app to sell textbooks online: *Evolución de las startups en el mundo del libro* Javier Celaya, Kershama St. Luce, José Antonio Vázquez, 2017-05-20 Las startups hoy nos resultan a todos familiares, sobre todo a la hora de hablar de emprendimiento y tecnología en cualquier ámbito empresarial. Aunque es un término que desde hace tres o cuatro años se emplea con mayor frecuencia, en realidad es algo de que algunos -entre ellos nosotros en Dosdoce- hemos venido hablando desde hace años al compartir y analizar la relación de las nuevas tecnologías con, en nuestro caso, el sector cultural y ahora en concreto con el sector editorial y en el mundo del libro, en general. Este informe trata de ofrecer una instantánea general actual para retomar el debate e incluso a conseguir una mayor voluntad de inversión, dado que el editorial -como el sector cultural en general- no es un campo que destaque por sus inversiones en este tipo de empresas emergentes. El estudio nace de la iniciativa de Thad McIlroy -involucrado desde finales de los 90 en el trabajo de empresas tecnológicas aplicadas al mundo del libro, tanto como inversor como consultor-, que publicó a finales de 2016 el informe 'An Authoritative Look at Book Publishing Startups In the

United States', donde se da una relación actual de cerca de 900 startups en relación al mundo del libro y que se comenzó a compilar a comienzos de 2012. La lista actualizada que aporta Thad (y que acompaña a este documento ahora también actualizado por nosotros) nace de una lista que Michael Bashkar ya había elaborado, de modo que en ese momento ambos estaban en la misma labor recopilatoria. En Dosdoce.com hemos querido darle un enfoque más global fijándonos sobre todo en el espectro español y latinoamericano, y añadiendo ejemplos europeos.

app to sell textbooks online: *Notjohn's Guide to E-Book Formatting* N.J. Notjohn, 2017-01-01 The self-publisher's bible! In this clear and entertaining ten-step guide, now in its eighth edition, a prolific American author tells how he formats his books using free software for upload to online bookstores. The secret, he explains, is to use the universal epub format to create a single e-book file that will be accepted by every digital retailer, from Amazon.com through Barnes & Noble, the Apple iBookstore, and smaller booksellers like the Canada-based Kobo. Most beginners write their books in Word or Open Office, Notjohn says, and then they up to upload the same document for conversion to an e-book. Sometimes it works; more often it doesn't, because these programs litter the file with hidden formatting. The result can be a disaster. Instead, the word-processing document should be converted to clean HTML, the markup language used to create a web page. (All e-books are web pages at heart, and the Kindle and other e-book readers are just special-purpose web browsers.) The conversion from document to HTML file takes seconds. It can then be plugged into a simple template that Notjohn includes in this Guide and also makes available on his blog for anyone to use.

He also supplies a style sheet to format the book for best appearance on the Kindle, Fire tablet, the various Kindle apps, as well as on competing tablets and e-book readers. If all else fails, there's Plan B: a stripped-down template for novels and for non-fiction that consists mostly of text. He concludes with a chapter on how best to present your e-book on the Kindle platform, with hints on encrypting the book, copyrighting it, and pricing it for the greatest return. And new this year: a chapter on adapting the e-book to a print edition. With illustrations and screenshots. Revised and updated 2017 edition.

app to sell textbooks online: iPads in the Early Years Michael Dezuanni, Karen Dooley, Sandra Gattenhof, Linda Knight, 2015-01-09 Digital devices, such as smart phones and tablet computers, are becoming commonplace in young children's lives for play, entertainment, learning and communication. Recently, there has been a great deal of focus on the educational potential of these devices in both formal and informal educational settings. There is now an abundance of educational 'apps' available to children, parents, and teachers, which claim to enhance children's early literacy and numeracy development, but to date, there has been very little formal investigation of the educational potential of these devices. This book discusses the impact on children's learning when iPads were introduced in three very different early years settings in Brisbane, Australia. It outlines how researchers worked with pre-school teachers and parents to explore how iPads can assist with letter and word recognition, the development of oral literacy and digital literacies and talk around play. Chapters consider the possibilities for using iPads for creativity and arts education through photography, storytelling, drawing, music creation and audio recording, and critically examine the literacies enabled by educational software available on iPads, and the relationship between digital play and literacy development. *iPads in the Early Years* provides exciting insights into children's digital culture and learning in the age of the iPad. It will be key reading for researchers, research students and teacher educators focusing on the early years, as well as those with an interest in the role of ICTS, and particularly tablet computers, in education.
