tuttle twins workbooks: Passion-Driven Education Connor Boyack, 2016-08-16 Do you need parenting advice on how to inspire your child to love learning? Whether you homeschool or send your kids to public or private school, this is essential reading for your situation. Why? Because schooling has become a disaster. Your child's interests and uniqueness are disregarded, and structured curriculum and standards like Common Core place them on a conveyor belt that treats all children the same. This system crushes a child's curiosity. Your child deserves better! There is a better way: one that ensures your child sees learning as a joy and provides you, the parent, with a much less stressful way to educate and empower your son or daughter. In this book, Connor Boyack shares the exciting philosophy and empowering day-to-day steps involved in passion-driven education. A child's curiosity and natural desire to learn are like a tiny flame, easily extinguished unless it's protected and given fuel. This book will help you as a parent both protect that flame of curiosity and supply it with the fuel necessary to make it burn bright throughout your child's life. Let's ignite our children's natural love of learning! Five Things Discussed in the Book What's the problem with schools? Whether public, private, or home, schooling is structured in a way that has significant negative outcomes for children academically, psychologically, and emotionally. To understand the solutions, you first need to review these problems. What's your goal? Too many parents simply send their children to school out of ritual and expectation, without thinking about the end result. Caring parents must ponder the outcomes of education and what they want their children to become. Once goals are established, we can make a plan. I need solutions! It's easy to point out problems with schooling. It's more important that we review serious and attainable solutions that can help you educate your child and preserve (or restore) their natural love of learning. What are the alternatives? If schools are inherently problematic and crush a child's curiosity, what can be done? We'll review several differing approaches to education that incorporate some of the solutions listed earlier. Passion-driven education The best way to educate a child is to speak to them in a language they already understand, using their personal interests as a hook to make other subjects interesting and relevant. We'll review some examples and then give you an action plan.
