best korean textbooks: The Politics of Korean Language Textbooks in the Two Koreas

Dong Bae Lee, 2023-12-01 This book investigates the politics embedded in the Korean-language textbooks utilised between 1895 and 2019, within the context of one Korea (pre-colonial and colonial eras), the divided Koreas, and an ethnic Korean group residing in Japan (Chongryon). By analysing the inclusions and omissions from Korean-language the author successfully highlights the impact of Korean politics, making clear how rulers have attempted to control their citizens and legitimize their rule by using primary school Korean-language textbooks as a medium for political education and inculcation. It succinctly displays how different visions of 'ideal citizenship' have been presented in Korea and traces the resulting shift in views towards neighbouring nations as a result, identifying how different rival countries were demonized at different times. This chapter also shows some consistent omissions, such as the lower classes and marginalized individuals within their respective nations. Presenting recommendations for potential improvements of the content of future textbooks this study will be of interest to students of Asian Studies, Post-colonial Studies, Critical Curriculum Studies, Critical Discourse Studies, and Korean Studies.

best korean textbooks: History Textbooks and the Wars in Asia Gi-Wook Shin, Daniel C. Sneider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

best korean textbooks: Healing Historical Trauma in South Korean Film and Literature Chungmoo Choi, 2020-12-20 Through South Korean filmic and literary texts, this book explores affect and ethics in the healing of historical trauma, as alternatives to the measures of transitional justice in want of national unity. Historians and legal practitioners who deal with transitional justice agree that the relationship between historiography and justice seeking is contested: this book reckons with this question of how much truth-telling from a violent past will lead to healing, forgiving, forgetting and finally overcoming resentment. Nuanced interpretations of South Korean filmic and literary texts are featured, including Park Chan-wook's Oldboy, Bong Joon-ho's Mother and literary texts of Han Kang and Ch'oe Yun, whilst also engaging the ethical and political philosophy of Levinas, Hannah Arendt, and others. Also offered is new and extensive research into the hitherto hidden history of thousands of North Korean war orphans who were sent to Eastern European countries for care. Grappling with the evils of history, the films and novels examined herein find their ultimate themes in compassion, hospitality, humility and solidarity of the wounded. Healing Historical Trauma in South Korean Film and Literature will appeal to students and scholars

of film, comparative literature, cultural studies and Korean studies more broadly.

best korean textbooks: Keyness in Texts Marina Bondi, Mike Scott, 2010-01-01 This is corpus linguistics with a text linguistic focus. The volume concerns lexical inequality, the fact that some words and phrases share the quality of being key---and thereby reflect or promote important themes in some textual contexts, while others do not. The patterning of words which differ in their centrality to text meaning is of increasing interest to corpus linguistics. At the same time software resources are yielding increasingly more detailed ways of identifying and studying the linkages between key words and phrases in text databases. This volume brings together work from some of the leading researchers in this field. It presents thirteen studies organized in three sections, the first containing a series of studies exploring the nature of keyness itself, then a set of five studies looking at keyness in specific discourse contexts, and then three studies with an educational focus. Edited by two central figures in the development of keyword analysis, and with contributions from leading specialists in the field, this unique collection brings together a wide range of insights into how keyword analysis can contribute both to linguistic and cultural analysis and to language education. It deserves a place on the bookshelves of anyone with an interest in these areas---Christopher Tribble, King's College, London This is a fascinating volume addressing both methodological and theoretical questions in the study of keywords. It pushes forward the exploration of the nature of keyness and the interpretation of keywords in their textual contexts. An inspiring contribution to a central area of corpus linguistics. ---Michaela Mahlberg, University of Nottingham

best korean textbooks: Korean as a Heritage Language from Transnational and Translanguaging Perspectives Hyesun Cho, Kwangok Song, 2022-12-14 This collection critically reflects on the state-of-the-art research on Korean-as-a-heritage-language (KHL) teaching and learning, centering KHL as an object of empirical inquiry by offering multiple perspectives on its practices and directions for further research. The volume expands prevailing notions of transnationalism and translanguaging by providing insights into the ways contemporary Korean immigrant and transnational families and individuals maintain their heritage language to participate in literary practices across borders. Experts from across the globe explore heritage language and literacy practices in Korean immigrant communities in varied geographic and educational contexts. In showcasing a myriad of perspectives across KHL research, the collection addresses such key questions as how heritage language learners' literacy practices impact their identities, how their families support KHL development at home, and what challenges and opportunities stakeholders need to consider in KHL education and in turn, heritage language education, more broadly. This book will be of interest to families, teachers, scholars, and language program administrators in Korean language education, heritage language education, applied linguistics, and bilingual education.

best korean textbooks: Creationism in a South Korean Culture Hyung Wook Park, 2024-06-25 Park investigates the unexpected success of early Korean creationists, who were mostly scientists, and argues that creationism is not a product of the lack of intelligence or proper scientific education but a consequence of more profound social developments in the twentieth and twenty-first centuries. Known as the religious belief rejecting evolutionary theory, creationism has become a global issue. Although it was often known as a problem unique among fundamentalist Protestants in the United States, it has been appropriated by people with diverse religions around the world, including Asia, Africa, Europe, and South America. Many scientists and educators perceive this dissemination as a threat to modern pedagogy and scholarship, although few of them are aware of its historical and cultural contexts. Through an intensive study of the birth and growth of the anti-evolutionary movement in South Korea during the twentieth and early twenty-first centuries, this book traces an important part of this worldwide movement against evolution. The author argues that South Korean creationism started from the country's past as a developmental state during the Cold War but proliferated further amid subsequent democratization and globalization. Creationism reflected the

new identifications of some Korean scientists and engineers with evangelical faith, who actively formed their own domain outside of the state hegemony and authority. This book is a valuable reference for scholars interested in the dynamic interaction between science and religion in East Asia.

best korean textbooks: The Palgrave Handbook of State-Sponsored History After 1945 Berber Bevernage, Nico Wouters, 2018-02-03 This handbook provides the first systematic integrated analysis of the role that states or state actors play in the construction of history and public memory after 1945. The book focuses on many different forms of state-sponsored history, including memory laws, monuments and memorials, state-archives, science policies, history in schools, truth commissions, historical expert commissions, the use of history in courts and tribunals etc. The handbook contributes to the study of history and public memory by combining elements of state-focused research in separate fields of study. By looking at the state's memorialising capacities the book introduces an analytical perspective that is not often found in classical studies of the state. The handbook has a broad geographical focus and analyses cases from different regions around the world. The volume mainly tackles democratic contexts, although dictatorial regimes are not excluded.

best korean textbooks: Looking East Burglind Jungmann, Kim Young-Jae, Christine Göttler, 2013 Peter Paul Rubens' fascinating depiction of a man wearing Korean costume of around 1617, in the collection of the J. Paul Getty Museum, has been considered noteworthy since it was made. This large drawing was copied in Rubens' studio during his own time and circulated as a reproductive print in the eighteenth century. Despite the drawing's renown, however, the reasons why it was made and whether it actually depicts a specific Asian person remain a mystery. The intriguing story that develops involves a shipwreck, an unusual hat, the earliest trade between Europe and Asia, the trafficking of Asian slaves, and the role of Jesuit missionaries in Asia.--P.
