booksmart textbooks: World Yearbook of Education 2015 Agnès van Zanten, Stephen J. Ball, Brigitte Darchy-Koechlin, 2015-02-11 This latest volume in the World Yearbook of Education Series focuses on educational elites and inequality, focusing particularly on the ways in which established and emergent groups located at the top of the social hierarchy and power structure reproduce, establish or redefine their position. The volume is organized around three main issues: analyzing the way in which parents, students and graduates in positions of social advantage use their assets and capitals in relation to educational strategies, and how these are different for old and new and cultural and economic elites; studying how elite institutions have adapted their strategies to take into account changes in the social structure, in policy and in their institutional environment and exploring the impact of these strategies on educational systems at the national and global levels; mapping the new global dynamics in elite education and how new forms of 'international education' and 'transnational cultural capital' as well as new global educational elite pathways shape elite students' identities, status and trajectories. Making use of a social and an institutional approach as well as a focus on practices and policies, the volume draws on research conducted on secondary schools and on higher education. In addition, the global contributions within the book allow for a comparison and contrast of situations in different countries. This results in a comprehensive picture of common processes and national differences concerning advantage and excellence and a thorough examination of the impact of globalization on the strategies, identities and trajectories of elite groups and individuals alongside more general cultural and economic processes.

booksmart textbooks: Criminalisation of Dissent in Times of Crisis Anna Di Ronco, Rossella Selmini, 2024-12-26 This book provides a wide-ranging, global exploration of policies and practices which have sought to undermine dissent during recent and less recent social, political, economic and health 'crises'. Examining various cases of activism and opposition from both the Global North and the Global South, and drawing on multi-disciplinary insights, this book analyses the many ways in which state and non-state actors have targeted dissent, activism and protest, including by vulnerable groups. This includes strategies that have silenced dissenting opinions, restricted the right to protest, intensified policing practices and the surveillance of activists, imposed onerous administrative fines, criminalised and prosecuted dissenters, and even killed activists. Fundamentally, this volume considers 'criminalisation' as a process that develops on a continuum of control and repressive practices that aim to undermine dissent. It contributes to the broader discussion on criminalisation processes, policing, the rule of law, and the quality of our democracies.

booksmart textbooks: Understanding World Religions Irving Hexham, 2011-03-22

Globalization and high-speed communication put twenty-first century people in contact with adherents to a wide variety of world religions, but usually, valuable knowledge of these other traditions is limited at best. On the one hand, religious stereotypes abound, hampering a serious exploration of unfamiliar philosophies and practices. On the other hand, the popular idea that all religions lead to the same God or the same moral life fails to account for the distinctive origins and radically different teachings found across the world's many religions. Understanding World Religions presents religion as a complex and intriguing matrix of history, philosophy, culture, beliefs, and practices. Hexham believes that a certain degree of objectivity and critique is inherent in the study of religion, and he guides readers in responsible ways of carrying this out. Of particular importance is Hexham's decision to explore African religions, which have frequently been absent from major religion texts. He surveys these in addition to varieties of Hinduism, Buddhism, Judaism, Christianity, and Islam.

He had to pay it all back in the Great Depression of the 1930's. He just happened to mention this at the dinner table to the startled Irish mother of six children. Throughout a 50 year marital adventure, what follows is the magic of show business, the might of small manufacturing and the magnitude of a devoted family and fascinating loyal friends who find themselves 100 years later, still wondering how it all plays out.

Antonio has turned his struggles into a career in the NBA, but when a devastating injury sidelines his basketball career and he finds out he has been duped out of millions by his best friend, Antonio is forced to turn to the father who never claimed him. Her father is a well-respected politician who is not happy when his daughter falls in love with a man who represents everything the senator despises. But Paige's father harbors many secrets of his own, including one that will soon rock his family to the core. In spite of their own marital issues, Paige's parents try to exert pressure on her to leave Antonio. She lets love guide her, and despite her parents' threats to disinherit her, she marries Antonio anyway.
