This book re-reads the tangled relations of book culture and literary culture in the early nineteenth century by restoring to view the figure of the bookman and the effaced history of his book clubs. As outliers inserting themselves into the matrix of literary production rather than remaining within that of reception, both provoked debate by producing, writing, and circulating books in ways that expanded fundamental points of literary orientation in lateral directions not coincident with those of the literary sphere. Deploying a wide range of historical, archival and literary materials, the study combines the history and geography of books, cultural theory, and literary history to make visible a bookish array of alternative networks, genres, and locations that were obscured by the literary sphere in establishing its authority as arbiter of the modern book.

8 textbooks: History of the Book in Australia Volume 3 Craig Munro, 2006-07 This new volume in UQP's History of the Book in Australia series explores Australian book production and consumption from 1946 to the present day. In the immediate postwar era, most books were imported into a colonial market dominated by British publishers. Paper Empires traces this fascinating and volatile half-century, using wide-ranging research, oral history and memoir to explore the worlds of book publishing, selling and reading. After 1945, Australian publishing went from a handful of fledgling businesses to the billion dollar industry of today with thousands of new titles each year and a vast array of imported books. Publishing's postwar expansion began with the baby boom and the increased demand for school texts, with independent houses blossoming during the 1960s and 70s followed by the current era dominated by global conglomerates. All aspects of print culture are explored, from authorship and editing to bookselling, libraries and reading habits, in the context of today's rapidly changing publishing landscape with its many technological challenges. A wide range of expert contributors, including book-trade practitioners, have produced this lively and indispensable account of our vital cultural industry.
