english textbooks high school: Globalization and English Education in Taiwan I-Chung Ke, 2021-11-29 Ke's book examines and reflects on English education in Taiwan from a global English perspective, starting with a discussion on globalization and global Englishes. English education in Taiwan has gone through various major transformations since the intensification of globalization after the 1990s. On one hand, children start to learn English ever earlier while on the other hand, the curriculum and materials in the vocational schools and at the tertiary level become diversified to meet various specific needs of English use. Internationalization of education has brought increasing numbers of international students, and the roles of English in Taiwan are changing constantly with the dynamic environment, from a foreign language to a lingua franca, medium of instruction, and an international language. In his book, the author documents the historical development of education and the roles of English in Taiwan before reviewing curriculum reforms and changes in the past half century. He then presents teachers' and students' perceptions on global Englishes. He proposes global Englishes' pedagogies and his views on what changes can be made to textbooks, learning materials, entrance exams, translation, and the linguistic environment. Practical suggestions to English education in Taiwan in the globalizing context serve as a tentative conclusion for the book. Offering insights into English education and its relationship with globalization, Ke's book will be useful to researchers and students in the fields of global Englishes and English education as well as offering practical pedagogical suggestions for English

educators around the world.

In an effort to raise awareness on the effects of globalisation on language learning and teaching, the Applied Linguistics Association of Australia (ALAA) devoted its 31st Annual Congress to this theme. This volume represents a collection of papers by academics in Australia, South-East Asia, New Zealand, Europe and North America, which synthesize language learning and teaching theories and current research to present the views of applied linguists and language educators on a variety of issues with regards to the tensions that globalisation and internationalisation bring on language and languages.
