best chinese textbooks: Serving Library Users from Asia John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

best chinese textbooks: Education in Hong Kong, 1941 to 2001 Anthony Sweeting,

2004-07-01 It provides comprehensive coverage of developments in formal and informal education in Hong Kong from the end of 1941 to the beginning of the new millennium. As was true of its predecessor, each Part of this book is subdivided into three sections: Commentary, Chronicle, and Evidence. Such an organization facilitates flexible reading. Readers primarily interested in analysis, interpretation, and the identification of themes are likely to focus initially on the Commentary sections and to move, as they feel stimulated, to the relevant entries in the Chronicle and/or items of Evidence. Readers who seek either more encyclopedic understanding or detailed answers to specific questions may well wish to focus primarily or at least initially on the Chronicle sections, and then to search for substantiation in the Evidence section or for amplification in the author's Commentary. At times, some readers may wish to browse through the Evidence sections, reaching possibly serendipitous discoveries. Academic and general readers are likely to be particularly interested in Part I of the book, which deals with education in Hong Kong during the Japanese occupation, a topic that has received only very rare and generalization-bound treatment in other publications. The author offers insights into all levels of education. His conceptual scope incorporates many types of education - including the mainstream academic education, technical education, teacher education, special education, physical education, civic education, education that focuses on morals, that which focuses on culture, and the various sorts of non-formal and informal education.
