**catholic workbooks:** *Books and Prints at the Heart of the Catholic Reformation in the Low Countries (16th-17th Centuries)* Renaud Adam, Rosa De Marco, Malcolm Walsby, 2022-10-24 Often considered the advent of mass media, the use of books and prints by Protestants has been widely studied and has generated a rich and plentiful bibliography. In contrast, the production and use of the same media by the proponents of the Counter-Reformation have not received the attention they deserve, especially in the context of the Low Countries. The twelve chapters in this volume provide new perspectives on the efficacy of the handpress book industry to support the Catholic strategy in the Spanish Low Countries and underline the mutually beneficial relationship between the Counter-Reformation and the typographic world. This volume represents an important contribution to our understanding of the sociocultural and socioeconomic background of the Catholic Netherlands.

**catholic workbooks:** *Catalogues of Books* Jonathan Edwards, 2008-01-01 This final volume in The Works of Jonathan Edwards publishes for the first time Edwards' "Catalogue," a notebook he kept of books of interest, especially titles he hoped to acquire, and entries from his "Account Book," a ledger in which he noted books loaned to family, parishioners, and fellow clergy. These two records, along with several shorter documents presented in the volume, illuminate Edwards' own mental universe while also providing a remarkable window into the wider intellectual and print cultures of the eighteenth-century British Atlantic. An extensive critical introduction places Edwards' book lists in the contexts that shaped his reading agenda, and the result is the most comprehensive treatment yet of his reading and of the fascinating peculiarities of his time and place.

**catholic workbooks:** *The Cambridge History of the Book in Britain* Richard Gameson, Nigel J. Morgan, D. F. McKenzie, Lotte Hellinga, Rodney M. Thomson, John Barnard, Joseph Burney Trapp, Maureen Bell, David McKitterick, 1999 Volume 4 of The Cambridge History of the Book in Britain covers the years between the incorporation of the Stationers' Company in 1557 and the lapsing of the Licensing Act in 1695. In a period marked by deep religious divisions, civil war and the uneasy settlement of the Restoration, printed texts - important as they were for disseminating religious and political ideas, both heterodox and state approved - interacted with oral and manuscript cultures.

These years saw a growth in reading publics, from the developing mass market in almanacs, ABCs, chapbooks, ballads and news, to works of instruction and leisure. Atlases, maps and travel literature overlapped with the popular market but were also part of the project of empire. Alongside the creation of a literary canon and the establishment of literary publishing there was a tradition of dissenting publishing, while women's writing and reading became increasingly visible.

**catholic workbooks: Publishers, Censors and Collectors in the European Book Trade, 1650-1750** Ann-Marie Hansen, Arthur der Weduwen, 2024-03-18 This edited volume explores the development of the European book world between 1650 and 1750, concentrating on changes in publishing strategies, practices of censorship, the circulation of second-hand books and the building of libraries. Its essays discuss this critical, but much neglected period of print history through case studies from Spain, Italy, France, the Holy Roman Empire, Britain and the Netherlands. Ranging from the posthumous publication of Galileo to the regulation of the book auction market, this volume demonstrates that the century between 1650 and 1750 was a transformative period for the history of the printed book.

**catholic workbooks: The Oxford History of the Irish Book, Volume IV** James H. Murphy, 2011-09 Volume IV: The Irish Book in English 1800-1891 details the story of the book in Ireland during the nineteenth century, when Ireland was integrated into the United Kingdom. The chapters in this volume explore book production and distribution and the differing of ways in which publishing existed in Dublin, Belfast, and the provinces.

**catholic workbooks: The Rise of Liberal Religion** Matthew Hedstrom, 2013 Winner of the Frank S. and Elizabeth D. Brewer Best First Book Prize of the American Society of Church History Society for U. S. Intellectual History Notable Title in American Intellectual History The story of liberal religion in the twentieth century, Matthew S. Hedstrom contends, is a story of cultural ascendancy. This may come as a surprise-most scholarship in American religious history, after all, equates the numerical decline of the Protestant mainline with the failure of religious liberalism. Yet a look beyond the pews, into the wider culture, reveals a more complex and fascinating story, one Hedstrom tells in *The Rise of Liberal Religion*. Hedstrom attends especially to the critically important yet little-studied arena of religious book culture-particularly the religious middlebrow of mid-century-as the site where religious liberalism was most effectively popularized. By looking at book weeks, book clubs, public libraries, new publishing enterprises, key authors and bestsellers, wartime reading programs, and fan mail, among other sources, Hedstrom is able to provide a rich, on-the-ground account of the men, women, and organizations that drove religious liberalism's cultural rise in the 1920s, 1930s, and 1940s. Critically, by the post-WWII period the religious middlebrow had expanded beyond its Protestant roots, using mystical and psychological spirituality as a platform for interreligious exchange. This compelling history of religion and book culture not only shows how reading and book buying were critical twentieth-century religious practices, but also provides a model for thinking about the relationship of religion to consumer culture more broadly. In this way, *The Rise of Liberal Religion* offers both innovative cultural history and new ways of seeing the imprint of liberal religion in our own times.

**catholic workbooks:** *Early Modern Catholicism and the Printed Book* Justyna Kiliańczyk-Zięba, Magdalena Komorowska, 2024-02-12 This collection of essays engages with a variety of aspects of early modern book culture in the 16th-17th centuries, considered in the Catholic context. The contributions reflect on the engagement of institutions and authorities in the process of book production, bringing to the fore the role of networks in this process; show the book as a tool of resistance to the Protestant Reformation; give insight into the content and design of book collections; showcase textual production in the context of cultural appropriation and shed light on the role of the image in the propagation of Catholicism. Together the sixteen contributions demonstrate the diversity of the Catholic book in its forms and functions, in various social and national contexts.
