finance college textbooks: College and University Finance (Classic Reprint) Trevor Arnett, 2017-09-12 Excerpt from College and University Finance The general purpose in writing this book has been to lighten the tasks of college administrators and to help make their work more satisfactory, both to themselves and to all those who have at heart the welfare of American colleges. The particular purpose in writing it, in response to numerous requests, has been to put into book form a statement of the principles underlying college accounting and the use and care of trust funds, and to describe a complete, yet simple, system of college accounts which has been tried and found satisfactory. It is hoped that business officers will find the book a help to them in performing their duties more intelligently and efficiently, and that presidents, as well as trustees, will be assisted in discharging their responsibilities. No attempt has been made to discuss educational problems, the text being limited to a discussion of business and financial problems only.
