best middle school math textbooks: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-29 In an era when corporate and political leaders are using their power to control every aspect of the schooling process in North America, there has been surprisingly little research on the impact of textbook content on students. The contributors of this volume and its partner (The New Politics of the Textbook: Problematizing the Portrayal of Marginalized Groups in Textbooks) guide educators, school administrators, academics, and other concerned citizens to unpack the political, social, and cultural influences inherent in the textbooks of core content areas such as math, science, English, and social science. They urge readers to reconsider the role textbooks play in the creation of students' political, social, and moral development and in perpetuating asymmetrical social and economic relationships, where social actors are bestowed unearned privileges and entitlements based upon their race, gender, sexuality, class, religion and linguistic background. Finally, they suggest ways to resist the hegemony of those texts through critical analyses, critical questioning, and critical pedagogies.

best middle school math textbooks: African-American Teens Discuss Their Schooling Experiences Gail L. Thompson, 2002-01-30 For decades, researchers and policymakers have grappled with the issue of the underachievement of African American students. An age-old problem has been that these students on average lag behind their peers of other racial/ethnic groups in math, science, and reading. Recently, California, like some other states, has implemented a high-stakes standardized testing program that has revealed that when test scores are disaggregated along racial/ethnic lines, the scores of African American students continue to trail those of their peers. The study described in this book was undertaken in an effort to uncover schooling practices that are advantageous or detrimental to the achievement of African American students. The study was based on interviews and questionnaire results from nearly 300 African American high school seniors. Most of these students resided in a region that had a low college attendance rate and a high child poverty rate. The students were given an opportunity to discuss numerous issues pertaining to their schooling experiences, including teacher attitudes and expectations, the curriculum, homework practices, the quality of services provided by their high school counselors, racism at school, school safety, parental involvement, and their early reading habits and attitudes about reading. In addition to quantitative results, most chapters include detailed narratives describing the elementary and secondary schooling experiences of the interviewees.

best middle school math textbooks: *The Imperfect and Unfinished Math Teacher [Grades K-12]* Chase Orton, 2022-02-24 The system won't do it for us. But we have each other. In The Imperfect and Unfinished Math Teacher: A Journey to Reclaim Our Professional Growth, master storyteller Chase Orton offers a vulnerable and courageous grassroots guide that leads K-12 math teachers through a journey to cultivate a more equitable, inclusive, and cohesive culture of professionalism for themselves...what he calls professional flourishing. The book builds from two bold premises. First, that as educators, we are all naturally imperfect and unfinished, and growth should be our constant goal. Second, that the last 40 years of top-down PD efforts in mathematics have rarely supplied teachers with what they need to equitably grow their practice and foster classrooms that are likewise empowered, inclusive, and cohesive. With gentle humanity, this book inspires teachers to break down silos, observe each others' classrooms, interrogate their own biases, and put students at the center of everything they do in the math classroom. This book: Weaves raw and authentic stories—both personal and those from other educators—into a relatable and validating narrative Offers interactive opportunities to self-reflect, build relationships, seek new vantage on our teaching by observing others' classrooms and students, and share and listen to other's stories and experiences Asks teachers to give and accept grace as they work collaboratively to better themselves and the system from within, so that they can truly serve each of their students authentically and equitably Implementing the beliefs and actions in this book will position teachers to become more active partners in each other's professional growth so that they can navigate the obstacles in their professional landscape with renewed focus and a greater sense of individual and collective efficacy. It equips teachers—and by extension, their students—to chart their own course and author their own equitable and joyful mathematical and professional stories.

best middle school math textbooks: Literacy and Learning in the Content Areas Sharon Kane, 2017-07-05 The 3rd Edition of Literacy & Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very

activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.
