best world history textbooks college: Teaching World History Thematically Rosalie Metro, 2020 This book offers the tools teachers need to get started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects

the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6–12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents—including speeches by queens and rebels, ancient artifacts, and social media posts—they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the “master narrative” of world history from figures like Queen Nzinga and Huda Sha’arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. best world history textbooks college: *Achieving Equal Educational Opportunity for Students of Color* Richard R. Valencia, Valencia presents the most comprehensive, theory-based analysis to date on how society and schools are structurally organized and maintained to impede the optimal academic achievement of low-SES, marginalized K-12 Black and Latino/Latina students—compared to their privileged White counterparts. The book interrogates how society contributes to educational inequality as seen in racialized patterns in income, wealth, housing, and health, and how public schools create significant obstacles for students of color as observed in reduced access to opportunities (e.g., little access to high-status curricula knowledge). Valencia offers suggestions for achieving equal education (e.g., implementing fairness of school funding, improving teacher quality, and providing students of color access to multicultural education) by disrupting structural racism. Considering the rapid aging of the White population and the sharp decline of White youth—coupled with the explosive growth in people of color—this book argues that the “American Imperative” must be to assiduously mount an effort to provide an excellent education for students of color, who the nation will depend on for a sizable proportion of its work force. Book Features: Examines how society and schools are failing Black and Latino/Latina students, principally Mexican Americans who are by far the largest Latino/Latina group. Uses theoretical frameworks that draw from analysis of structural inequality, critical race theory, anti-deficit thinking narratives, class-by-race covariation, and an asset-based perspective of students of color. Discusses the “American Imperative” and the personal and economic consequences of not investing in students of color.

best world history textbooks college: *History and Human Flourishing* Darrin M. McMahon, 2023 The Humanities and Human Flourishing series publishes edited volumes that explore the role of human flourishing in the central disciplines of the humanities, and to what degree the humanities can increase human happiness. This volume examines the relationship between history and human flourishing and, more broadly, investigates the ways in which the arts and humanities are related to human well-being. The essays here represent the efforts of a varied and distinguished group of professional historians to consider a deceptively simple question: what is the value of history for life? Each author asks in what ways historians, their work, and the objects of their inquiry might contribute to human well-being and how they might be encouraged to do so. History, in this volume, refers not just to the past writ large, but also to the discipline and practice of historical inquiry, along with the production and consumption of works of historical representation. Thinking of history in these ways, the contributors address a wide variety of subjects in connection to issues of well-being, considering history across time and place as a vocation, a source of the sublime, a site of play, and a repository of meaning with surprising analogues to religious experience. Overall, *History and Human Flourishing* uses personal experience, insight into the professional and scholarly world of historians, and a variety of historical periods and approaches to highlight the value of studying history in discussions of human flourishing. The essays in this volume identify history and the historical craft as tremendous potential resources for human well-being and of vital importance for our times.
