best korean textbooks for self study: *South Korean Education and Learning Excellence as a Hallyu* Young Chun Kim, Jae-seong Jo, Jung-Hoon Jung, 2023-08-11 This book constitutes a sociological, anthropological, and curricular inquiry into the factors surrounding high academic achievement rates of students in South Korea. Taking root in similar studies conducted around the exemplary nature of the Finnish education model, it explores the phenomenon of success in South Korea, uniquely connecting it to the scholarship and models for examining the recent shift in attention and popularity of Korean culture. The authors argue that Korean education or K-edu can also be studied and understood as a Hallyu and an exemplary form of education. Drawing on longitudinal qualitative studies spanning over 15 years, the authors advance understandings of Korean academic success beyond more generalized understandings of how Asian students learn and towards a holistic explanation for the case of Korea. As such, the book challenges the perception of Korean students as passive learners with a controlled learning culture and instead advocates the ways in which Korean students are leading a changing culture by utilizing all available resources and opportunities in the space of South Korea's evolving ecological system of education. In addition, this book provides one explanation as to how students from East Asian countries achieve such excellent academic performance. A crucial exploration of the culture and growth of education systems in Asian countries, this book will appeal to scholars and researchers with interests in Korean education and Korean students' academic achievement as an emerging inquiry for both

Korean studies and East Asian Cultural Studies. In addition, this book will also be informative for scholars of comparative education, sociology of education, educational policy, and postcolonial educational research in the world.

best korean textbooks for self study: *History Textbooks and the Wars in Asia* Gi-Wook Shin, Daniel C. Snider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.
