLA scholars and those working in language and education.
