Sato, Neriko Musha Doerr, 2014-04-03 How does language or culture come to be standardized to the degree that it is considered 'homogeneous'? How does teaching language relate to such standardization processes? How can teaching be mindful of the standardization processes that potentially involve power relations? Focusing on the case of Japanese, which is often viewed as homogenous in terms of language and culture, this volume explores these questions in a wide range of contexts: the notions of translation and modernity, the ideologies of the standardization of regional dialects in Japan, current practices in college Japanese-as-a- Foreign-Language classrooms in the United States, discourses in journals of Japanese language education, and classroom practices in nursery and primary schools in Japan. This volume's investigation of standardization processes of Japanese language and culture addresses the intersections of theoretical and practical concerns of researchers and educators that are often overlooked.

beyond textbooks login: *God's Journey* Brett Rogers, 2012-10 God's journey starts by laying a

conceptual foundation of creation and then discusses the steps it has taken in its evolution. There is only one fundamental pattern creation finds a way of getting its parts to work together to create something that is more capable of observing and acting within creation, ideally in a sustainable way. Good examples of this are the trillions of cells that work together to create a human being and humans who work together to create schools, businesses, governments, and economies. Humans, like other parts of creation, can express this fundamental pattern to varying degrees of effectiveness. Sometimes we work together to create something that contributes to the evolution of creation really well, sometimes not so well, and sometimes it takes away from it. Learning to optimize our potential to contribute to our personal and collective evolution is the focus of this book. I will discuss a progressive approach for enhancing our personal health and performance to enjoy and use as a foundation for enhancing our collective health and performance (evolution). Enlightenment is the most important process for both our personal and collective evolution. The more aware we are, the easier it is to make good decisions on how to act. Academic pursuits are very important in this, but so is developing our psychic abilities, such as intuition. There is much more to this reality than meets the eyes, as you can learn within this book and much more.
