**english textbooks for high school:** *The 'Hidden Curriculum' of Vietnam's English School Textbooks* Thi Duyen Phuong, Raf Vanderstraeten, 2024-03-15 This book analyzes the basic ideas and premises underlying the English textbooks used at the higher secondary school level in Vietnam from the 1980s to the present, from a sociological perspective. The dataset, upon which this book builds, consists of a collection of 18 textbooks, which belong to five sets of locally developed English textbooks for grade 10 to grade 12 students. These series were used in all public schools from the mid-1980s to the present. During this period, schooling expanded rapidly in Vietnam, while English also gained increasing prominence within the school system. This book examines the curricular content of these textbooks and presents a long-term analysis of the 'hidden' curricular content in light of Vietnam's recent history and its government's concerns about national identity.

**english textbooks for high school:** Routledge Library Editions: Historiography Various, 2021-06-23 The greatest problem in historical scholarship, theoretically and practically, is the relation between historians and their subject matter. The past is gone and historians can only study its remnants. On what basis do scholars select certain facts from the mass of data left from the past? How do they explain the interrelationship of the facts they select? What criteria do they use to evaluate their subject? The 35 volumes in this set, originally published between 1926 and 1990 discuss and answer these essential questions faced by historians. The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture. Both historiography and historical thinking advanced as never before. The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought. One consequence was extensive organisation and professionalization of research, which the volumes in this set reflect.

**english textbooks for high school:** Globalization and English Education in Taiwan I-Chung Ke, 2021-11-29 Ke's book examines and reflects on English education in Taiwan from a global English perspective, starting with a discussion on globalization and global Englishes. English education in Taiwan has gone through various major transformations since the intensification of globalization after the 1990s. On one hand, children start to learn English ever earlier while on the other hand, the curriculum and materials in the vocational schools and at the tertiary level become diversified to meet various specific needs of English use. Internationalization of education has brought increasing numbers of international students, and the roles of English in Taiwan are changing constantly with the dynamic environment, from a foreign language to a lingua franca, medium of instruction, and an international language. In his book, the author documents the historical development of education and the roles of English in Taiwan before reviewing curriculum reforms and changes in the past half century. He then presents teachers' and students' perceptions on global Englishes. He proposes global Englishes' pedagogies and his views on what changes can be made to textbooks, learning materials, entrance exams, translation, and the linguistic environment. Practical suggestions to English education in Taiwan in the globalizing context serve as a tentative conclusion for the book. Offering insights into English education and its relationship with globalization, Ke's book will be useful to researchers and students in the fields of global Englishes and English education as well as offering practical pedagogical suggestions for English educators around the world.
